

BOARD OF TRUSTEES
HUMBOLDT COUNTY SCHOOL DISTRICT

POLICY 5020
PUPILS

STUDENT PROMOTION and HIGH SCHOOL GRADUATION REQUIREMENTS

The Board of Trustees believes that schools within the District must work in partnership with parents/guardians and the larger Humboldt County community to provide students with the knowledge, skills, and attitudes required for promotion to or graduation from high school either by traditional or alternative means. It is expected that students will graduate from high school prepared for a job, career and/or college so that they will be successful in our diverse and changing world. At all stages along the pathway to graduation, parents/guardians must be well informed about the progress of their student(s) so that they may guide their student(s) to make appropriate choices that lead to success. The District shall report all aspects of a student's progress in school to the parent(s) or guardians (s).

Promotion from Middle/Junior High School

A student who has not made progress in middle school/junior high school and is subject to retention, may be promoted to high school on academic probation if he/she has successfully completed summer school, is no more than one half credit deficient in any single core subject and is not more than one credit deficient in all of the four core subject areas, provided that his/her parents/guardians agree with the promotion.

High School Graduation and Credit:

The following applies with regard to graduation from a District high school:

- a. Students must fulfill the graduation and credit requirements of the Nevada Department of Education and the Humboldt County School District.
- b. Grading shall be consistent throughout the District.
- c. The Board of Trustees recognizes the importance of alternative means and programs for earning high school credit.
 - d. The District shall maintain regulations and procedures for the granting of credit in regular and alternative education programs that may be used to fulfill high school graduation requirements.
- e. Credit received through alternative education programs and/or dual enrollment programs may be used to fulfill high school graduation requirements, within prescribed policies.
