Thinking Big: GPISD Leaves Its Mark on the Future

At Galena Park ISD (GPISD), we Think Big about the future of our students, schools, and community, and on Wednesday, October 7, that vision came to life as GPISD celebrated an exciting construction milestone with a special beam signing ceremony for the new Multi-Use Facility.

Players, trainers, coaches, district representatives, and project partners had the opportunity to add their signatures to a beam before it became a permanent part of the new facility. More than signatures on steel, the beam represents the people, partnerships, and shared commitment helping GPISD Think Big, dream big, and build for the future.

Representatives from Satterfield & Pontikes Construction, Inc. and VLK Architects joined members of the GPISD family to commemorate this special moment and celebrate the progress taking place. As construction continues, GPISD is excited to see this vision take shape and looks forward to the opportunities the new Multi-Use Facility will provide for our students and community.

We're Thinking Big, building for the future, and creating new possibilities for our students. It's a great day to be in GPISD!
