

How to Edit the Business Card Template

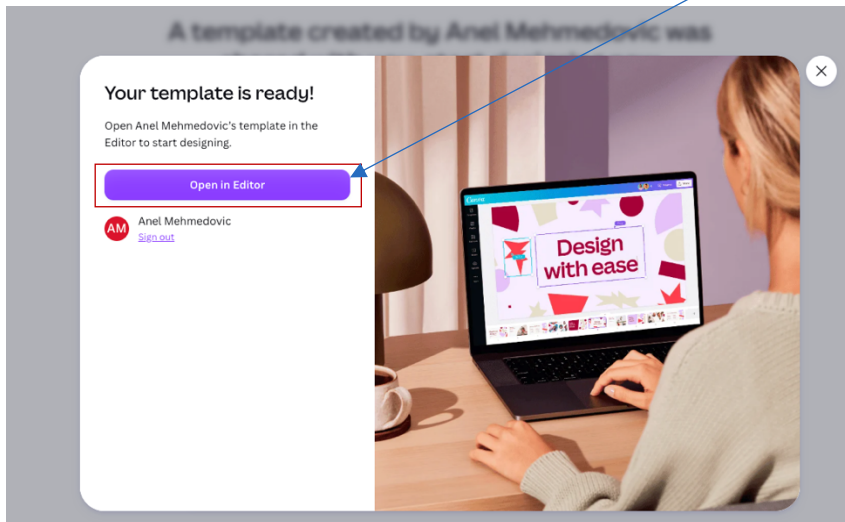

1. A template created by Anel Mehmedovic was shared with you, start designing now

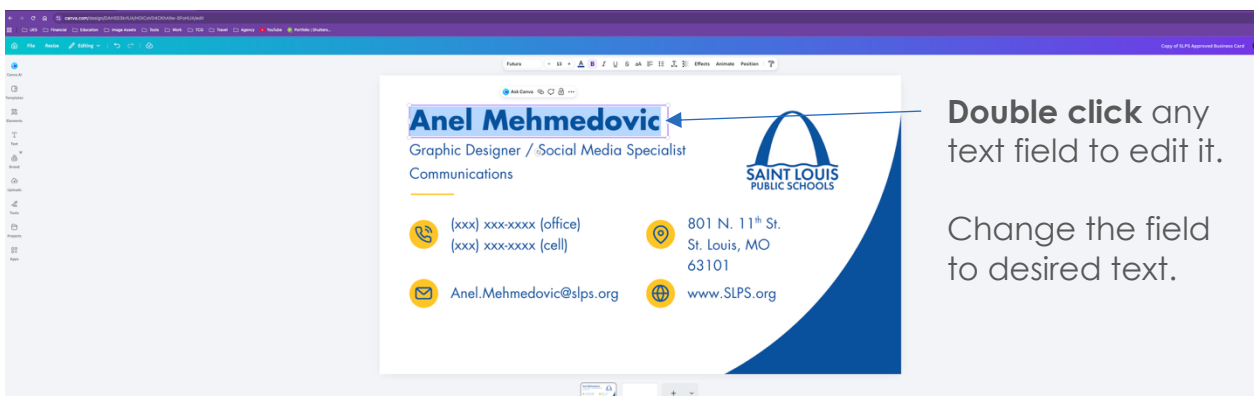

Select View template

Select Open in Editor

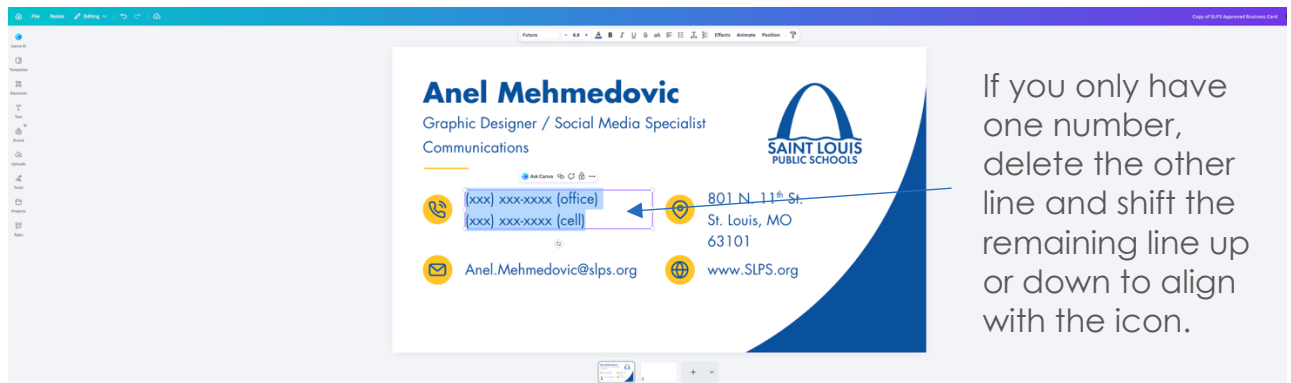

- 2.

- 3.

4.

