

Using the projector in the auditorium

To use the projector without sound

1. Turn on the projector using the remote. It will be under the light panel. Please place it back so that we do not use it. The one and off button are two different buttons

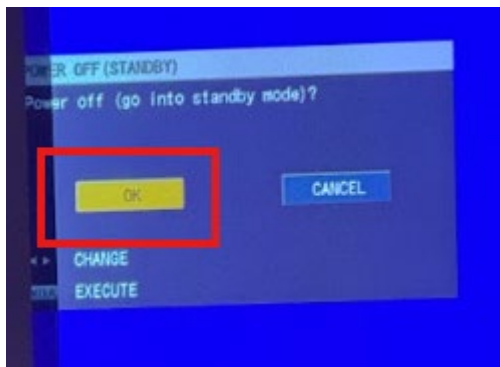

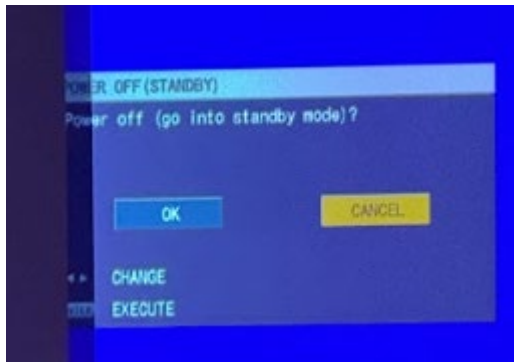

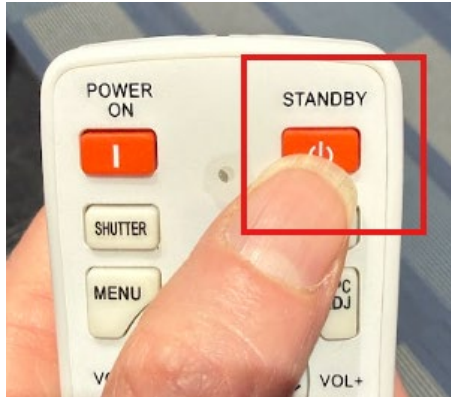

2. Plug in the HDMI cable

3. Use the Standby button to turn it off. You will have to select Yes and hit enter.

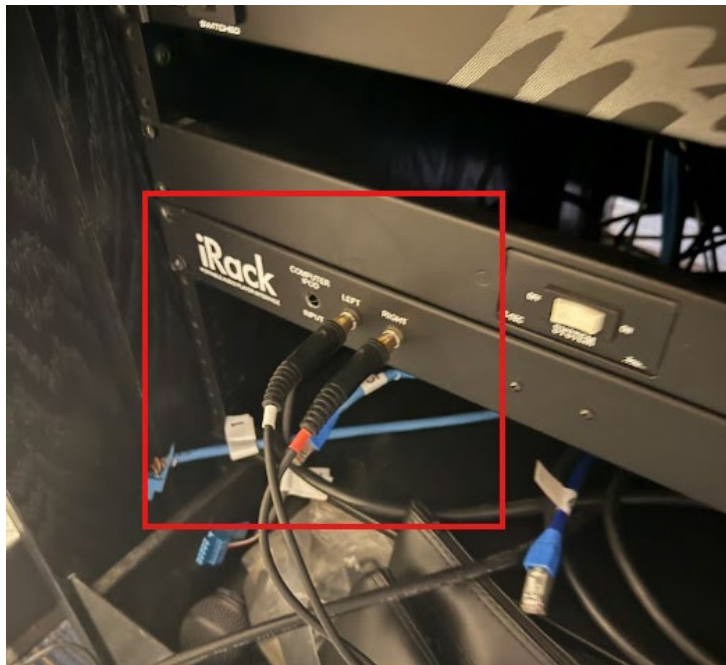

Using the projector in the auditorium

Using the projector in the auditorium

To use the projector with sound

The sound for the auditorium speakers is in the iRack

1. Plug in the aux cable to your headphone jack on your device. It is easiest to adjust the volume on your device as opposed to the volume control on the wall. HDMI goes to the projector. AUX goes to the speakers
