RPHS Transfer Credit Worksheet

Student Name_____ Student College ID _____

Use this worksheet to determine how much transfer credit you will transfer to your university. Credit can come from Dual Credit, OnRamps or Advanced Placement (AP) classes and exams.

The Texas Common Core Numbering System (TCCNS) will allow students to look up credits that transfer to and from all Texas colleges and universities, including HCC and UT.

The AP Credit Policy Search will enable students to look up how the scores they received on their AP exams will transfer to any college or university in the United States and beyond.

- **Dual Credit** courses taken through Houston City College will transfer to all Texas colleges and many colleges out of state; students can request those transcripts by clicking **here** or scanning the QR code on the next page.
- **Dual Enrollment (OnRamps)** courses taken through the University of Texas at Austin will transfer to most colleges inside and outside of Texas; students can request those transcripts by clicking **here** or scanning the QR code on page 3.
- **Advanced Placement (AP)** tests where students earned a transferable score can be transferred to their colleges through their **College Board account**.

Seniors do not need to request transcripts from HCC or UT until *after* they have finished the last class *and* know where they are going. They also do not need to request their official AP score report from College Board until *after* the May test scores are released in July following graduation.

Dual Credit or OnRamps courses resulting in an A, B or C college grade are transferable. D's are not. AP credit transfers depend on the score, the test and the college you are transferring the credit to.

Write down the classes that you took in the sections below, and take this with you to your New Student Orientation. Please see Mrs. J in K145 with questions.
