# GIVE YOUR CHILD A BIGGER WORLD TO PLAY IN

**Yew Chung International School of Silicon Valley** has pioneered a different kind of education—an international philosophy that blends Eastern and Western approaches to nurture children who thrive across cultures.

**For over 20 summers,** we've opened our campus to the community, helping thousands of children see the world through a broader lens. We help them become more curious learners, more confident thinkers, and more compassionate people.

**Led by our professional teachers**— *not part-time counselors*— our summer program weaves Mandarin into everyday activities. Your child will experiment and create alongside new and familiar friends while absorbing language naturally through play and connection.

**Whether your child is fluent, a beginner, or somewhere in between**, our approach meets them where they are. They won't be sitting in a classroom "studying Chinese," they will pick it up naturally while doing hands-on projects and discovering new passions.

# IMMERSIVE BILINGUAL DISCOVERY MEETS SUMMER PLAY

**From STEAM-inspired projects to active outdoor sports, every day is designed to keep your child engaged and curious.** They will thrive in a safe, supportive environment where teamwork, play, and learning are naturally woven together.

| SESSION 1 | SESSION 2 | SESSION 3 |
|---|---|---|
| June 15-26 | June 29-July 10 | July 13-24 |
| **STEAM Spark** | **Tasty Adventures Around the World** | **Future City Builder** |

**Every session covers:**

- **Active Bodies & Minds:** Daily P.E. and outdoor sports to help them stay active and energized.
- **Future-Ready Skills:** Projects that bridge science, technology, and the arts.
- **Sunshine Fridays:** Featuring water play, field activities, and pizza parties.
- **Student Showcase:** Come view your child's work and watch a grand finale performance.

## SESSION ONE:

# STEAM SPARK

**June 15-26**

**$1,280**

**What secrets hide inside a famous painting? How do skyscrapers stay standing? What can AI actually do?**

In STEAM Spark, your child will explore the connections between science, technology, engineering, art, and mathematics—all while their Mandarin skills grow naturally through hands-on discovery and group play.

By the session's end, your child will have learned to innovate in a world that is more connected than ever.

- **Mysteries in Masterpieces:** Uncover the science in world-famous paintings
- **Secrets of Skyscrapers:** Engineer structures that reach for the sky
- **Eco-Innovation Lab:** Design solutions for real environmental challenges
- **AI in My Life:** Explore how artificial intelligence shapes our world
- **Cultural STEAM:** Where modern innovation and traditions meet

## SESSION TWO:

# TASTY ADVENTURES AROUND THE WORLD

**June 29-July 10**

**$1,155**

**This summer, your child will become a chef and an explorer.**

They will discover the world's flavors and traditions through a hands-on cultural adventure. Guided by our teachers, they will explore literary classics with themed snacks from each story and document their learning in a food and travel journal.

Students will develop Mandarin fluency while discovering how food and stories connect us all. The session concludes with a festive multicultural feast for our families.

**On the menu:**

- **Japanese Teriyaki Chicken Skewers**
- **Beijing-Style Shredded Pork Wraps**
- **Handcrafted Pizzas**
- **Desserts Around the World**
- **... and much more**

## SESSION THREE:

# FUTURE CITY BUILDER

**July 13-24**

**$1,280**

**Young learners have two things in abundance: big ideas and a bold imagination.**

In this project-based program, students will design and build systems of a modern city. Through hands-on problem solving, our teachers guide students on how to explore and shape the way we live, move, and thrive.

By the end of this session, your child will have developed the skills to collaborate with others and gained a glimpse into the future they will one day create.

### Builder projects include:

- **Smart Home Prototypes:** Create future living spaces
- **Magnetic Levitation Trains:** Design transportation using principles of physics
- **Waste-to-Energy Machines:** Explore ways to transform trash into sustainable energy

# REGISTRATION INFORMATION

## An unforgettable summer awaits at YCIS Silicon Valley

**EARLY BIRD DISCOUNT:**
Register by March 16, 2026 and save $50 per session

**MULTI-SESSION SAVINGS:**
Save $50 when you book 2 sessions
Save $100 when you book all 3 sessions

**CAMP HOURS:**
8:15 - 9:00am (drop off)
9:00am - 3:00pm (camp day)

**EXTENDED DAY OPTION:**
3:00 - 5:30pm (w/fee)

**QUESTIONS:**
Becky Qiu, Program Director
