SCHOOL DISTRICT OF PALM BEACH COUNTY

Mission Statement

The mission of the School District of Palm Beach County is to educate, affirm, and inspire each student in an equity-embedded school system.

Superintendent of Schools

Michael J. Burke

School Board Members

Matthew Jay Lane, Esq., District 1, Vice Chair

Virginia Savietto, District 2

Karen M. Brill, District 3, Board Chair

Erica Whitfield, District 4

Gloria Branch, District 5

Marcia Andrews, District 6

Edwin Ferguson, Esq., District 7

Deputy Superintendent and Chief of Schools

Jamie Wyatt

Chief of Staff

Jolande Morgan, Ph.D., J.D.

Chief of Performance Accountability

Adam Miller, Ph.D.

Non-Discrimination Statement

The School Board of Palm Beach County, Florida, prohibits discrimination in admission to or access to, or employment in its programs and activities, on the basis of race, color, national origin, sex or sexual orientation, marital status, age, religion, disability, genetic information, gender identity or expression, or any other characteristic prohibited by law. The School Board also provides equal access to the Boy Scouts and other designated youth groups.

The School District of Palm Beach County offers the following career and technical programs, including career academies wherein students may earn industry certification, visit the [Programs of Study](#) page for more information as well as a list of classes.

Lack of English language skills will not be a barrier to admission and participation. The District may assess each student's ability to benefit from specific programs through placement tests and counseling, and, if necessary, will provide services or referrals to better prepare students for successful participation.

SCHOOL DISTRICT OF PALM BEACH COUNTY

MESSAGE FROM THE SUPERINTENDENT

Dear Families,

As Superintendent of the "A" rated School District of Palm Beach County, I am proud to present more than 330 choice and career programs for the 2027-2028 school year. Our goal is to empower every student with a roadmap to a successful career, tailored to their unique passions and long-term aspirations.

Our theme this year is "Power Your Future." Your child may set their sights on a top-tier university, getting a competitive edge through our accelerated coursework. Other students feel a calling to proudly serve in the military, building character and leadership through our JROTC programs. We also have students ready to jump directly into a high-demand workforce, getting a real head start through our pre-apprenticeship and apprenticeship pathways. Whatever the goal, our diverse program options spark opportunity and get students excited about what they can accomplish.

We offer an expansive array of educational choices, including immersive Dual Language programs, world-class arts instruction, advanced STEM disciplines, and rigorous college-level coursework. By seamlessly pairing challenging academics with hands-on technical training, our students have the unique opportunity to earn more than 100 industry-recognized credentials before graduation.

These extraordinary learning environments are made possible by the unwavering support of our community. Thanks to voter-approved referendums and ongoing partnerships with local business leaders we are able to bring real-world experiences directly to our students and classrooms.

From hands-on collaborative projects to mentorships, students build vital professional skills and deepen their industry knowledge starting as early as elementary school, expanding through middle school, and culminating in highly specialized high school pathways.

I encourage you and your family to explore this guide together to discover your ideal fit. Our dedicated choice and career team is always here to support your journey and answer your questions. Please don't hesitate to reach out to them at choice@palmbeachschools.org or 561-434-8755.

We look forward to partnering with you as we power your student's future together!

Thank you,

Michael J. Burke, Superintendent
School District of Palm Beach County

An A-Rated School District
An Equal Opportunity Education Provider and Employer

The School District of Palm Beach County is an educational and working environment, where both students and staff are unimpeded by bias or discrimination. Individuals of all backgrounds and experiences are embraced, affirmed, and inspired. Each and every one will succeed and flourish.

The School District of Palm Beach County will take ownership for students' academic mastery, emotional intelligence, and social-emotional needs by creating environments where students, families, staff, and communities will develop agency and voice.

A joy of learning is fostered in each student and a positive vision for their future is nurtured. Each student's cultural heritage is valued and their physical, emotional, academic, and social needs are met.

APPLICATION SUBMISSION & DEADLINE DATES

Discover What Inspires Your Child

From Pre-K through Grade 12, the School District of Palm Beach County's Choice and Career Academies give students the freedom to tailor their education to their passions. Our programs combine theme-based learning, hands-on experiences, and rigorous academics taught by specialized educators.

Whether your child dreams of mastering the arts, building the future in engineering, or connecting with the world through global studies, our academies provide the clear pathways and modern skills they need to thrive.

Application and Selection Process

Admission to a Choice program requires submitting an online application for the 2027–2028 school year. A separate application must be submitted for each student applying, including siblings interested in the same or different programs. Program assignments are determined through a lottery selection process, and assignment notifications for the 2027–2028 school year will be released to families between February 15 and February 26, 2027.

Prerequisites for Applying

1. **Residency:** Open to all full-time residents of Palm Beach County, future residents of Palm Beach County, and residents of neighboring counties! (See page 4 for eligibility and residency details.)
2. **SDPBC Student ID Number:** A valid Student ID is required to apply. If your child is new to the District, simply complete the "Request for Student ID" application on our portal first.
3. **Family Dashboard Account:** Set up your Family Dashboard using a valid email address. We recommend adding all children in your household to your account upfront so you are ready to apply whenever you choose.

Submitting Your Application

1. **Access the Portal:** Goto www.mypbchoiceapp.com. and log into your Family Dashboard (new users must create an account first).
2. **Select a Student:** Choose the child you are applying for from your dashboard.
3. **Complete in One Sitting:** Fill out all required fields and submit. Applications cannot be saved as drafts to finish later.
4. **Make Edits Early:** You can update or modify your submitted application anytime before the official deadline.
5. **Confirm Submission:** Your application is not complete until you receive a confirmation email containing your order number.

Support Resources

For step-by-step assistance, guides are available in English, Spanish, and French for the following topics:

Application Dates

Opens: October 8, 2026
Closes: December 4, 2026*

*DEADLINE FOR ALL PROGRAMS

Late applications will be accepted
February 15 to February 19 2027

POWER YOUR FUTURE IN A CHOICE OR CAREER ACADEMY PROGRAM

What are Choice Programs?

Choice Programs give your family the power to select an educational environment tailored to your child's unique strengths, passions, and learning style. Offered at elementary, middle, and high schools district-wide, these specialized, theme-based pathways combine rigorous academics with hands-on experience to ignite a lifelong passion for learning. Students can dive deep into targeted fields of study—including Artificial Intelligence, STEM, STEAM, Medical Sciences, Cybersecurity, Performing Arts, International Baccalaureate (IB), Computer Science, Engineering, Culinary Arts, Construction, Law, Fire Science, and Entrepreneurship—preparing them for success both in the classroom and beyond.

