ELECTIVES PHILOSOPHY

Because the middle school years are formative in terms of students' interests and abilities, we strive to give students the opportunity to experience as many electives as possible before the transition to upper school. Early in their middle school careers, students will have the opportunity to experience a variety of our core elective programs. Through exposure to skills and content they might not normally choose, we believe middle schoolers will discover more about their gifts and interests, enabling them to inspire others and live for the honor and glory of God.
