Dear Families,

Roselle District 12 is dedicated to using technology to prepare students to ethically engage in our global society. The district takes the privacy and safety of our students when they are online as a top priority.

Content Filter

Roselle District 12 utilizes an Internet content filter that is in compliance with the federally mandated Children's Internet Protection Act (CIPA) called Securly.

- All Chromebooks, regardless of physical location (in or out of school), will have all Internet activity protected and are subject to being monitored by the District.
- If a website is blocked in school, then it will be blocked outside of school.
- If an educationally valuable site is blocked, students should contact their teachers to request the site be unblocked.

Using Your Chromebook Outside of School

Students are encouraged to use their Chromebooks at home and other locations outside of school. A WiFi Internet connection will be required for the majority of Chromebook use. Some applications can be used while not connected to the Internet. Students are bound by the District Acceptable Use Policy wherever and whenever they use their Chromebooks. Violations of these policies will result in the loss of privileges, disciplinary action, and/or appropriate legal action.

Chromebook Management Outside of School

Student devices are kept on Securly safety protocols outside of school hours as well. **Access on devices is limited between the hours of 10pm-6am to ensure our students maintain a healthy, balanced lifestyle.** Parents who would like to have more control over their child's device when at home are encouraged to download the Securly Home app to set offline schedules or pause the internet on the device at home. For more information on how to download Securly Home, see the information below or on our website at www.sd12.org/domain/62

No Expectation of Privacy

Anyone using a District-owned Chromebook, using District equipment and/or the District network systems has no expectation of privacy in such use. The District has the right to, and does, monitor use of these systems. Teachers, school administrators, and the technology department staff may use monitoring software that allows them to view the screens and activity on a student's Chromebook. This allows the district to limit the number of tabs open, close non-academic websites, and push out links or messages to keep our students safe and academically engaged.

The vision of Roselle District 12 is to prepare students to ethically engage in our global society.
