3. What are some of your students' barriers to student participation in extracurricular activities?	Barriers

Communication/Marketing	Yes
Cultural responsiveness/awareness	Yes

Other:

As a result of select sports in our area, students that are new to sports may not feel they have the skills of other students. This may reduce their interest in school sports. During the pandemic, we didn't provide our normal transportation, lines of communication and outreach, the seasons were compressed and some students weren't comfortable with group settings.

4. Describe the action steps the school/district will take to reduce the opportunity gap in student possession of ASB cards and/or participation in extracurricular activities for the up coming school year.

We only have an Opportunity Gap regarding extracurricular participation. When we return to normal operations, we expect athletic participation to increase. However, we are planning some targeted communication regarding HB 1660 and the benefits of providing parent consent. We will emphasize that cost should not be a barrier to participate. We will continue to enlist the help of our coaches and community partners to support students in need.
