Mission:

Assets School serves gifted and capable students, specializing in those with dyslexia and other language-based learning differences. We provide a strength-based program, complemented by outreach and training, that empowers students to become effective learners and confident self-advocates.

School and Community:

Founded in 1955, Assets School has a long history of providing education tailored to the unique needs of each student. The High School was established in 1991 and moved to its own campus in 2015.

Assets School uses research-based teaching methodologies and resources to provide an integrated curriculum and individualized instruction designed to help students reach their full potential. We empower students to understand and navigate their learning differences, become confident self-advocates, and develop the skills and strategies they need to become effective, lifelong learners.

The school serves students ages 5 to 18 whose capabilities often exceed their academic achievement. By providing the right balance of challenge and support, Assets School helps students build confidence, maximize their academic potential, and develop the tools they need to thrive.

Curriculum & Methodology:

Our curriculum not only targets content objectives but also the individual student, which makes for a uniquely personalized learning experience. Through strong teacher-student relationships, the teacher gains insights into the way each individual child learns and identifies tools and strategies that help to maximize those strengths and circumvent challenges. Teachers use a wide variety of methodologies that are multi-modal and multisensory. We promote student driven learning opportunities such as project and problem-based learning. Threaded through this unique approach to instruction is an emphasis on study skills development (learning to learn) and the high school Schoolwide Learning Expectations (goals that target academic, personal, social, and civic growth).

College Attendance:

Approximately 95% of graduates are accepted to college programs both on the U.S. Mainland and in Hawaii per year. Students that choose an alternative path to success are also closely guided in their career planning through our College and Career Counseling Program.

Assets High School Profile 2026-2027

Grading:

The grading scale is provided on our transcript. We calculate cumulative GPA based only on courses taken at Assets High School; however, credits are inclusive. We do not rank students. Grading is approached with the unique needs of our students in mind. It can be individualized in the same way that our curriculum is built around the students. If you have questions about the achievement or level of study reached by an individual student, please contact the college counselor for more detailed information.

Graduation Requirements: 24.0 Credits Minimum

- 4-English/Literature
- 3-Mathematics
- 3-Sciences
- 3-Social Sciences
- 4-Electives
- 1.5-Fitness & Life Skills (Health, P.E., College Career Guidance)
- 3.5-Mentorship (see Unique Course Offering Section)
- 2.0-World Languages
(Select students are exempt from this requirement based on their learning profile. Typically, additional English language-based study skills courses are substituted).

Unique Course Offerings:

The High School Mentorship Program matches students in positions at various companies and organizations, based upon their personal interests and qualifications. Students in grades 10-12 earn high school credit by working at their mentorship sites every Wednesday, September through April, for 5.5 hours each week. The Program creates an immersive learning environment by extending learning beyond the walls of the classroom and providing critical connections between schools and careers, with access to community role models. Overall, the program enhances students' awareness about themselves, the work world, and how they can transition into a professional environment. The Mentorship program culminates each year in an Expo in which students present to an audience of peers, parents, and the public as an authentic demonstration of their learning.

Self-Directed Study: Advanced classes that allow independent students to define the trajectory of their own learning. Self-selected topics align with personal passions; learning objectives and evaluation processes are student-driven with teachers serving as guides who aid in problem-solving and hold students accountable for meeting their goals.

Dual Credit: For students whose interests exceed our offerings, we connect them with opportunities at local colleges for dual credit. Students who earn dual credit have the grade for the college course listed on their high school transcript, but grades will not be factored into the high school GPA since they are outside our institution.

Standardized Testing:

Standardized testing is not mandatory. Limited entrance testing is available on campus each year with accommodations.

College Highlights: Class of 2026

100% were accepted into college programs on the US Mainland and Hawaii.

Financial Aid Awarded \$912,000. (36 students)

When students choose an alternative path to success, they are also closely guided in their career planning.
