

EMPOWER PARENTS WITH VISIBILITY AND CONTROL

Whether parents and guardians are serving as tech support or monitoring their child's focus and device usage, their involvement is more important than ever. Lightspeed Parent Portal gives parents greater visibility and control of their children's internet usage on school-issued devices outside of school hours. The Lightspeed Parent Portal allows IT administrators to granularly define which settings parents can view and manage, empowering families with tools that support after-school visibility and control.

Category Access Controls

Allow, restrict, or block after-school access to browsing categories above what is blocked by the district by default.

Custom Block List

Add specific websites to a parent-managed block list for direct site-level control.

Time-Based Controls

Create automated after-school schedules to control categories or pause internet access at home.

Weekly Activity Report

Receive email reports summarizing pages browsed, daily time spent online, and most-visited sites.

Real-Time Insights

View web activity with time-stamped data and allowed/blocked indicators.
