July 2026

Dear Staff, Students and Parents of Monona Grove School District

In response to the requirements of the Asbestos Hazard Emergency Response Act (AHERA), the Monona Grove School District is notifying all building occupants as to all asbestos activities within the district.

In 1988, a comprehensive asbestos building inspection was conducted for all school district buildings. Once the inspection was complete an Asbestos Management Plan was developed to help manage asbestos-containing materials within the district. Three-year re-inspections of all asbestos containing materials were conducted by State of Wisconsin certified personnel and completed most recently in 2012. These reports are available for your inspection during normal business hours at the school district office.

During these inspections all asbestos containing materials were identified and their condition assessed. All materials assessed in a friable condition have been abated. Abatement projects have been completed during the summers of 1989, 1991, 1992, 1994, 1995, 1997, 1998, 1999, 2000, 2001, 2003, 2006, 2008, 2009, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020 and 2024.

At this time, the Monona Grove School District has an ongoing Asbestos Operations and Maintenance (O&M) program in effect. Included in the O&M program is a periodic surveillance of all asbestos containing materials which is conducted every six months. This O&M program will remain in effect as long as asbestos containing materials are present in the Monona Grove School District buildings.

If you would like more information or have questions, please feel free to contact at 608-316-1910.

Sincerely,

William Miller
Director of Buildings and Grounds
