Making a Big Difference at Williamson Elementary

Williamson Elementary joined forces with LyondellBasell for a Campus Beautification Project on Saturday, October 10, bringing together students, employees, and community members to enhance the school grounds.

Working side by side, participants planted trees, installed benches, painted outdoor areas, and completed a variety of improvement projects across the campus. Together, their efforts created a more welcoming and attractive environment for students, staff, and families.

The project highlighted the power of community partnership and the pride Williamson students and employees have in their campus. The improvements made throughout the day will leave a lasting impact on the school community.

Through service, teamwork, and **Big Connections**, Williamson Elementary and its community partners are making **Big Differences** and demonstrating why Galena Park ISD is truly A Great Place to Be!