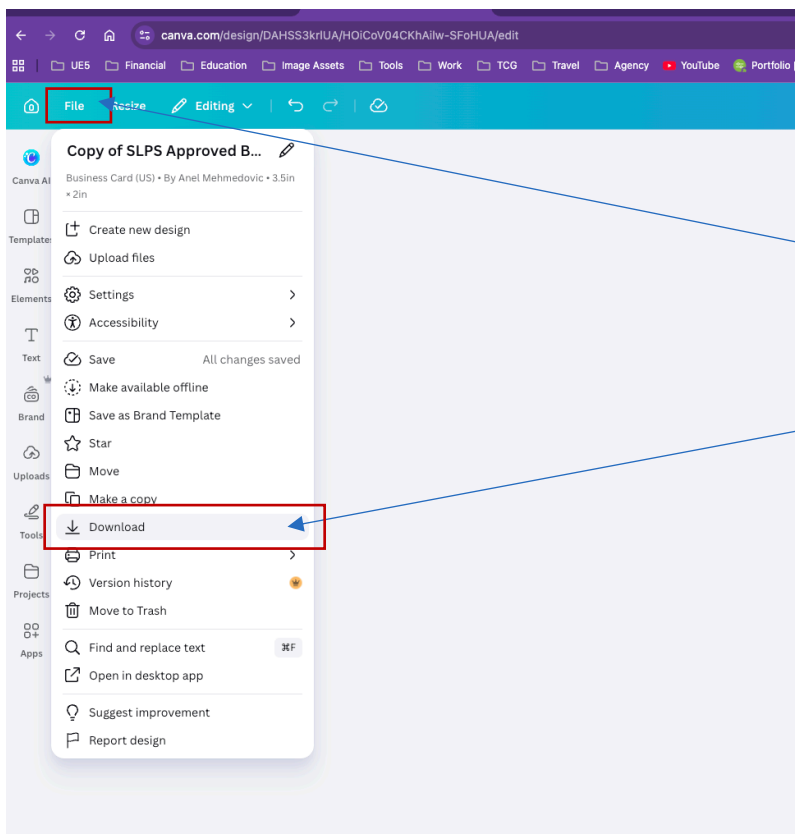

If you only have one number, delete the other line and shift the remaining line up or down to align with the icon.

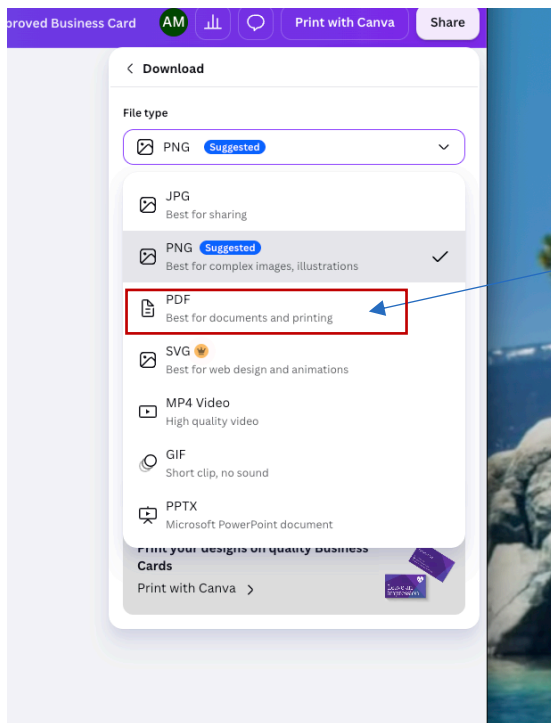

Single number example.

5.

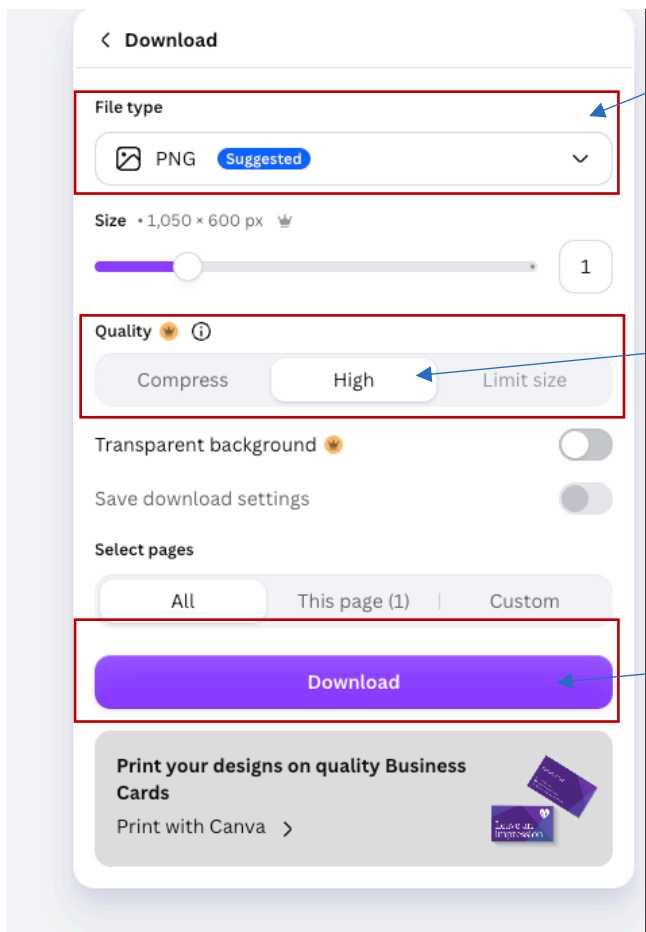

When you are satisfied with ALL of the content, **click File** in the top-left corner, then scroll down and **click Download**.

6.

Select the format you wish to use for printing. **Contact your printer to determine which format works best** for them. PDF is usually preferred.

7.

Make sure that the desired File format is shown here.

You should always select **High Quality** unless instructed otherwise.

Finally, select **Download**. After a few seconds, you should see the file in your **Downloads** folder.