Career Academies: Planning for Success

Planning for Success Career Academies offer students a unique advantage, providing a direct pathway to high-skill careers by connecting classroom learning with real-world experience. Choosing the right academy is an important step in your student's journey, and we have excellent resources to help guide your decision. We encourage families to use the following tools for career and educational planning:

- **Florida's Career Planning Tools:** The Florida Department of Education (FLDOE) offers free online interest inventories and career planning resources. These tools are invaluable for helping students discover educational pathways that align with their natural talents and passions.
- **Your School Counselor:** Your student's school counselor is an essential partner in this process. We highly recommend scheduling an appointment to discuss program options, career goals, and the best educational choices for your child.

Pathways to High-Demand Careers

Our Career Academies are strategically designed to give students a competitive edge in South Florida's job market. We partner with local industry leaders to create programs that prepare students for high-skill, high-wage careers that are in demand right here in Palm Beach County.

By enrolling in one of these academies, your student can gain a head start on a rewarding and prosperous future. We offer specialized programs in several key sectors, including:

- Artificial Intelligence and Quantum Computing.
- Aviation, Aerospace & Engineering: Join a thriving local hub for technology and innovation.
- Information Technology: Prepare for a fast-paced career in software, networking, or cybersecurity.
- Healthcare & Medical Sciences: Enter a growing and vital field dedicated to wellness and saving lives.

Learn More

Ready to learn more about the exciting Choice and Career programs available in Palm Beach County? Here are the best resources to guide your journey:

- **Discover Program Details:** Visit the Department of Choice and Career Options website for comprehensive information on all our offerings. www.palmbeachschools.org/choice
- **See Our Schools in Action:** Get a feel for each school's unique environment by visiting their individual websites and attending their Open House events.
- **Apply Online:** When you're ready, you can explore your final options and submit your application through the official portal. www.mypbchoiceapp.com
- **Ask Questions:** Have a specific question? Our team is here to help! Email us at choice@palmbeachschools.org.

Understanding Your Program Options

To make the best decision for your family, it's important to know the two main types of programs available: **In-House** and **Choice**.

In-House Programs: For Zoned Students

Programs designated as "In-House" are reserved for students who live within that school's attendance boundaries. We highly encourage zoned students to apply for these programs offered at their zoned school, as it provides a higher priority for acceptance during the selection lottery. Additionally, applying for a unique Choice program that is offered at your own home school provides access to a specialized curriculum right in your neighborhood. However, continued enrollment depends on residency; if a student moves out of the school's zone, they can no longer participate in the In-House program.

Choice Programs: Open to All Students

"Choice" programs are open to every student residing within and outside of Palm Beach County. Choice programs give every student access to a wider range of educational opportunities. This allows students the opportunity to attend a different school to enroll in a specialized program that is not available at their zoned school or district.

Full Choice Schools: For Everyone

Full Choice Schools do not have traditional attendance boundaries, making them open to all interested district families. Because there are no geographic restrictions, every enrolled student is admitted through the central Choice application and lottery selection process.

All grade appropriate applicants may apply to the following full Choice schools: Morikami Park Elementary School, Northboro Elementary School, Poinciana Elementary School, S.D. Spady Elementary School, Bak Middle School of the Arts, Don Estridge High Tech Middle School, A.W. Dreyfoos School of the Arts, Suncoast High School, and Village Academy.

All grade appropriate applicants may also apply to the 6-8 Choice programs offered at the following K-8 schools: Addison Mizner School, Dwight D. Eisenhower K-8, Hidden Oaks K-8, North Grade K-8, Plumosa K-8, The South Olive School, The Conservatory School @ North Palm Beach, and Verde K-8.

ELIGIBILITY

Eligibility Guidelines - Residency

Your residency status is an essential part of the Choice application process. Choice and Career programs welcome full-time residents of Palm Beach County, as well as out-of-county applicants from neighboring counties and prospective families planning a future move to Palm Beach County.

To maintain application validity, applicants must accurately report their current or prospective residency status at the time of submission. Proof of residency or intent to establish residency within the district must be verified according to district standards prior to final enrollment and seat assignment.

Important: Have You Moved Recently?

The student's address in the school district's Student Information System (SIS) must be current and reflect the parent/guardian's primary address when you submit your application.

- If you have recently moved, you must update your address at your child's current school before you apply.
- Please Note: After the school updates your address, you must wait one business day before submitting your application. The new address syncs with the application portal overnight.
- For separated or divorced parents, the primary residential address listed in the Student Information System (SIS) will be the one used for the application.

Student ID Request - Residency Requirements

A valid Palm Beach County Student ID is required to submit a Choice program application. If your child will be new to the district, a Student ID number can be created for you. Before requesting a new ID, please be aware that your child has likely already been assigned one if they have ever been associated with: a district-operated school, a district charter school, or the district's home education office.

How to Request a New Student ID

Applications can be submitted at www.mypbchoiceapp.com. You must submit two verified proofs of residency, such as a current lease agreement, utility bills, or auto registration. Affidavits of Residency or Person Acting as Parent forms cannot be accepted as proof of residency for this specific request. Please allow up to 10 business days for your Student ID request to be processed. Incomplete applications will not be processed.

Eligibility Guidelines - Program Requirements

To be included in the Choice lottery, each applicant must first meet a set of eligibility requirements. Please review the following criteria carefully to ensure your student qualifies for their selected programs.

Age Requirements for Pre-K & Kindergarten:

To be eligible for the 2027-2028 school year, students must meet the following age requirements by September 1, 2027:

- Pre-K3: Must be 3 years old
- Pre-K4: Must be 4 years old
- Kindergarten: Must be 5 years old

Program Criteria:

Applicants must meet the specific eligibility requirements for their chosen program, as detailed on pages 11-13 of this guide.

GPA Calculations for Eligibility

Some programs have a minimum GPA requirement. To be eligible for the lottery, applicants must meet the minimum academic eligibility as outlined on pages 11-13. GPA is determined using the criteria below:

- Incoming 9th grade applicants: GPA is calculated using the unweighted average of all classes for the 4th quarter of grade 7 and the 1st & 2nd quarters of grade 8.
- Incoming 10th–12th grade applicants: GPA will be based on student's earned unweighted GPA at the time of eligibility determination.
- Report cards for any private school applicants on trimester schedules must be submitted by January 8, 2027. Parents/guardians are responsible for submitting report cards or transcripts in order for program eligibility to be determined.
- Report cards or grades for any student enrolled in Home Education or Virtual School must be submitted by January 8, 2027. Parents/guardians are responsible for submitting report cards or transcripts in order for program eligibility to be determined.
- Current charter school applicants may be required to submit their appropriate report cards if the school does not record student grades using the Student Information System (SIS).

For Programs with Special Requirements

In addition to a minimum GPA, some programs have program-specific criteria such as auditions, portfolios, or prerequisite courses. To be eligible for the lottery, an applicant must meet all requirements for their selected program.

- Prerequisites: If a program requires specific courses (such as math), you must provide proof of enrollment at the time of application and have the course completed by the school's deadline. Please contact the [Choice Coordinator](#) at the selected school for details.
- Auditions & Grade Levels: Be aware that programs requiring auditions may have higher score requirements for students entering higher grade levels.

