Boundary Review Committee

Meeting Minutes #2
September 22, 2026, 3-5 p.m.
Glacier View Junior High School Library – 12807 184th St. E., Puyallup, WA, 98374

Members:

Present: Cynthia Balzarini, Dr. Gordan Brobbey, Stephanie Clarno, Brian Devereux, Katie Diaz, Brian Eagen, Jennifer Estroff, Brian Fosnick, Bristol Grab, Chad Halverson, Jacinda Lee, Misha Liu, Mike McCanna, Cindy Poysnick, Jessica Sandvigen, Ceceilia Tamayo, Brad Thayer, Victoria Treffry, Bentley Walker

Absent: LaShawnda Baldwin, Julie Hunter, Caroline Ichura, Michelle Jangula, Jessica Ryan, Quavion Swazer, Katy Wytko

Agenda Meeting 2
Instructions for Microsoft Teams – BRC Access

Welcome/Introduction

The meeting started off with members being welcomed back by Brian and Dr. Brobbey. Dr. Brobbey then reviewed the Community Agreements with members again. Brian asked Bentley Walker, one of the junior high student members, to introduce himself as he was unable to attend the last meeting that had the introductory activity.

JH Attendance Matrix

The first item to be shown to members was the Junior High Attendance Matrix. This graph showcased attendance data from October 1st, 2025. Brian made mentions that with these numbers, regional programs like PAGE or other self-contained programs at these schools are not included in the figures shown in the resident counts in the top half of the page.

Member Question:

- At the Junior High level they must renew their waiver every year, correct?
    - Brian – Yes, they do.
    - Dr. Brobbey – Yes at all levels they must renew their waiver every year.

**PSD Staff confirmed post-meeting that in-district transfers are vested at school once they've been approved. Non-resident transfers are required to reapply & be approved for a waiver annually.*

Table Work

Next Brian and Dr. Brobbey presented a table activity for the members to work on that will help them better understand and utilize all the data being presented at these meetings. Members were grouped into a table of four. Members were also informed that the worksheet enrollment included for this activity include all students.

Below is the task the members were given for this activity:

Members were asked to analyze “Option 1” plan which shifts all neighborhood tracts within the Hunt Elementary attendance boundary from Glacier View Junior High to Ferrucci Junior High.: The tables were asked to consider:

- How would this boundary adjustment affect total enrollment at both Glacier View and Ferrucci Junior High?
- How would the shift affect building utilization and capacity at both schools?
- Would either school move significantly above or below its building capacity?

The tables were asked to identify an alternative GVJH/FJH boundary change and provide information that supports or challenges the plan, referring to Option 2 for each table.

Member Questions before members dived into the table activity:

- Is there any way that there is data that shows which kids are broken down more into grade like 7th, 8th, and 9th?
    - Brian – we don't have the enrollment numbers broken down by grade for this activity, but we can provide that in the next meeting.
- Is there a target number you want the groups to hit?
    - Brian – The activity is for the tables to identify their own target number considering the school building capacity.
- Are the tracts being shown factor in that some neighborhoods are closed off, like some neighborhood tracts and neighborhoods go one way or closed off by private roads?
    - Brian – Yes transportation was a factor but not the sole factor when the neigbhorhood tracts were created. We welcome the local knowledge members bring to the committee.

Members were given approximately 30 minutes to complete their work. Table groups were then asked to present their work to the rest of the committee.

- Table 1 – Victoria T, Bristol G, Stephanie C, Cindy P
    - Option 1 – We did a clean/simple grab all of Hunt adding about 169 students, not super feasible for Ferrucci Junior High to handle as it will put them over capacity.
    - Option 2 – Reassign tracts 76, 74, 72, 71 from GVJH to FJH.
    - Victoria brought up some concerns based off her area of work that for Ferrucci to grab lower socio-economic students/residences can cause a concerning imbalance.
- Table 2 – Katie, Cynthia, Jacinda, Jessica
    - Option 1 – Move everyone except tract 78 due to the transportation access points. Hunt could be used as a transportation hub for tract 82. This leaves only 18 students staying at Glacier View with 168 students moving to Ferrucci.
    - Option 2 – Reassign Tracts 71, 72, 74, 76, and 82 from GVJH to FJH which include 112 students moving to Ferrucci. 74 students would remain with GVJH within tracts 73, 75, 77, 78, and 79.
    - Member Questions and Notes: –
        - It does not make sense to split N/S on 144th because transportation picks up kids on south streets at the same stop.
        - Can 9th Graders attend ER?
            - Brian – We haven't been given any direction to study that. We do have some Ferrucci students sharing the campus with the high school students already due to the fire. A scenario that can happen is that we give this report to the School Board, and they ask us to then study a grad realignment in the future. However, that aspect is not in the current scope of this committee.

