Our Equity Lens -

As we make decisions to support our work, we consider the following:

*Whose **voice** is and isn't represented in this decision?*	*Who does this decision **benefit** or **burden**?*	*Is this decision in alignment with the **BSD Equity Policy**?*	*Does this decision **close** or **widen** the access, opportunity and expectation gaps?*

Source and Overview

- Data from Lightspeed Insight Platform

- How this was calculated
  - **Per-user daily average:** Only on days student attends school. Absences do not pull number down
  - **Weighted mean:** Total screen time across all students / total active days. One student single outlier day will not skew average

Student	Active days	Total screen time
Maddie	1	1h 45m
Emily	15	7h 30m
Robert	15	11h 15m

Weighted mean: (105 + 450 + 675) ÷ (1 + 15 + 15) = 1,230m ÷ 31 days = 40m/day

A simple average of the three per-user rates would give 60m/day — inflated because Maddie's one day gets equal weight to Emily and Robert's 15 days each.