AUDITIONS

Auditions

Acceptance into the following highly competitive arts programs is based on an audition to determine a student's eligibility. Only applicants who meet the audition requirements will be included in the Choice lottery for these schools. Students applying for a program with an academic criteria must meet both requirements to be eligible for the lottery.

The following schools and programs require an audition:

Bak Middle School of the Arts

Band, Communications, Dance, Keyboard/Piano, Orchestral Strings, Theatre, Visual Arts, & Vocal

The Conservatory School @ North Palm Beach

Band, Orchestral Strings, & Vocal

A.W. Dreyfoos School of the Arts

Band, Communications, Dance, Digital Arts & Photography, Keyboard/Piano, Strings, Theatre, Visual Arts, & Vocal

West Boca Raton Community High School

Band, Dance, Digital Media, Theatre (Acting & Musical), & Vocal

How Auditions Are Scheduled

The individual schools, not the district office, are responsible for scheduling auditions. After you submit your application, the school(s) you applied to will contact you directly to schedule the date and time. You will be notified of your audition details via the email address listed on your application. **Please monitor your email inbox (and spam folder) closely for this important communication.**

Audition Format & Instructions

Each school publishes its own detailed audition guidelines annually. These instructions will specify the format for the audition and what your student needs to prepare. All applicants must follow their chosen school's specific procedures. Please check the school's website for the most current information.

Bak Middle School of the Arts:

www.palmbeachschools.org/msoa

The Conservatory School @ North Palm Beach:

www.palmbeachschools.org/TheConservatorySchool

A.W. Dreyfoos School of the Arts:

www.palmbeachschools.org/DSOA

West Boca Raton Community High School:

www.palmbeachschools.org/WestBocaHighSchool

Audition Day: What to Expect

Audition day can be exciting and nerve-wracking. While specific requirements vary by discipline, here are the key points of what to generally expect.

Before You Go: Preparation is Key

- **Review Instructions:** Re-read details of the program's requirements for your specific art area.

Audition Day Logistics:

- **Punctuality:** Arriving on time for your audition is absolutely crucial. Arriving early is preferred as it allows you to relax, focus, and prepare fully, ensuring you can perform at your very best.
- **Check-In:** You will check in with staff, receive a number or other identifier, and be directed to a waiting area.
- **Attendance is Mandatory:** Students must be present for their scheduled audition.
- **The Waiting Game:** Expect to wait. Use this time to warm up (quietly!), and review your audition requirements.
- **IEP/504 Accommodations:** Parents must inform the school of any active IEP or 504 plan on or before the audition date.

Attendance and Make-Up Policy

Unless otherwise instructed by the school, all auditions are held in person. If your child is sick on their scheduled audition day, a make-up session may be possible under the following conditions:

- You must provide a doctor's note verifying the illness.
- The note must be submitted to the school within three (3) school days of the missed audition.
- A new date will only be scheduled if the school has additional audition times available. Make-up auditions are not guaranteed.

Audition Appeals Process

Parents/guardians who believe their child was not allowed an equitable opportunity to a Choice program during the audition or eligibility process as a result of a technical problem or inequity, may request an appeal.

An application for an appeal of Choice program eligibility must be submitted within five (5) school days of the audition date to the Department of Choice and Career Options by emailing choice@palmbeachschools.org. [Click here](#) to download the Choice Program Application for Appeal.

PROGRAM SELECTIONS

Choice Lottery

To ensure a fair and equitable assignment process for all families, the School District of Palm Beach County uses a specialized lottery system managed by a third-party software developer. This independent management guarantees that all assignments are valid and impartial. The automated lottery fills each program up to its allocated number of available seats. The process is designed to honor student preferences by first considering every applicant's first-choice program. Within the lottery for each program, the system also gives priority to applicants with specific, verified preferences, such as a sibling link, strand preference or military family status. (Please see page 7 for a complete list of application preferences). Only after all first-choice assignments have been attempted will the system consider an applicant's second choice for any remaining open seats. This method ensures that one student's second choice never takes priority over another student's first choice.

Program Selections

Your application allows you to select up to two Choice and/or In-House programs. How you rank your selections is important, so please review the following guidance to make the best decision for your child. Your first choice should always be the program your child is most interested in attending. The lottery will attempt to place your student in their first-choice program before considering any other option. Adding a second choice is optional but recommended as it may increase the likelihood of receiving a program assignment. Importantly, selecting a second choice does not affect or decrease your chances of being assigned to your first choice.

The lottery considers all first-choice applicants for a program before it considers any second-choice applicants for that same program. Your two selections can be any combination of programs and schools. For example, you can choose:

- Two different programs at the same school.
- The same type of program at two different schools.
- Two different programs at two different schools.

Understanding Seat Allocations

When planning your application, it's helpful to understand how program seats are determined. The largest number of available seats is for students entering the main school transition years: Kindergarten, 6th grade, and 9th grade. While the main entry grades offer the most openings, seat availability in other grade levels are limited and may not be available. The final number of available seats for the 2027–2028 lottery is subject to change based on fluctuating enrollment. Click [here](#) to view the schools/ programs that have limited seats or are not expecting seat openings for the 2027-2028 school year. We encourage you to apply, regardless of the seat availability so you can be considered should seats become available at a later time or if you are transferring from a school to continue with the same program.

LOTTERY SELECTION PROCESS

Lottery Selection

The lottery process is designed to be fair and transparent. This is an automated process used to assign students when a program has more first-choice applicants than available seats. The system uses a student's verified home address to determine their status as either in-boundary (zoned for the school), out-of-boundary, or out-of-district. Placement is then prioritized using an approved order of preferences, which are applied to each student's first-choice program selection. First choice applications are prioritized according to the following preference order: Principal's 20%, Employee, Military, IB/IB MYP Continuum, FAU Biomedical, K-8 Continuum, Priority SAC, Sibling, and Strand.

Students without a preference are included in the lottery after all students with the following preferences have been considered. We welcome students residing outside the county to apply for enrollment. While out-of-county applicants are warmly invited to join our school community, please note that priority placement and consideration are given to in-county residents first. Out-of-county applications will be considered once all qualified in-county students have been accommodated.

Principal's 20% preference is optional and allows a principal to select a limited number of applicants who meet a pre-established set of measurable criteria for their school's program. Students who receive this preference are then assigned seats through the random lottery. Please note that while all students selected for this preference must meet the criteria, not all students who meet the criteria will be chosen to receive it. The number of students assigned with this preference will not exceed 20% of the available out-of-boundary seats for that program and grade level.

Employee preference grants a higher priority in the lottery to an applicant whose parent or legal guardian is a full-time employee at the school to which the student is applying. To qualify, the program at that school must be listed as the student's first choice. While this preference increases the chance of an assignment, final placement is still contingent upon seat availability.

