INVENTOR'S LEAGUE CHURCHILL

PROTOTYPING FOR THE FUTURE

Design. Create. Innovate. Solve Real-World Problems.

Students explore critical global issues and develop their own innovative product solutions using rapid prototyping and problem-solving skills.

Each day begins with inspiring stories of young inventors and innovators. Students then research a problem in areas such as medicine, architecture, the environment, and technology, and develop a solution from concept to presentation.

Students will learn to:

- Research and identify real-world problems
- Brainstorm and develop innovative solutions
- Create 2D designs and 3D models
- Build a website to showcase and pitch their ideas
- Collaborate in pairs and teams
- Present their final product to the class
