

N-3 PUSH-IN SPEECH THERAPY: BEST PRACTICES AND CONSIDERATIONS FOR IMPLEMENTATION

Description

the spirit of being consistent with Least Restrictive Environment (LRE) and inclusion, many school speech-language pathologists (SLPs) are implementing push-in service delivery for speech therapy. This webinar explores current research regarding therapy group size, dosage, engagement, and collaboration with teachers, and applies these research findings to push-in therapy. The potential costs and benefits of push-in therapy will be discussed. Strategies for maximizing engagement and data collection during push-in therapy will be shared. Time for sharing, discussion, and questions will be included throughout the webinar.

Intended Audience

This training is geared to speech language pathologists. Speech language pathology assistants and interns may also benefit from the information in this webinar.