Military preference grants a higher priority in the Choice lottery to applicants whose parent or legal guardian is a full-time, active duty member of the United States Armed Forces. To qualify, the student must be registered as a dependent in the Defense Enrollment Eligibility Reporting System (DEERS). Parents must upload proof of eligibility such as: Department of Defense identification, official military orders showing current active duty status and proof of dependency, such as the student's military ID card, at the time of application. While this preference increases the likelihood of assignment, final placement is still contingent upon the number of available seats in the program.

IB/IB MYP Continuum grants students applying to continue the IB Middle Years Programme (MYP) from a designated partner middle school a priority assignment to the corresponding high school program. To be eligible, students must be on track to satisfactorily complete the 7th and 8th grade MYP levels and meet all high school IB eligibility requirements. This priority placement is contingent upon seat availability. The official IB MYP continuum pathways are: Carver MS to Atlantic HS, Conniston MS to Forest Hill HS, John F. Kennedy MS to Suncoast HS, and Pahokee MS to Pahokee HS.

FAU Biomedical is a program at Lake Worth High School that serves as a direct continuation for students from the biomedical programs at the middle school level. Applicants must meet all eligibility requirements and list Lake Worth High School as their first choice on the application.

K-8 Continuum preference provides students an opportunity to continue from 5th to 6th grade at a K-8 school. To be eligible, current students must submit a Choice application listing that school as their first choice. Priority for 6th-grade seats is given to students who either live in the school's attendance zone or have attended the school for both 4th and 5th grade. If there are enough seats for these priority applicants, they will all be assigned. If there are more priority applicants than available seats, a lottery will be conducted among this priority group to determine assignments. Please note that students must also meet any program-specific entry requirements, if applicable, to be eligible.

Priority SAC preference is available to students residing in designated attendance zones for six specific sites: Morikami Park, Northboro, Poinciana, and S.D. Spady elementary schools; Bak Middle School of the Arts; and Suncoast High School (IIT-related programs, only). In the lottery, this preference is applied after all higher-priority applicants have been assigned. Up to 50% of remaining elementary seats and 25% of remaining secondary seats may then be filled by students with this geographic preference.

Sibling Preference is provided to a student applying to a school where their sibling is currently enrolled in a Choice or in-house program and will be returning the following school year. To qualify, the school must be the applicant's first choice, and the currently enrolled sibling cannot be in an exiting grade (5th, 8th, or 12th).

It is important to note, however, that when siblings apply to the same Choice program together for the first time, they do not receive a lottery preference over other applicants. While you must still link them on each application to identify them as a family unit, this does not guarantee they will be assigned together, with the exception of twins or multiples, if space is available.

For those who qualify for the preference, it is applied after other higher-priority groups are assigned, with up to 50% of remaining elementary seats and 25% of remaining secondary seats being filled by these applicants.

Strand preference is available to students who wish to continue in a pathway program from a lower school level to the next. To be eligible, applicants for 6th grade must have completed grades 4-5 in the program; applicants for 9th grade must have completed grades 7-8 in the pathway program. This preference is applied in the lottery after all higher-priority groups have been assigned seats. Up to 25% of remaining seats in secondary school programs may be filled by students with this preference.

LOTTERY RESULTS

Lottery Results and Next Steps

The results of the Choice Lottery for the 2027–2028 school year will be released in February, between February 15-26, 2027. You can view your results by logging into your Family Dashboard. An email notification will also be sent to the account holders email address. Please note that results will not be provided over the phone.

*The scheduled release date for lottery results may change due to unforeseen events like school closures or district operational delays. We will publish any necessary updates to the release date on mypbchoiceapp.com.

Understanding Your Results & Making a Decision

After the lottery results are posted, your application will show one of the three possible outcomes listed below:

1. If Your Child Is Assigned to Their FIRST Choice

If your child is assigned a seat, you must accept or decline the offer by the deadline. If you do not respond, the seat will be automatically declined and offered to another student. This decision is final and cannot be reversed. If you decline the assignment, your child will attend their zoned school. You may decline a first-choice assignment to remain in the waitpool for your second choice, however, there is no guarantee of assignment into the 2nd choice and you will be unable to reclaim the first choice seat offer once declined.

2. If Your Child Is Assigned to Their SECOND Choice

If your child is assigned to their second-choice program, you have two options. You can accept the assignment, which will secure that seat but will also remove your child from the waitpool for their first choice. Alternatively, you can decline the assignment to remain in the waitpool for your first choice, though a future assignment to that program is not guaranteed. The decline cannot be reversed at a later time.

3. If Your Child Is Placed in a Waitpool

This status means your child's application was successfully included in the lottery, but they were not selected for an assignment because there were more eligible applicants than available seats. Your child has now been placed in the waitpool for their eligible program(s). You will be notified if a seat becomes available at a later date. The department does not provide updates on a student's position in the waitpool. A student's waitpool status is only for the current application cycle. If your child is not assigned a seat before the 2027–2028 school year begins, you must submit a new application for the 2028–2029 school year.

Ineligible Applications

When an applicant fails to meet the specified program eligibility requirements for any reason, that choice is excluded from the lottery selection process. Second choice selections will not replace an ineligible first choice selection..

Finalizing Your Enrollment

After you have accepted a seat assignment, wait for communication from the school's Choice Coordinator, who will contact you with next steps and provide all necessary paperwork. This will include program-specific documents including the Choice Program Contract, which confirms your agreement to meet the program's academic, attendance, and behavioral expectations. An acceptance of a seat assignment is an acknowledgement of this agreement. It is crucial that you complete, sign, and return all required documents directly to the school by the deadline they provide to finalize your child's enrollment and secure their spot.

Post-Lottery Assignments from Waitpool

If a student who was assigned a seat declines their spot for any reason, the opening will then be filled by an applicant from the program's waitpool. Assignments from the waitpool can occur at any time before the start of the 2027-2028 school year, at the discretion of the Department of Choice and Career Options.

Important: You will only be notified if your child is selected for an assignment from the waitpool. Any assignment will also be reflected on the Family Dashboard and an email notification will be sent. The department does not provide updates on a student's position in the waitpool.

LATE APPLICATIONS

Late Applications

If you missed the on-time deadline, a late application window will be available for students who have not yet submitted a Choice application for the 2027-2028 school year. The specific dates for this window can be found on p. 2 and will be posted on mypbchoiceapp.com. Late applications are not included in the initial lottery. Once submitted, each late application is reviewed for program eligibility. All eligible late applicants are then placed in the waitpool for their selected program(s). They will only be considered for an assignment after all on-time applicants in the waitpool have been accommodated. For programs requiring an audition, language assessment, or other special eligibility criteria, late applicants will only be invited to test or audition under very limited circumstances. This will only occur if the waitpool of all eligible on-time applicants has been exhausted, and there are still open seats in the program.

