

Graduation Requirements - Exhibit

For families seeking alternatives to the SAT preparation requirement, we recommend the following options:

1. **Private Tutoring:** Families may engage a Math and/or English Language Arts tutor. Students must complete a minimum of 18 hours of instruction. Upon completion, families must submit an outline of the content covered along with a signed statement from the tutor verifying the hours completed. We recommend tutoring be completed prior to the SAT.
2. **Approved SAT Preparation Program:** Students may complete a recognized SAT preparation program, such as those offered by **Khan Academy, Kaplan**, or another certified provider. A certificate of completion must be submitted upon completion of the program.
3. **All Course Network (ACN):** The **All Course Network (ACN)** has periodically offered SAT preparation courses. While these opportunities are not available every year, families are encouraged to review the ACN course offerings to determine whether an SAT preparation course is available.

Here are the general content areas that need to be addressed through SAT prep tutoring, (this is aligned to SAT content). Please note that a tutor will individualize content based on each student's academic strengths and needs.

Students are required to complete 18 hours/content area (36 total for Math and ELA).

English/ELA:

- **Information and Ideas:** Analysis of textual and quantitative evidence
- **Craft and Structure:** Text structure, author's purpose, and organizational features
- **Expression of Ideas:** Standard English conventions

Mathematics

- **Foundations of Algebra:** Linear equations, inequalities, and graphing linear equations
- **Problem Solving and Data Management:** Ratios, proportions, and data analysis
- **Quadratics and Polynomials**
- **Geometry:** Area, volume, and application of geometric concepts through word problems
