Halifax County Schools Utilizes Former Pittman Elementary Campus into Professional Learning Resource Center

HALIFAX, NC - Halifax County Schools is giving new purpose to the former Pittman Elementary Leadership Academy campus by transforming the facility into a district Resource Center dedicated to professional learning, collaboration, and staff support.

Following the transition of Pittman students to Eastman Leadership Academy for the 2026–2027 school year, Halifax County Schools identified an opportunity to continue utilizing the former school facility to support the district's instructional priorities. The Pittman campus will now serve as a central location where educators and staff can participate in professional learning, collaborate across schools, access instructional resources, and strengthen practices that support student achievement.

The development of the Resource Center has been supported by the district's mentors in collaboration with the Curriculum and Instruction team. Together, they have worked to organize the space and develop resources that will provide educators with meaningful opportunities for continued learning and professional growth.

Professional learning remains an important part of Halifax County Schools' work to strengthen teaching and learning. With the assistance of district mentors and the Curriculum and Instruction team, the center will also provide opportunities for educators to receive support, share effective instructional strategies, explore resources, and collaborate with colleagues from across the district.

"Our staff deserve opportunities to be poured into, just as they pour into our students each day," said Superintendent Dr. Eric Cunningham. "We want this Resource Center to be a place where they can come to learn, connect, be encouraged, and leave better equipped for the work they do. Supporting our people is one of the most important investments we can make."