Newly Arriving Palm Beach County Families

We understand that moving is a complex process, but it is critical to note that the application windows for our highly selective Choice Programs are strictly enforced for all applicants. This policy is in place for several operational reasons:

- **Seat Availability:** Choice Programs have limited capacity. All available seats are typically filled via a random lottery process based on applications received by the on-time application date.
- **Audition Scheduling & Review:** Audition programs require substantial time for staff to schedule, conduct, and evaluate performances or portfolios. Adding applications after the official deadline disrupts the assessment timeline.
- **Administrative Processing:** The logistics of processing thousands of applications and coordinating the assignment lottery require a fixed submission timeline.

What This Means For You

If you moved to Palm Beach County after the application deadlines, your student should be registered in their assigned public school based on your new residential address.

You may still be able to pursue a transfer to a different school through Controlled Open Enrollment. Visit mypbchoiceapp.com to learn more about this process including deadlines and available schools.

We encourage you to visit the [District's Choice website](#) and prepare well in advance of the application windows for the following school year.

Key Considerations

Accepting a seat in a Choice program means agreeing to the following conditions for the entire school year:

- **Full-Time Participation:** Choice program students must participate on a full-time basis. If a student wishes to enroll in programs like Early Admission, or full-time Virtual School that prevent them from completing their required Choice coursework, they must exit the Choice program and return to their zoned school.
- **No Program Changes:** Once assigned to a program through the lottery, a student may not "switch" to a different Choice program at that same school without applying to that program.
- **Maintain Residency:** If your family moves and the change of address impacts your school boundary or county residency, this may affect your child's continued placement in the program.
- **Keep Your Address Updated:** If your address changes after you apply, you must update it immediately. Failure to do so may result in your application becoming ineligible or a future seat assignment being revoked.
- **Policy Updates:** Please be aware that School Board policies and Choice Department procedures may amend program contracts.

PROGRAM CONTINUATION

Program Continuation

Students assigned to a Choice Program do not need to reapply annually unless they are transitioning from elementary to middle school, or middle to high school.

Failure to comply with the terms of the signed Choice Program Contract or agreed-upon program expectations can affect a student's continued participation in the program. Students who do not meet the academic, attendance, or conduct standards may be placed on probation. Continued issues, particularly significant disciplinary referrals, can lead to the student being exited from the program.

In most cases, students are exited from a program at the end of a marking period. However, a student may be removed immediately if the situation involves a serious offense (defined as a Discipline Level 3 or 4), or upon the recommendation of a school-based committee if the probationary contract terms are not being met.

Program Continuation after a Change of Address

Once a student is assigned to a program, they must continue to meet all residency requirements. Moving to a new address can impact your child's continuation in their program.

- **In-House Programs (For Zoned Students Only):** In-house programs are reserved exclusively for students who live within the school's attendance boundary. A student may be permitted to remain at the school on a reassignment basis to continue in the program provided they meet the conditions outlined in 14(2)(1) in the Choice Program Procedures Manual.
- **Choice Programs (In-Boundary):** Assignment to a Choice program as an in-boundary applicant is based on the verified home address. A student's seat assignment will be revoked at any time if it is discovered that they do not reside at the in-boundary address, with limited exceptions as outlined in the Procedures Manual.
- **Choice Programs (Out of Boundary):** Students relocating to another address within Palm Beach County may continue in their Choice program as an out-of-boundary student.

Involuntary Exit Appeals

Parents/legal guardians, on behalf of the student, may appeal an involuntary exit decision from a Choice school or program as outlined, below. A request for an Appeal of Exit must be submitted in writing, using the appropriate form, [PBSD 2418 - Choice Appeals Application](#), within five (5) school days from the school's written notice of its decision to exit the student. The form is available on the school district website or you may request one by emailing choice@palmbeachschools.org.

Choice Transportation

It's important for families to understand that transportation for Choice programs is different from the busing for a student's zoned school. Choice transportation is provided for students in grades K-12, but only for those who live within the school's designated **Choice Transportation Zone**.

You can find the official Transportation Zone maps for participating schools on the Department of Choice and Career Options website to verify your eligibility. Since transportation is not provided for students living outside of the designated Choice Transportation Zone, families in these areas must arrange for their own transportation.

- **Centralized Bus Stops:** Bus stops for Choice schools are limited and serve a wider geographic area. As a result, your child's assigned stop may be significantly farther from your home than you are used to and may not be within walking distance.
- **No New Stops Created:** Students are assigned to the closest existing bus stop based on their home address. New bus stops will not be created for Choice students.
- **Parent Responsibility:** It is the parent's or guardian's responsibility to ensure their child gets safely to and from the assigned bus stop each day.
- **Arts School Students:** For specific information regarding transportation to Bak Middle School of the Arts and A.W. Dreyfoos School of the Arts, please contact those schools directly.

ELEMENTARY AND MIDDLE SCHOOL ELIGIBILITY CRITERIA

Elementary School Eligibility Criteria

Pre–K and Elementary School Programs—All Other Programs

All students are eligible for Pre–K and Elementary Choice programs as there are no eligibility criteria with the exception of the International Spanish Academy* and Spanish Dual Language programs*.

International Spanish Academy: For grades 2–5, each school may determine a student’s eligibility by using an oral interview along with a Spanish reading inventory or other available Spanish content assessments.

Spanish Dual Language: For grades 2–5, each school may determine a student’s eligibility for the Dual Language program by using an oral interview along with a Spanish reading inventory or other available Spanish content assessments.

*Newly arrived Spanish-speaking English Language Learners (ELL) should be automatically admitted into the program at their zoned school. Please contact your school for immediate assistance with program admission.

Middle School Eligibility Criteria

Middle school programs do not have eligibility criteria with the exception of the following school programs. Students must meet the published eligibility in order to be considered eligible for the lottery:

Bak Middle School of the Arts- Eligible audition score required.
Communications, Dance, Band, Keyboard/Piano, Orchestral/Strings, Vocal, Theatre, Visual Arts

Conniston Community Middle School- Eligible score on Spanish assessment required.
Spanish Dual Language

H.L. Watkins Middle- Minimum state assessment score of 3 and essay.
Biomedical Sciences (FAU College of Medicine)

L.C. Swain Middle- Eligible score on Spanish assessment required.
Spanish Dual Language

Lake Worth Middle- Minimum state assessment score of 3 and essay.
Biomedical Sciences (FAU College of Medicine)

Lake Worth Middle School- Eligible score on Spanish assessment required.
Spanish Dual Language

North Grade K-8- Eligible score on Spanish assessment required.
Global Language Academy

Okeetchee Middle- Eligible score on Spanish assessment required.
International Spanish Academy (ISA)

Palm Springs Community Middle- Eligible score on Spanish assessment required.
International Spanish Academy (ISA)

Roosevelt Community Middle- Minimum state assessment score of 3 and essay.
Biomedical Sciences (FAU College of Medicine)

The Conservatory School @ North Palm Beach- Eligible audition score required.
Band, Orchestral Strings, & Vocal

HIGH SCHOOL ELIGIBILITY CRITERIA

Eligibility Requirements

In order to be considered in the lottery selection process, applicants must meet specific eligibility criteria. The criteria listed below is for entering 9th graders. Additional criteria may be recommended for ascending grade levels in certain programs. The GPA for 9th grade applicants is calculated by averaging the unweighted GPA of the last marking period of 7th grade and the first two marking periods of 8th grade. The unweighted cumulative GPA will be used to determine eligibility for 10th-12th grade applicants. Trimester grades will be considered based on their trimester GPA calculations.

