Welcome to Endeavor

Endeavor is a learning support program designed to bring Franklin's commitment to personalized learning to life for students with specific academic needs. Endeavor classes provide access to Franklin's challenging and transdisciplinary curricula, promoting success while developing skills to build independence.

It combines the convenience and efficiency of regular on-site support with the expertise of a learning specialist well-versed in the Franklin culture, curriculum, and program expectations.

Endeavor has its roots firmly grounded in the philosophical and practical principles of Oxford University's tutorial mentorship model. We utilize contemporary research in special education pedagogy combined with the creativity of design thinking to provide students with a strength-based and innovative academic and executive functioning support program. Additionally, Endeavor is built upon our affiliate school's 45+ years of sustained success in the field of learning support.

Our expert learning specialists take a holistic approach to help students with learning differences — providing them with the strategies, learning support structures, and skill development that optimize their academic abilities and empower them to succeed.

Our Holistic and Collaborative Approach

Each Endeavor student has a learning support profile to ensure that everyone – students, parents, and faculty – is aware of which support structures and specific learning adjustments aligned to the student's needs are in place.

Endeavor instruction is built into a student's schedule so that learning support is provided throughout the school day and will include three meetings per week. Sessions are scheduled during seminar periods, ensuring students do not miss out on curriculum periods and can return to classes with the rest of their cohort.

Endeavor specialists are an integral part of our curriculum and assessment design process. This collaborative approach ensures that student support is seamlessly integrated into their educational experience; throughout each unit, lesson, and assessment. Specialists collaborate regularly with classroom teachers, deans, department leads, the school counselor, and athletic coaches to collect live, and in many cases time-sensitive, data about students to design the most effective strategies for enhancing their progress in all facets of school life.

Personalized, Comprehensive Support

Endeavor's learning specialists are experts in supporting students with a wide variety of learning differences. They help students identify and understand how they learn best – and how to use that knowledge to enjoy academic and intellectual growth. Endeavor students build skills and refine their approaches to learning while engaging with course material that they need to master. They also learn how to articulate their needs and become self-advocates.

Endeavor students are matched with a specialist on a 1:3 teacher-student ratio. Specialists are selected with careful thought toward skill and personal development, and the pairing remains in place for the entire year. Our core curriculum was designed with learning adjustments embedded into every academic unit. This ensures that all students' teaching and learning needs have been well-considered, planned for, and implemented using best practices.

We Utilize Data-driven Progress Reporting

Franklin is dedicated to providing meaningful and digestible data when monitoring and communicating student progress with families on a regular basis, ensuring a harmonious and strategic approach to setting measurable goals. Franklin's focus on skill development in the areas of problem-solving, self-management, collaboration, and the effective utilization of technology are also key components of Endeavor student reporting.

Meet Director of Endeavor Delaney Oliveri

Ms. Oliveri brings a decade of experience from Windward and Gateway Schools, leaders in language-based learning. At Windward, she trained in Preventing Academic Failure (PAF) and The Writing Revolution (Hochman Method), building expertise in literacy instruction and learning disabilities. At Gateway, she coached teachers in ELA, Research, and Humanities, led professional development, and served on the Student Support Team. She now applies this combined strength in student support and faculty coaching to her work in and out of Endeavor. Ms. Oliveri provides professional development to Franklin's faculty, teaching them best practices in special education to refine their pedagogy and prioritize skill development in the classroom.

As Endeavor provides students with additional academic learning support, it is a fee-based program. To learn more, please email admissions@franklinjc.org or call us at 201-731-4817.
