INSIDE
BINUS SCHOOL Semarang

Term I Edition

Elsie L. Bait - Principal

Principal's Message

I feel truly privileged to lead such a dynamic school, one that nurtures vibrant, curious, and active learners in our city.

At BINUS SCHOOL Semarang, we believe education goes beyond academics. We nurture students to develop exemplary character, innovative thinking, and compassionate leadership, while growing with happiness, confidence, and a strong sense of belonging.

Through a holistic education and a global curriculum grounded in local values, we empower our students to become resilient, purposeful, and future-ready learners.
Together, let us inspire the next generation to grow, lead, and make a positive impact on the world.

Meet Our Teacher

Hi there, I'm **Ms. Lina!**

I'm an Early Years educator who truly enjoys working with young learners. I've had so much fun working with preschool-aged children, and becoming a preschool educator has been my passion since my college years.

I graduated with a degree in Early Years Education, which helped me build a strong foundation in understanding and supporting young children's learning and development.

Ms. Lina
Early Years 3A Headroom Teacher

Message from Ms. Lina

To my students, always be curious, be brave to try new things, and remember that it's okay to make mistakes because mistakes help us learn and grow.

To parents, thank you for trusting us to be part of your child's early years journey. Let's continue to work together to support, encourage, and celebrate every little step of their growth.

Stories from Our Classrooms

Storytelling Step by Step!

Our Early Years 3 students stepped into the role of young storytellers through the story "Doctor Alma and Mr. Robot." During this engaging learning activity, the students practiced retelling the story while arranging picture cards in the correct sequence using *"First," "Next," "Then," "After That," and "Finally."*

By connecting each picture to the events in the story, students learned to recognize the beginning, middle, and end of a narrative while developing their understanding of chronological order. As they shared the story in their own words, they also strengthened their speaking skills, vocabulary, comprehension, memory, and confidence in expressing ideas.

From sequencing pictures to telling a complete story, our Early Years 3 students are learning that every great story begins one step at a time!

Makerspace Room for Primary

Building, Testing, and Making Things Move!

Our Grade 4 students explored the fascinating world of pneumatics through their Makerspace project, Pneumatic Moving Arms. By using air pressure to control movement, they designed and built their own moving arms while learning how simple mechanisms can turn ideas into action.

Through hands-on building, testing, and problem-solving, students developed their creativity, collaboration, and engineering skills while having fun making their creations come to life!

Beyond the Classroom

Getting to Know Our Binusian Community

On Friday, 24 July 2026, BINUS SCHOOL Semarang warmly welcomed our new sutdents especially Secondary students from Grades 7 and 10 through the Acquaintance Program 2026.

Facilitated by the Student Council (SC) Officers and the Guidance Counselors (GC) Team, the program helped students build new friendships, become familiar with the school environment, and begin their journey as Binusians with confidence.

Students participated in interactive activities such as the Getting to Know You Game, followed by a Campus Tour Scavenger Hunt, where they explored key learning facilities while completing fun challenges together.

Discover, Explore, and Choose at Electives Fair 2026

BINUS SCHOOL Semarang supports students in exploring their talents and interests beyond academics through a variety of elective and club activities. Electives are available from Early Years to Secondary, while clubs are offered for Primary and Secondary students.

The programmes were introduced through the Elective Fair on August 6, giving students and parents an opportunity to explore the activities offered for Academic Year 2026/2027. Activities are led by BINUS SCHOOL teachers as well as external vendors and professional coaches.

CHARACTER. CAREER. CONNECTION.

Growing Together Through SPIRIT

Grade 7 and 10 students joined the SPIRIT Getaway at Kampoeng Banyumili, Salatiga. Through outdoor activities and interactive games, students strengthened friendships while experiencing and putting the BINUSIAN SPIRIT values into practice beyond the classroom.

Industry Discovery

Grade 8 and 11 students explored industries in Yogyakarta through visits to Bakpia Juwara Satoe and Dagadu Yogyatorium. Through guided visits and conversations with professionals, students gained insights into how industries work and how their interests and skills can connect to future career opportunities.

Future Career Exploration

The Career Exploration Excursion 2026 gave Grade 9 and 12 students first-hand exposure to real-world workplaces through visits to PT Marimas Putera Kencana and PT Waleta Asia Jaya. Students connected classroom learning with practical industry operations while gaining a better understanding of career paths, workplace skills, and future educational opportunities.

UNIVERSITY FAIR

Students connected directly with the university representatives, through conversations, questions, and new perspectives, they can gradually build a clearer picture of what they may want to pursue in the future.

Our Secondary students the chance to explore these options firsthand helps students understand what lies beyond high school and they start connecting their interests with possible academic pathways.

BINUS YOUTH LEADERS' SUMMIT

A big shoutout to Felicia, Rafi, Jason, and Alyssa for representing BINUS SCHOOL Semarang at the BINUS Youth Leaders' Summit 2026 and earning recognition in **Best Gallery Walk, Best 3 Minutes to Impact Video, and Best Mixed Group Presentation**.

Through these activities, our students explored the realities of human trafficking while developing critical thinking, collaboration, communication, and social awareness, reflecting SDG 4: Quality Education in action.