Programs Without Eligibility Requirements

- 3DE by Junior Achievement
- Air Conditioning, Refrigeration & Heating Technology
- Air Force JROTC
- Army JROTC
- Automotive Service Technology
- Civil Air Patrol
- Coast Guard JROTC
- Commercial Digital Photography
- Construction
- Culinary Arts
- Drafting & Design (Suncoast only)
- Fashion Design
- Game, Simulation, & Animation Programming
- Horticulture
- Marine Corps JROTC
- Navy JROTC
- Sports Media & Broadcasting
- Sports Nutrition & Hospitality
- Sports Performance
- Television & Film Production Technology
- Tourism, Hospitality & Resort Management

Programs Requiring a Minimum 2.0 GPA (Additional prerequisites required for some programs)

- Artificial Intelligence (AI) Academy
- Band (eligible audition score is also required for A.W. Dreyfoos School of the Arts, & West Boca Raton Community High)
- Band/Music Industry
- Communication Arts (eligible audition score is also required for A.W. Dreyfoos School of the Arts)
- Dance (eligible audition score is also required for A.W. Dreyfoos School of the Arts, & West Boca Raton Community High)
- Digital Arts & Photography (eligible audition score is also required for A.W. Dreyfoos School of the Arts)
- Digital Media (eligible audition score is also required for West Boca Raton Community High)
- Drafting & Design
- Information Technology- Esports
- Keyboard/Piano (eligible audition score is also required for A.W. Dreyfoos School of the Arts)
- Mechatronics
- Strings (eligible audition score is also required for A.W. Dreyfoos School of the Arts)
- Theatre (eligible audition score is also required for A.W. Dreyfoos School of the Arts, & West Boca Raton Community High)
- Visual Arts (eligible audition score is also required for A.W. Dreyfoos School of the Arts)
- Vocal (eligible audition score is also required for A.W. Dreyfoos School of the Arts, & West Boca Raton Community High)
- Visual Arts (Digital Media & Photography)

HIGH SCHOOL ELIGIBILITY CRITERIA

Determining Eligibility

The Choice Coordinators at each individual school are responsible for determining eligibility on all applications for programs that require a minimum GPA, auditions, language assessments, and any other prerequisites. It is the parent's responsibility to ensure that any required report cards or transcript are submitted by the posted deadline dates. For programs requiring math courses as part of the eligibility criteria, verification of enrollment is required at the time of application. The coordinator at each school will establish the deadlines to provide documentation of course completion.

Programs Requiring a Minimum 2.5 GPA

- Aerospace Science (BASA)
- Agritechnology
- American History & Law
- Artificial Intelligence (AI) and Quantum Computing
- Aviation & Aerospace Technology
- Computer Technology (Village Academy only)
- Criminal Justice (Background checks will be conducted)
- Cybersecurity
- Digital Design
- Digital Media Technology- Scholastic Esports
- Early Childhood Teacher Education
- Engineering & Technology (PLTW)
- Entrepreneurship
- Environmental Sciences & Field Research
- Finance
- Fine Arts
- Fire Science
- Global Business & Entrepreneurship
- Information Technology
- International Spanish Academy (ISA)
- Law Related and Legal Studies
- Marketing
- Marketing & Entrepreneurship
- Quantum AI Nexus Academy (Algebra I also required)
- Sports Management & Recreation

Programs Requiring a Minimum 3.0 GPA (Additional prerequisites required for some programs)

- Biomedical Engineering & Health Sciences
- Biomedical Sciences (Algebra I Honors is also required)*
- Biotechnology
- Computer Science (Algebra I Honors & Geometry Honors are also required for Suncoast High School only. Minimum 3.0 in each course required)*
- Computer Technology (Algebra I Honors & Geometry Honors are also required)*
- Equine/Pre-Veterinary (Algebra 1 or Algebra 1 Honors are also required)*
- International Baccalaureate (IB)
 - **9th:** Algebra 1 or Algebra 1 honors are also required*
 - **10th:** Algebra I, Geometry, Biology or higher, and French I or Spanish I or higher.
 - **11th:** Algebra I, Geometry, Algebra II, Biology, Chemistry, and two years of French or Spanish.
 - **12th:** Must be transferring from an IB program and be on track for all IB assessments
- Mathematics, Science & Engineering (MSE) (Algebra 1 Honors, Algebra 2 Honors, & Geometry Honors are also required with a minimum 3.0 in each course)*
- Medical Sciences
 - **Sports Medical Sciences @ Boynton Beach High School** requires a 2.75 GPA
- Science, Technology, Engineering & Math (STEM)

*Verification of enrollment in the required course(s) is required at time of application submission. Proof of completion of the required courses must be submitted via email to the school's Choice Coordinator by the requested deadline date. Please see the program descriptions for dates.

CHOICE & IN-HOUSE ELEMENTARY SCHOOL PROGRAMS (PRE-K-5)

Acreage Pines Elementary

- Service Learning and Leadership Academy (p. 28)

Allamanda Elementary

- Health and Wellness (p. 24)

Banyan Creek Elementary

- Technology (p. 27)

Beacon Cove Intermediate (3-5)

- Arts (Visual, Performing, & Communications) (p. 21)

Berkshire Elementary

PRE-K & ELEMENTARY SCHOOL PROGRAMS

It's Never too Early to Explore

There are **66** Choice and In-House programs within **64** elementary schools for your child to start exploring their interests. Elementary programs offer innovative, integrated curriculum that emphasize the development of the whole student. There are no entry requirements for elementary school programs.

66 Programs / 64 Elementary schools

Arts (Visual, Performing, and Communications)

The elementary comprehensive arts program provides opportunities to develop and showcase performers. Children who enjoy creative expression through 2D and 3D art, television production, dance, strings, band, piano, percussion, vocal music, theatre, and the written word will flourish artistically and academically in our performing, visual, and communication arts programs. This program helps develop and nurture talents so students can realize their full potential and become shining stars. Self-discipline, teamwork, and personal confidence foster success in the classroom, on the stage, and in life.

