Project Update: Equity-Centered Prioritization Framework

How We Prioritized Summer 2026 Work

The prioritization framework combines:

- Student population and instructional use
- Equity indicators (UPP/Low Income Communities and Special Education)
- Building orientation and sun exposure
- Heat severity and urban heat island data
- Classroom location (2nd and 3rd floors)
- Building utilization and occupancy

Outcome

- Identified highest-priority classrooms for Summer 2026 implementation.
- Established a repeatable methodology that will evolve as classroom sensor data becomes available.
