

Hi,

Hello Staff, Teachers and Principals at Norman Rockwell. The letter I am writing right now goes out to you all: thank you. To all of you: Welcome back to school season, may all of you have a good year of success and stuff such as teaching kids fun and exciting things. And congrats on the new school building: it looks really cool. Job well done.

Now I am going into the meat and bones as to why I am writing this letter out. Here goes nothing but:

First off, for those who know me and don't know me. My name is Jake Singer. Nice to meet you all. The reason why I am writing this is to say thank you for letting me be part of this project which is the new school replacing the old one.

Which all started last year in April when it just was a dirt field with no job trailers or heavy equipment. Then it all came alive which was the starting of the job with a wood chipper from Sun Belt to a 4ZOD backhoe and a 3ZOD Excavator to start the job out with and clearing and the creating of the haul roads with a D3GLGP dozer plus all of the equipment from on dirt to follow.

Then the job trailers rented out to Lydig to trucking and hauling and grubbing and dirt hauling by Silver Streak trucking and Lloyd Enterprises. Then the big stuff which is the excavation of the building pad to pipe laying to import of sand and rock to export of dirt, asphalt, concrete to the forming of the building with electric, bricks, plumbing, drainage, sewer, utilities, and more. Until now which was sidewalk, roadwork, construction which is done to grubbing of bushes and trees to asphalt and concrete pouring to complete demo of the school which included abatement of the school due to asbestos then full demo of the school which feature a full crew of people. To a rented skid steer owned by Herc rentals to equipment owned by Ascendent LLC which is 490, 470, and a 360, excavators owned by Ascendent LLC. Switching now to a storm vault which is being put together right now to pipe laying to dirt hauling, the creation of the parking lot/ play area to opening of the school which happened on Monday. Which all of the kids enjoyed a lot of it and what not. Enjoy the year and good luck to you all at what you all do.

I know I wrote a little too much but this is my way of saying thank you for everything including the tour of the new school. And whoever gets to read this first I hope you like it cause it came from me and no one else. And please don't forget to pass this around to all of the teachers, staff, and principals that work here cause it would mean a lot to me.

From, Jake Singer
