Proposed Plan - Focused Tier 1 & 2 Strategies

Category	Site	Proposed Plan
Thermal Comfort Pilot Study	**Laurel ES** **Manzanita Campus**	Tier 1+2 Pilot Strategy - Leverage passive measures on site in coordination with active measures like night flush and targeted active cooling in the warmest classrooms.
Focused Multiple Strategies	**Global Family ES** **East Oakland PRIDE ES** **Redwood Heights**	Tier 1+2 Pilot Strategy - Highest elementary temperature data and using rubric in initial review of summer sensor data creating a blend of Tier 1 and Tier 2 strategies.
Night Flushing Pilot	**Lincoln ES** **Lockwood STEAM** **Burckhalter ES** **Elmhurst United** **Life Academy**	Install night flushing systems to **2 story buildings** that allow building to reset to lower temperatures at start of day. Where there are hotter classrooms that extend beyond what can be done passively we provide active cooling where electrical capacity supports.
Active Cooling Implementation	**Sequoia ES**	Full electrification of the site based on failing boiler systems and installation of passive measures school wide.
Blended Support Model	**Hillcrest K-8**	Partner with school community to provide both district funding and site funded strategies to provide targeted support to classrooms