Cambridge Academy

The Cambridge Academy program prepares students for their future by helping them develop an informed curiosity and lasting passion for learning. Students will develop skills to become confident, responsible, reflective, innovative, and engaged. Students build a deep understanding of their subject and develop higher order thinking skills so that they can apply what they have learned to assure readiness to tackle the demands of tomorrow and to help shape a better world for the future. The Cambridge Primary Academy program exposes students to a broad and balanced curriculum that focuses on developing knowledge and skills in all subjects while providing an excellent foundation for the next stage of education.

Children's Orchestra and Performing Arts Project

The Children's Orchestra & Performing Arts Project (COPA) is a comprehensive music program offering intense and extended music instruction for students in kindergarten through the fifth grade. Students begin in the primary grades learning to play the violin and progress musically adding viola, cello, bass, and a full orchestra theory with opportunities in the upper grades to play wind, strings, or percussion instruments. All students receive music theory instruction and the upper grades have the opportunity for extensive after school practice for individuals and sectionals. In addition to instrumental music, students are afforded instruction and performance opportunities in dance and musical theatre. Professional music staff and teaching artists provide high quality, daily instruction. The Conservatory School @ North Palm Beach offers the first El Sistema Music model program in the district and is a member of the National Alliance of El Sistema Schools.

Digital Citizenship

In Grades K–5, students approach learning through an inquiry framework that infuses information technology including robotics, coding, and engineering. This program meets the needs of students with a talent and passion for science and technology and who want to be change agents for an equitable society. Through the integration of project-based learning, social and service learning projects, Village Academy students become active global citizens.

E3—Energy, Environment, and Engineering

The E3 Energy, Environment, and Engineering provides access to a natural scrub area where students learn about indigenous plants and animals as well as exotics and invasive species. Based on the LEED green building designation, it's a natural fit for a program based in Energy, Environment Science, and Engineering or otherwise known as the E3 curriculum. The first trimester curriculum is focused on energy, the second trimester is focused on environmental science, and the third trimester concentrates on engineering. Galaxy Elementary has a Wonderment Center where students discover through multimedia scientific wall stations, which features an interactive museum atmosphere.

Available School Options

- The South Olive School

In-House: None Available

Engineering and Technology Exploration

The Engineering & Technology Exploration program is designed to introduce elementary students to the exciting world of engineering, technology, and problem-solving. Through hands-on activities, lessons, and creative projects, students will explore fundamental concepts in science, math, and design while learning how engineers and technologists shape the world around us. This program encourages curiosity, creativity, and a love for learning by showing students how everyday objects are designed and built. It fosters problem-solving abilities and builds confidence as students explore in a fun and supportive environment.

PRE-K & ELEMENTARY SCHOOL PROGRAMS

Environmental and Animal Science

Frontier Elementary's Environmental and Animal Science curriculum includes the study of life, physical, earth, space, and environmental science. Outdoor science labs incorporate hands on science inquiry along with the latest research technology. Students participate in a school-yard garden and each grade level conducts scientific investigations into a particular small animal habitat. In addition to the academic skills developed through gardening, students also learn about the nutritional value of foods and participate in cooking.

Environmental Science and Field Research

This program offers students the opportunity to become Young Environmental Stewards (YES!). Students will explore and evaluate challenges and concerns related to their environment: gopher tortoise preservation, ecosystem restoration, recycling, sustainable gardening providing healthy food options, aquatic life protection, and energy conservation. This hands-on, high-interest, experiential learning builds student awareness of their responsibility of protecting and caring for the environment.

Fine Arts

The Fine Arts Program provides opportunities to develop and showcase the arts. The program is designed to spark imagination and technical curiosity and offer students an immersive journey through creative expression and modern digital skills. Learners explore dynamic disciplines across visual and performing arts—including painting, music, and theater—while gaining practical experience in digital communications, media creation, and interactive technology. By integrating artistic storytelling with tech-driven exploration, it fosters confident communicators, creative problem-solvers, and well-rounded students prepared to thrive both on stage, in the classroom, and beyond.

Health and Science Exploration

The Health and Science Exploration Program offers an innovative, integrated curriculum designed to provide basic skills in laboratory sciences and health science related careers. This comprehensive program combines a rigorous academic curriculum in the areas of Health, Medicine, and Wellness. This is an exploratory program for students in grades K-5 with a high interest in basic medical and health sciences. Special topics include health and wellness, basic anatomy and physiology, medical terminology, prevention of disease, and general healthcare. Each trimester covers a distinct focus, helping students engage with a broad spectrum of subjects within medicine, health science, and overall wellness. This allows students to explore career options early on, develop essential skills, and nurture their interest in health and science.

Health and Wellness

The Health and Wellness program embraces the education of the whole child. We encourage all students to grow and learn with a sound mind and healthy body. All students set academic and wellness goals. They participate in daily activities and receive weekly lessons in the Wellness lab. Clubs and aftercare activities focus on a healthy lifestyle, including sports clubs, mindfulness, music, friendship and inclusion activities. Parent involvement and family nights incorporate health and wellness for the whole family. Our health and wellness program helps each child develop life-long habits of health and wellness through physical, nutritional, and mental health initiatives that enhance their academic performance and personal experience at school.

International Baccalaureate Primary Years Programme

The International Baccalaureate (IB) Primary Years Programme (IBPYP) curricular framework focuses on the development of the whole child in a learning environment that encourages independence, academic challenges, inquiry, creativity, and responsible citizenship. This Choice program offers a comprehensive, inquiry-based approach to teaching and learning in an internationally designed concept-based model with guidelines on student learning styles, methodologies and assessment strategies. The PYP is a combination of the best research and practices from international schools and includes the study of world languages and cultures to enhance the international perspective.

International Spanish Academy

International Spanish Academies (ISA) are Dual Language Programs that have signed a collaborative agreement with the Ministry of Education of Spain. This K-12 educational program is carried out within the framework of cooperative activities organized by the Office of Education of Spain in the U.S. and each participating district. The language, history, and culture of Spanish speaking countries are a major focus of the curriculum. This program is a Spanish two-way immersion program and allows students to develop proficiency in two languages by receiving classroom instruction in English as well as Spanish. **For grades 2-5, each school may determine a student's eligibility by using an oral interview along with a Spanish reading inventory or other available Spanish content assessments. Newly arrived Spanish-speaking ELLs should be automatically admitted into the program at their zoned school. Please contact your school for immediate assistance with program admission.**

Marine Life Science

The Marine Life Science Choice Program offers students a unique, hands-on approach to science through exploration of marine ecosystems and aquatic life. Students learn in a specialized marine science lab featuring multiple saltwater aquariums, touch tanks, fish, sharks, anemones, and other marine organisms. Through engaging, standards-aligned lessons, students investigate topics such as adaptations, food chains, ecosystems, invasive species, conservation, and environmental stewardship. The program encourages curiosity, collaboration, problem-solving, and real-world scientific thinking while building a strong foundation for future science learning. Our goal is to inspire students to become thoughtful scientists and responsible stewards of the environment while developing a lifelong appreciation for marine life and the natural world.

