

Star Family Report

Understand your student's test scores and how you can help them succeed.

Hello parents and guardians:

Your child has recently taken a Renaissance Star assessment. Your child's teacher uses the results to measure general achievement in reading and/or math, and to determine your child's learning needs.

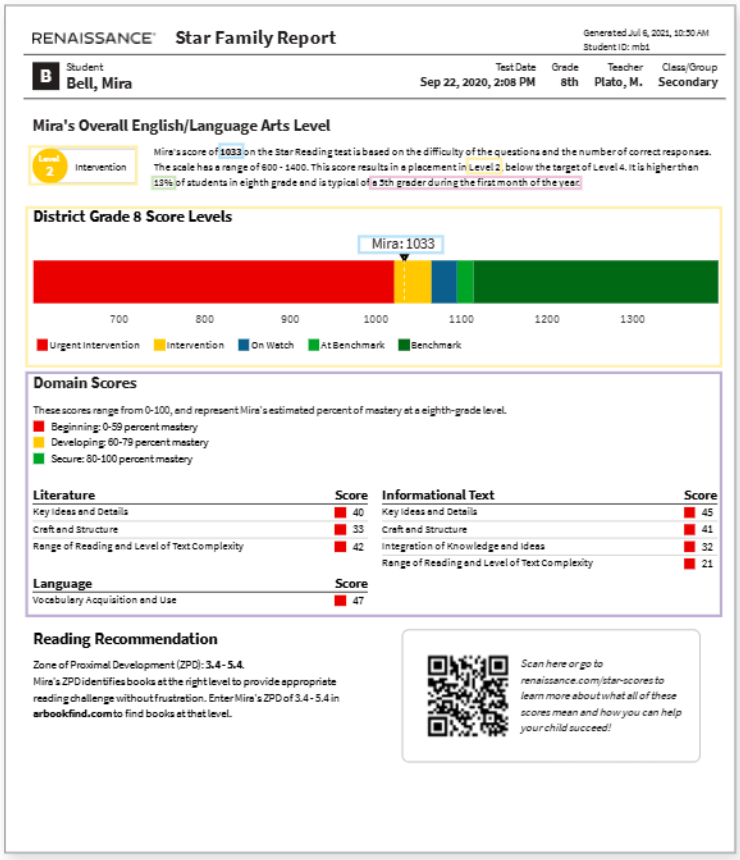

It is important to understand that these test scores provide only one picture of how your child is doing in school. If you have any questions, please reach out to your child's teacher.

In addition to the Star Family Report your child received, the information below will provide more context about your child's scores and performance.

What scores are shown on the report?

Here is a sample report. These scores will not match your child's scores.

Mira's score of **1033** on the Star Reading test results in a placement in **Level 2**, below the target of Level 4 goal. This score is higher than **13%** of students in eighth grade and is typical of a 5th grade student during the first month of the year.

Reading Recommendation

Zone of Proximal Development (ZPD): **3.4 - 5.4**.
Mira's ZPD identifies books at the right level to provide appropriate reading challenge without frustration. Enter Mira's ZPD of 3.4 - 5.4 in **arbookfind.com** to find books at that level.

Scan here or go to renaissance.com/star-scores to learn more about what all of these scores mean and how you can help your child succeed!

Please note: Students are not expected to have mastery of grade-level skills at the beginning of the year. Students are taught skills throughout the year and should move towards mastery as the school year progresses.

Scaled Score (SS) (Example: 1033)

Scaled Score is useful for comparing student performance over time and across grades. A scaled score is calculated based on the difficulty of the questions and the number of correct responses.

Benchmark Categories (Example: Level 2)

Each state or school district has established unique benchmarks that students must reach to be considered proficient. Use the Star Family Report to determine if your child is meeting expectations.

Percentile Rank (PR) (Example: 13)

Percentile Rank (PR) ranges from 1–99 and compares student performance to other students in the same grade nationwide. For example, a student with a percentile rank score of 37 performed as well as or better than 37 percent of other students in the same grade nationally.

Grade Equivalent (GE)—Optional

Grade Equivalent scores show how your child's test performance compares with that of other students nationally. For example, a second-grade student with a GE of 3.2 performed as well on Star as a typical third grader after the second month of the school year. This score doesn't necessarily mean that the student is capable of doing third-grade work. Instead, it indicates that this student's skills are above average for the second grade.

Domain Scores

Ranging from 0–100, domain scores estimate your child's mastery of each domain for the student's grade level. For example, a domain score of 50 for a third grader means the student would be expected to answer correctly about 50 percent of the third-grade items in that domain.