    - Member Comment – This has been explored several times over the decades with the main factors being the distribution issues and the capacities at the high schools.
- Table 3 – Brian E, Misha L, Cecilia T, Mike M
    - Option 1 – With moving all tracts to Ferrucci this would reassign 186 students to FJH. This would result in the following totals: 905 students at Ferrucci and 754 students Glacier View.
    - Option 2 – Move tracts 71-76 to Ferrucci which results in 101 students to Ferrucci. Tracts 77-79 and 82 stay at Glacier View. Heritage seems to be able to accommodate buses if none are already utilizing that route. This will however split some students from elementary levels moving up to junior highs.
    - Member Questions:
        - How many in-district waivers at Glacier View?
        - How many out-of-district waivers at each school?
        - How many 6th graders that are out of district waivers are possibly going to these two junior highs?
        - Brian mentioned that the JH attendance matrix shared at the beginning of the meeting provides a snapshot of student choice from October 2025. He mentioned he could bring additional information to the following meeting.
- Table 4 - Brad T, Bentley W, Chad H, Jen E
    - Option 1 – By moving all tracts to Ferrucci new population count is 905 students. This opens room for waivers at Glacier View for students burdened by the move. It will also put Ferrucci at capacity if normalized in the next 3 years.
    - Option 2 – We would move every tract but one however to us this didn't make sense to exclude just one, so Option 1 remains our choice plan. Transportation did add we could move tracts 80 & 81 to make a more convenient route.
    - Member Notes:
        - Expect populations to normalize after the current class of Ferrucci students move onto Emerald Ridge and current elementary families feed into Ferrucci.
        - If presumption about future population of Glacier is off it will impact our group's conclusion for Option 2.

Once all tables shared their options Brian asked to recap and restated the requested information members wantedfor the next meeting.

- Requested Information:
    - Return with demographic data of the plans identified in today's meeting.
    - Enrollment for this year's 5th – 7th graders, which represent the 2028-29 Junior High class, the projected apex for JH enrollment districtwide.
    - Any applicable updates from Brian's planned meeting with Karen Mool, Executive Director of Special Education.
    - Member inquiry on bus stop locations and if a possible map or way to view them exists for them to see and utilize in this work. Brad Thayer, Assistant Dir. of Transportation stated he would explore options of how to best share this information.

As a few program acronyms were being used at today's meeting, below is the summary given

- PAGE Program –Highly-capable program at the Junior High level. These students participate in advanced coursework designed to provide greater depth, complexity, rigor and acceleration than is typically available in the general education classroom.
-
    - Relation to our work – Ferrucci Junior High is a PAGE home school for students residing in the FJH and GVJH attendance areas. The district is currently using a shuttle system to bus the students to Ferrucci.
- QUEST Program – highly-capable program for 3rd- 6th graders at the elementary level.
- WRAP Program – Special education program for students with autism. Stahl JH has also opened the same program at their building.

Minor Adjustment #1

Brian shared the first Minor Adjustment proposal with the members; as a reminder, minor adjustments being brought to this committee can be district wide. This minor adjustment proposes that 9 parcels are moved from the Sunrise boundary area to the Shaw Road boundary area. Transportation and a current parent of 2 of 3 resident students in this area have requested the change. The basis from each party are based on this cud-de-sac area assigned to Sunrise is not connected to other Sunrise neighborhoods. The access road to the cul-de-sac is within the Shaw Road Elementary attendance boundary. This change would also reassign the junior high (FJH to KJH) and high school (ERHS to PHS) boundary. Currently there are two elementary students attending Edgerton Elementary (recently moved into their new home) and one 8th grade student attending Ferrucci JH.

Member Questions:

- It a bit hard to tell by just the map is there any Road specifics or names?
    - Brian reviewed the local street names. He noted that road names change in this area due to the City of Puyallup / unincorporated Pierce County boundary line.
- How often do boundaries get changed due to a parent's request?
    - Brian – Not often, we probably see it every couple of years.

Conclusion

The meeting ended with the members being reminded that they should have received invitations to the Microsoft Teams channel for this committee, plus a different email with a set of instructions for any non-district employee or student members. If any member needs help, they were informed to contact Kinsey Pitsinger at Capital Projects.

- Member Comment – Member who already went through the process before the meeting stated they had an easier time using the browser version Microsoft Teams.
- Contact Information – If any help is needed, please contact Kinsey at: 253-841-8772

The meeting adjourned at 4:45PM

Next Meeting:

Meeting #3
September 29, 2026 3-5PM
Glacier View Junior High School Library – 12807 184th St. E., Puyallup, WA, 98374
