Parent Guide: Schoology

Updated: September 2026

Overview:

Schoology is used by Worthington Schools students in grades 6-12. It is an application that provides access to lesson content, assignments, and grades for each of their courses. Students log in to Schoology through HelloID using their district-assigned username and password.

Parents may create a parent Schoology account, which can be connected to their child's account. Parents log in to Schoology through the Schoology website and create an account with their personal email, then use the child-specific Schoology Access Code to connect to their child.

Creating a Parent Schoology Account:

- If you have already created a Schoology account in the past, it remains active, and your student(s) classes will automatically update from year to year. You can log in to Schoology here. **Note**: If you have a Schoology account from another district connected to your personal email, you may need to contact your former district and ask them to make your account inactive.
- To set up a new parent account, go to the Schoology Registration Page, select Parent, and follow the prompts.
- If you have a Schoology account but have forgotten your password, go to the Schoology Forgot Password page and enter the email you initially used to set up the account. A link will be sent to your email to reset your password.
- To add additional children to your existing account, log into Schoology and then click the arrow next to your name in the top right corner. Click **Add Child**. Input the Schoology Access code for the child you wish to add, and click the **Use Code** button. Once added, you can toggle between student accounts in the top right corner of the page.

Finding your Schoology Access code:

- Log in to Infinite Campus Parent through the Infinite Campus Parent app or at the **Infinite Campus Parent** website.
- Once logged in to Infinite Campus Parent, click the **Backpack** button, which is located in the Shortcuts section on the home page.
- Open the document labeled *Student Information*.
    - Schoology codes are unique to each child. If you have more than one child in grades 6-12, toggle to each child in the top right corner of Backpack to retrieve their unique code.
