October 8th

PHOTO HIGHLIGHT

WHAT WE'RE LEARNING

Reading

We're diving into the world of folktales and learning how stories can teach us important lessons! Students are also practicing how to make predictions using clues from images before and during reading. They're learning to look closely, think critically, and use evidence to explain what they think might happen next!

Writing

We're learning how to write expository texts about the effects inventors and their inventions have had on our world! Students are researching inventors, using reliable sources to gather information, and practicing how to support their ideas with evidence from those sources.

Math

This week, we are diving into We're working on converting between customary units of measurement! Students are practicing how to convert between inches, feet, yards, and miles, as well as ounces, pounds, cups, pints, quarts, and gallons. They're using these conversion relationships to solve real-world measurement problems.

Science

This week, we are diving into the tiny building blocks of life–cells! Students will be introduced to plant and animal cells and explore the different parts that help each cell survive and do its job. We'll learn about important cell structures, compare plant and animal cells, and discover what makes them similar and different.

DRESS CODE

Uniforms and clear backpacks are mandatory at Ison Springs. Please reach out to their home room teacher with any questions or concerns you may have!

MARK YOUR CALENDAR
