Subject: October 7 Public Comment - Agenda Item 2, Clean Air Day Resolution (Consent)

Dear San Mateo County Board of Education Trustees,

Hi! My name's Riley, and I'm currently a Sophomore at Aragon High School, and therefore a constituent under the San Mateo County Office of Education.

Both my sister and my father have asthma, a condition which air pollution can greatly worsen. Additionally, I walk to school, through the outdoor air, where air pollution is worst.

The Clean Air Day Resolution is a great starting point for SMCOE, establishing support for environmental causes that can be carried into other initiatives, such as Walk/Bike/Roll (something I certainly enjoy as an avid walker) and more ambitious policies in the future.

Thank you,
Riley Munsayac

Dear San Mateo County Board of Education Trustees,

Hello, my name is Brandon Lin, I'm in 12th grade at Aragon High School, and I'm a constituent under the San Mateo County Office of Education! I'm part of a regional organization called Silicon Valley Youth Climate Action, and we're deeply involved in everything about environmental policy.

Air pollution is a crucial problem in the world, with thousands of people getting lung cancer and other related diseases every year. When the skies were orange around the world back in 2020, that inspired me and many others to start advocating for better air quality policies.

A Clean Air Day Recognition Resolution would be a huge step in the right direction for SMCOE and would help raise awareness to the public about the harms of air pollution. These positive outcomes could influence schools as well, including more Walk/Bike/Roll to school, encouraging schools to install air pollution sensors, laying the groundwork for more ambitious policy, etc.

With your support, we can make a huge difference in thousands of lives and increase environmental awareness that people can use in other parts of their daily lives.

Thank you so much for your time,
Brandon Lin

Subject: October 7 Public Comment - Agenda Item 2, Clean Air Day Resolution (Consent)

Dear San Mateo County Board of Education Trustees,

I'm Jayden Wan, a current student at Stanford University and previously attended Burlingame High School. I've worked with the San Mateo County Office of Education before on many environmental campaigns, participated in the Youth Climate Ambassador Program, and work heavily with Silicon Valley Youth Climate Action as founder and now advisor for the San Mateo County Team.

Air pollution is an important issue in the Bay Area because there's a correlation between pollution output and harm to our community and environment. I believe that a Clean Air Day Resolution is a step in the right direction for SMCOE, focusing on actions that schools can take, including supporting Walk/Bike/Roll, encouraging schools to install air pollution sensors, and laying the groundwork for more ambitious policy.

This Clean Air Day Resolution wouldn't just be another tokenist action -- I genuinely believe that it's impactful and important.

Thank you,
Jayden Wan
