

DYSLEXIA / READING DISORDERS

EVALUATIONS & TREATMENT SERVICES

NMC Health is excited to offer services in the area of dyslexia and reading disorders. Our skilled experts can help identify and treat children and youth who struggle with reading accuracy and school performance because of these difficulties.

WHY KNOWING MATTERS

Identifying dyslexia isn't about labeling a child; it's about providing a roadmap for their success and unlocking their full potential.

Undiagnosed disorders may cause a child to fall behind in school. Getting diagnosed can help your child access needed resources and support. Important resources like more time on tests.

You can also get the right kind of help like Speech Therapy to help develop practical reading skills.

DID YOU KNOW?

- Dyslexia is the most common language-based learning disorder.
- 1 in 5 students are impacted by these disorders, most never get diagnosed.
- Learning disorders occur at all levels of intelligence, including highly gifted.
- Dyslexia often runs in families. Parents and siblings may struggle to read/write.

COULD YOUR CHILD BENEFIT FROM AN EVALUATION?

Have you or another adult noticed some of the following:

Preschool and Kindergarten-Aged Children

- Delayed speech or language development
- History of frequent ear infections
- Family history of reading or spelling difficulties
- Trouble recognizing or producing rhyming words
- Difficulty saying sounds or syllables in longer words
- Difficulty memorizing the alphabet, learning letter sounds, or remembering familiar sequences (e.g., phone numbers)

Elementary and Middle School-Aged Kids

- Persistent letter or number reversals beyond first grade
- Difficulty learning cursive or having poor/inconsistent handwriting
- Slow, inaccurate reading
- Skipping, guessing, or misreading small words
- Ongoing spelling difficulties
- Trouble memorizing sight words or basic math facts

Who Is Eligible for an Evaluation?

NMC Health can evaluate children ages 6–18 who have difficulties with reading and spelling despite otherwise typical development.

What to Expect During a Dyslexia Evaluation

You and your child will meet with a speech-language pathologist (SLP). The SLP will talk with you about your child's health and school history to better understand your concerns. Then, they will use a few tests to see how your child learns.

What to Expect During Treatment

If your child needs help, we like to see them for sessions 2 or 3 times a week. These last about 30 to 40 minutes. We focus on the exact skills your child needs to become a better reader.
