

SCHOLAR-ATHLETE ACADEMIES:

Where Ambition
Meets Opportunity

At UNISUS, students don't have to choose between academic success and athletic ambition. **Our Scholar-Athlete Program combines outstanding academics with high-performance training during the school day**, helping students reach their full potential both in the classroom and in their sport.

BECOME A SCHOLAR-ATHLETE

Why Athletes Choose UNISUS

At UNISUS, student-athletes pursue strong academics alongside professional training in their sport of choice. Our Scholar-Athlete Academies are integrated into the school day, allowing athletes to train at a high level without missing classes, because the strongest athletes are also strong students

Train Beyond the Sport

Scholar-Athletes at UNISUS develop far more than sport-specific skills. Alongside academy training, students participate in strength and conditioning, dryland training, nutrition education, and performance-focused development that supports long-term athletic success.

Just as importantly, every Scholar-Athlete participates in our Future Ready Program, helping students build resilience, self-awareness, leadership, communication, and decision-making skills needed to thrive in sport, academics, and life. Through ongoing reflection and personalized growth, students develop the mindset and habits of high performers while preparing for success beyond graduation. At UNISUS, we believe the strongest athletes are also resilient learners, confident leaders, and capable young adults.

Developed in partnership with Everton FC in the UK, our Soccer Academy follows the club's proven training methodology to develop technical ability, tactical awareness, game intelligence, and confident decision-making in a high-performance training environment. Student-athletes train with our UEFA A-licensed coach, appointed by Everton, right on the UNISUS soccer field.

Soccer Academy

Our Hockey Academy combines high-performance on-ice training, position-specific skill development, and dryland conditioning to help athletes elevate every aspect of their game. Student-athletes train with high-performance coaches at the Summerland Hockey Rink, building technical skills, confidence, and the habits needed to compete at the next level.

Hockey Academy

Our Snowsports Academy combines high-performance alpine and freestyle ski training with expert coaching to help athletes refine their technical ability, confidence, and performance on the mountain. Student-athletes train on the mountain during the winter months, developing the skills and experience needed to compete and progress in the sport.

Snowsports Academy

Our Motorsports Academy combines professional driver coaching, on-track training, and performance development to help athletes build precision, confidence, and racecraft behind the wheel. Through focused driver training at Kartplex at Area 27, student-athletes develop the technical skills, focus, and decision-making needed to excel in competitive motorsports.
