								Demolish existing attached 20'x20' (400 SF) garage - applied under separate permit. Construct new two-story attached garage with new foundation, first-floor mudroom and pantry addition, and second-floor bonus room/master suite expansion above. Per plans by Mark Fritz Architects dated 8/24/2026; ZBA Petition #13-26 approved 9/17/2026 for reduced rear yard setback. Project is out to bid now general contractor will be selected shortly and added later on. Electrician HVAC will pull their own permits. *Workers comp or 7A/7B will be required.*

1. 200-Amp Electrical Service Upgrade								Applicant	sean kaufman, Address:61 ledgecrest drive, Phone:(203) 781-6389
The existing 200 amp electrical service will be replaced to a modern 200-amp service. Work will include:								Contractor	<NO NAME>
* Upgrade and replacement of the existing meter and service riser as required.								Property Owner	STOUT SHANDRA NANETTE & GALEN, Address:42 LINCOLN AVENUE
* Replacement and raising of the service disconnect to provide proper accessibility and servicing clearance.									
* Installation of appropriately sized service conductors and associated service equipment. Install a 100 amp panel next to main panel located in basement.									
2. Grounding and Bonding									
The existing grounding system will be evaluated and upgraded as required for the new 200-amp service.									
* Install ground rods as required.									
* The existing metal underground water service will be evaluated to determine whether it qualifies as a grounding electrode.									
* Provide any required bonding to the water service and other grounding electrodes.									
* Additional grounding and bonding will be installed as required by the AHJ.									
3. Main Panel Conductor Management									
The existing main panel will be reorganized to address conductor management and enclosure volume requirements.									
* Reduce conductor congestion and cross-sectional volume fill within the panel enclosure.									
* Identify and properly terminate, remove, or relocate unused/abandoned cables as appropriate.									
* Where necessary, install an accessible junction box to properly terminate and extend existing conductors.									
* Maintain proper conductor routing, support, terminations, and enclosure volume requirements.									
4. Condenser Disconnect Replacement, Relocation, and GFCI Receptacle									
The existing condenser disconnect will be									
The existing disconnect is positioned in a manner that is obstructed by the condenser, making access difficult for safe operation, inspection, and servicing. The disconnect will therefore be replaced and relocated/raised to provide improved accessibility and adequate working space.									
Existing branch-circuit wiring will be sifted over a few feet as necessary to accommodate the new disconnect.The disconnect will be a pull out type and properly rated for the condenser equipment.									
5. Electric Fireplace Insert – Dedicated Circuit									

Report generated from 09/01/2026 To 09/30/2026

Date Issued:	Address:	Permit Number	Total Valuation	Work Class	Application Type	Occupancy Code	Application Date	Applicant
--------------	----------	---------------	-----------------	------------	------------------	----------------	------------------	-----------

A dedicated 120-volt, 15-amp branch circuit will be installed for the electric fireplace insert.

* Install a 15-amp AFCI circuit breaker where required.
* MC cable will be used for the branch-circuit wiring.
* The circuit will originate from the electrical panel and be routed through the basement ceiling and up through the clean out.
* Cable routing will be coordinated around existing mechanical equipment while maintaining proper protection and support.

6. Cable Routing and Accessible Connection Point

The fireplace circuit will be routed through the basement ceiling and into the wall cavity leading to the first-floor fireplace location.

Where an accessible hand-hole is required within the basement stairwell, an appropriate electrical ring and cover plate will be installed to provide access for inspection and future servicing while maintaining a clean finished appearance.

All wiring will be properly supported and protected throughout the installation.

7. Future Kitchen Countertop Receptacles

Three receptacle outlets will be installed in preparation for a future countertop and sink installation.

* Receptacles will be located to serve the planned countertop area.
* Locations will be coordinated with the future countertop and sink layout.
* Required GFCI protection and receptacle spacing will be provided in accordance with applicable NEC requirements for kitchen countertop receptacles.
* Final locations will be coordinated to avoid conflicts with the future sink and countertop installation.

		contractors under separate permits and is excluded from the building-permit valuation stated above. Plumbing and gas: Relocate dishwasher connections; add a pot filler; extend existing gas piping to serve a new gas cooktop, including the required accessible appliance shutoff and final connection; replace kitchen shutoffs and trap; and replace the wall-mounted radiator with a hydronic kickspace heater. The oven will remain electric. Electrical: Revise the existing kitchen electrical layout to accommodate the new cabinet and appliance locations. Provide code-compliant countertop receptacle spacing, required small-appliance branch circuits, and GFCI/AFCI protection. Disconnect and safely terminate the existing electric-cooktop circuit; retain or relocate the existing electric-oven circuit as required; provide a 120-volt receptacle for ignition of the new gas cooktop in accordance with the manufacturer's requirements; relocate the refrigerator receptacle; provide a 120-volt circuit for the electric floor heating; rough in under-cabinet lighting; replace the existing ceiling wafer lights with new LED units; and replace one center ceiling fixture with a homeowner-selected fixture. Heating: Replace the existing gas boiler with a Peerless high-efficiency unit. This work will be separately permitted.

		owners. We weren't informed about this by anybody, despite the fact that we paid \$720 for a FULL house inspection... the central aircon sys works, but a recent inspection completed by Mr Chris Bouchard, Senior Building Official, failed it because there was no permit pulled for the central aircon sys. around 2007 when it was put in by the previous owners. To fix this, we have contacted several contractors and work is on the way in these areas (1) Permit is pulled (see this effort by myself, the home owner in this report), (2) UL181 tape is being applied to the ducting work, and (3) a duct leakage test will be performed and report generated that we'll share with Mr Chris Bouchard as soon as we have it. Since we have suffered a MAJOR loss during the January 2026 winter storm and lost a lot of money and time we still could not move into the house (at the time of writing it is September 2026) we hereby kindly ask the WH Building department to issue this REPAIR permit asap and then as soon as the work is done. We'll inform the Department and hopefully it can be inspected quickly. This is VERY important not to slow down all other work being performed ref. the repairs due to the Jan. 2026 storm damage. THANKS in advance, Paul Ranky						Owner Builder	RANKY PAUL G & MARTI & RANKY RICHARD GABRIEL, Address:13105 CIMARRON CIR N
