ASVAB – Tuesday, October 20, 2026
8:00am – 10:30am, SHS LGI (Room 121)

The purpose of the Armed Services Vocational Aptitude Battery (ASVAB) Career Exploration Program assessment is to assist the student in identifying his/her **abilities and interests** related to careers. We recommend students take this assessment to assist them in planning their post-secondary education and career goals. While military personnel *may* assist with the administration of the assessment, students *do not* need to have an interest in the military to benefit from the assessment.

A test results interpretation session is planned for the end of November. All students who take the ASVAB will receive a pass for this session and are expected to attend. Students will not fully benefit from the assessment without the information presented to them during this session.
