

Product Roadmap

Last Updated: 08-26-2026

The features listed below are targeted for upcoming releases of SchoolTool. This list does not represent every piece of work going into SchoolTool but rather aims to provide a high-level look at the major features targeted for future releases. More details are provided for work in the coming months. Inclusion in this list is not a guarantee that they will be delivered in a particular version of SchoolTool and priorities are subject to change.

Feature	Description
Release 23.4-R2 Sept 29, 2026	
Special Cycle Day Copy	Allow users to create a Special Cycle Day based off an existing Special Cycle Day
Accessibility Updates	Ongoing updates to ensure the new College, Career, & Civic Readiness and Online Registration areas are accessible.
NYSED Updates for Dual Credit	2026-2027 NYS SIRS updates for Dual Credit reporting
NYSED: Student Lite Update	Add in alternate phone number reporting in Student Lite
2026-2027 Assessment Dates	NYSED Assessment Schedules added for 2026-2027 School Year
Canned Hybrid Progress Report	Canned report showing interim Marking Period grades as a Hybrid Progress Report
AA Redirect to AWS Quick Console for Admins	Add a new permission to SchoolTool to allow admin users to be redirected to the AWS Quick console when accessing Advanced Analytics.
CCCR Access Control	Ongoing work to apply new Access Control logic to Student Progress page in College, Career, and Civic Readiness beta. This will set the groundwork for allowing parent/student access to Student Progress in the future.
Long Range: Oct 2026 + (Major plans)	

College, Career, & Civic Readiness (Graduation Requirements) module	Continue building of the new College, Career, & Civic Readiness platform. We plan on releasing components of this module for Beta testing by select districts periodically to gather feedback. Our goal is to have a fully functioning module released to Beta users with basic functionality in the Fall of 2026. Some additional features such as templates and reporting will continue into the 2026-2027 School Year. As we address Beta feedback and near completion of a fully functional tool we will communicate plans to release functionality for all districts.
Online Registration Module rebuild Including enhancements to User Defined Screens and Multi-Lingual Support	Continuation of Online Registration Module Rebuild. We plan on releasing components of this module periodically for BETA testing by select districts / RICs to gather and respond to feedback. Specifically targeted items follow but will depend on ongoing feedback as we release updates.
OLR: User Defined Screen Enhancements (To support more robust online registration forms)	User Defined Screens with questions based on previous questions, signature, attachments per field, mobile phone camera attachments and more. This work will continue through the end of 2026 into 2027.
OLR: Unify the receive students experience.	Updated Receive screens, universal API for OLR, External Reg, Transfer Student, Attachments management, notifications, BOCES OLR support, Mindex Reg Forms
Parent Portal Rebuild	Rebuild the parent portal into a single application ensuring consistency across all user experiences (Mobile app, mobile site, full site). This will be a multi-release effort with a target of having a new mobile app / parent portal available near the middle of 2027.
Access Control Security Updates	Back-end updates to build out a new method of controlling user access to students for new SchoolTool modules/applications including the new CCCR application. This will lay the foundation for student-specific access and search logic in the newer parts of the application for future work.
Attendance and Location Management refactoring	Rebuild various attendance screens and implement better student location management. This work will include support for various "swipe/scan attendance" approaches.
Batch Entry of Work Based Learning and Community Service Hours	Create a batch entry screen where users can enter Work Based Learning and Community Service hours for students in a convenient "quick entry" screen (similar to the teacher entry screen, but available outside of the Grade Book).
