Subject- Measles Vaccination Documentation Requirement

As part of Overbrook School for the Blind's proactive health and safety preparedness efforts, all staff and students will be required to provide documentation of their measles, mumps, and rubella (MMR) vaccination or other acceptable evidence of immunity, unless they are unable to receive the vaccine for a documented medical reason or have another exemption recognized under applicable law.

Individuals who cannot receive the vaccine for medical reasons must provide appropriate documentation from their healthcare provider.

If vaccination records are unavailable, individuals should contact their healthcare provider to determine whether a measles IgG antibody blood test (titer) or vaccination is appropriate.

All documentation must be submitted to OSB by [INSERT DEADLINE] through [INSERT SECURE SUBMISSION PROCESS].

This precaution is especially important because OSB serves students with complex medical needs and multiple disabilities. Our goal is to ensure we have accurate health information and can respond appropriately in the event of a measles exposure or outbreak.
