MEMORANDUM

To: Timothy W. Bricker
From: Brian Russell
CC:
Date: 09/17/2026
Subject: Quarterly Facilities Update

June 2026 – August 2026

Stony Creek Elementary School

Work associated with the partial roof replacement project was completed at Stony Creek Elementary, with only the installation of the metal-edge remaining to fully close out the project. The metal edging delivery was delayed and once received will be installed.

Blue Bell Elementary School

Work on the partial roof replacement project was completed, with the remaining metal-edge installation still pending for the same reason as Stony Creek's project. Additional improvements included painting the front canopy and pillars, repainting a classroom, and completing the district-wide intrusion alarm system upgrade within the building.

Shady Grove Elementary School

Roof repairs in the gymnasium were completed, and the district-wide intrusion alarm system upgrade was successfully completed within the building.

Lower Gwynedd Elementary School

Several improvement projects were completed at Lower Gwynedd Elementary, including installation of a new HSA-sponsored bike rack, repairs to the sidewalk near the side gym entrance, and completion of the Knight Road pedestrian safety and crosswalk project. The playground replacement project remains underway and is scheduled for completion by September 18, 2026.

Wissahickon Middle School

The locker conversion project was completed, and significant progress was made on the boiler replacement project. One boiler is currently operational, while final work on the second boiler is underway, with official startup and inspection anticipated by the end of the month on both boilers. Additional work included repairs, sanding, and relining of the Gym 2 floor, installation of replacement kitchen equipment, and ongoing work related to the district-wide intrusion alarm

system upgrade. Gym 1 is still not available as the investigation for what caused the flooding that damaged the flooring continues.

Wissahickon High School

Carpet was replaced with floor tile in three classrooms. Extensive repairs were completed on all three chillers, including replacement of several condenser fans, coil repairs, and correction of system leaks. A portion of the failed second-floor sewer line was replaced. Two hot water heating pumps were rebuilt. Parking lot striping and curb markings were refreshed in the student lot and front cafeteria/teacher parking areas. The district-wide intrusion alarm system upgrade remains ongoing, and replacement kitchen equipment was installed.

Central Office

Preparations were completed at the Central Office, where new offices were set up to accommodate incoming administrative staff and support district operations for the new school year.

Transportation Center

Paving of the bus lot entrance was completed. The sewer line replacement project was substantially completed, with remaining restoration work dependent on the township's School Road project. Flooring improvements were also completed in the drivers' area, where carpet was removed and replaced with floor tile.

District-Wide

Across the district, extensive custodial and maintenance work was completed in preparation for the start of the school year, including deep cleaning of all buildings, floor waxing, and carpet cleaning. Landscape maintenance was also completed at all facilities, including weeding and mulch installation.