Math, Science, and Technology

The Math, Science, and Technology Program uses innovative strategies to motivate the inquisitive child. The students utilize science, math, and technology laboratories, as well as other unique interactive learning environments in their daily work. Students make mathematical and physical discoveries using models they can touch and manipulate in real life experiences. Using an integrated approach to curriculum with science and mathematics as a basis for instruction, students will learn problem solving and logical thinking through the principles studied in the classroom.

Montessori

The Montessori philosophy proposes that every child is born with the strong desire to learn. The program uses a unique method of education that emphasizes the development of the whole child. The Montessori classroom stresses active learning with attractive, academically sequential materials that allow children to develop at their own pace. This prepared environment offers a non-competitive, cooperative learning atmosphere in multi-age classrooms or looping models. Students receive a solid foundation in the basic subjects through high-quality, stimulating teaching strategies focused on creative thinking and community-minded problem solving.

Multimedia and Television Production

Students will learn the fundamentals of basic television production, researching skills, video recording, scripting, lighting, and equipment set up. Students will also demonstrate an understanding of video editing skills and control room operations. The content and skills learned will contribute to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, technical skills, and knowledge of the Arts, A/V Technology, and Communication paths.

Orchestral Strings

The purpose of the Orchestral Strings Program is to provide instruction in the development of beginning through advanced level skills in a classroom and ensemble setting through the performance and refinement of a variety of orchestral literature. The arts are infused throughout the academic curriculum. Extra rehearsal and performance time may be required beyond the school day. Students will perform at various community events.

Science (Environmental), Technology, Engineering, and Math

Pine Jog Elementary School has partnered with Florida Atlantic University and Pine Jog Environmental Education Center to create the first Leadership in Energy and Environmental Design (LEED) Certified Green Elementary School in Florida. The focus is on environmental science, technology, engineering, arts, and math. Students have the opportunity to engage in hands-on learning experiences as they explore and discover the wonders of native vegetation and wildlife on the 150 acres of natural Florida habitat. This hands-on, investigative approach requires the student to become an active participant in the learning process. Nature studies offer many opportunities to involve art throughout this unique integrated curriculum.

Science, Technology, Engineering, and Math (STEM)

Science, Technology, Engineering, and Math (STEM) topics are integrated into all aspects of learning including reading, writing, and social studies. All students are engaged in hands-on science and math activities in their classrooms, which may be supported by the following resource labs: Science Lab, Math Lab, Lego Robotics Lab, and the Planetarium Classroom (Poinciana Elementary). Through hands-on experiences building Lego robots, students develop skills in problem solving, critical thinking, and teamwork. Students participate in a variety of out of school field experiences connected to the curriculum.

Science, Technology, Engineering, Arts, and Mathematics (STEAM)

The Science, Technology, Engineering, Arts, and Mathematics (STEAM) program provides motivating, highly engaging, hands-on instruction in science, technology, engineering, arts, and math. This program fosters innovation through scientific method, art design and creative problem solving and schools may use the **Engineering is Elementary** program during the fine arts wheel. Each grade level develops year-long STEAM projects including hydroponic, butterfly and vegetable gardens, recycling, life cycle studies of flora and fauna, mural design, and use of the latest technology to include a 3D printer. Extracurricular clubs may include chess, SECME, art, music, dance, Lego bricks, fitness, and cooking.

PRE-K & ELEMENTARY SCHOOL PROGRAMS

Service Learning & Leadership Academy

At Acreage Pines, leadership is more than a lesson—it's a way of life. Through our Friday Leadership Lessons, students explore practical strategies that build confidence, communication, and collaboration. These skills are reinforced daily as leadership strategies are infused throughout the school day, helping students grow into problem-solvers and decision-makers. Our House System fosters teamwork, school spirit, and a sense of belonging, while our strong focus on community service gives children the opportunity to make a real impact beyond the classroom. Together, these experiences empower students to develop character, responsibility, and the confidence to lead both now and in the future.

Spanish Dual Language

Spanish Dual Language Programs, also known as "Two-Way Immersion" programs, allow students to develop proficiency in two languages by receiving content area instruction in both English and Spanish. Students, regardless of native language proficiency, are provided with ample exposure to both languages, allowing them to achieve academic excellence while becoming bilingual and biliterate. The program also emphasizes cultural awareness and sensitivity. **For grades 2–5, each school may determine a student's eligibility for the Dual Language program by using an oral interview along with a Spanish reading inventory or other available Spanish content assessments. Newly arrived Spanish-speaking ELLs should be automatically admitted into the program at their zoned school. Please contact your school for immediate assistance with program admission.**

Technology

Meeting the technological challenges of the future will require highly specialized skills for our young people. The Technology Choice program offers unique experiences and opportunities using technology as an educational tool that integrates core academic requirements into a challenging and dynamic curriculum. Computers and other technologies enhance and assist in the learning process and create a highly motivating atmosphere in the school. Students also learn to integrate the use of various technologies into their academic projects, presentations, learning activities, and assessments. This is a program of interest for many students.

MIDDLE SCHOOL PROGRAMS

Preparing for College and Career Pathways

There are **143** Choice and In-House programs within **43** middle schools that prepare students for both college and career pathways. Students participate in specific programs of study that lead to high school Career and Technical Education academies or Choice programs. Students will also have the opportunity to earn a Technology Industry Certification before entering high school.

143 Programs / 43 Middle Schools

Unleash Your Creativity: Arts and Communications Programs

Creative and artistic opportunities are the main attractions in the Arts programs. All students enrolled in these programs are dedicated to the study of the arts. Intensive study and time is devoted to each student's chosen arts major, while exploring other artistic disciplines in the classroom, in the studio, and on stage. These programs challenge students to achieve a high standard of artistic professionalism and academic excellence. Students are exposed to professional artists, field trips, and artistic performances as part of the program.

Arts programs are listed in this booklet by program area:

Band (p. 31)
Communication Arts (p. 32)
Dance (p. 32)
Keyboard/Piano (p. 34)
Literary & Fine Arts (pg. 35)
Orchestral Strings (p. 36)
Theatre (p. 41)
Visual Arts (p. 41)
Vocal (p. 41)

Explore these programs by visiting each school's website:

Biomedical Health Informatics

Students in the Biomedical Health Informatics Academy can earn industry certification within the technology field and certifications within the medical and business fields. This dual-track academy offers an innovative, integrated learning environment designed to provide students with an academic foundation for medical and biomedical sciences, information technology, business, electronic records, data management and design, and health information programs.

Biomedical Sciences (FAU College of Medicine)

The goal of the Healthcare Careers Outreach Program (HCOP), with the Charles E. Schmidt College of Medicine at Florida Atlantic University, is to foster student interest in Medicine and prepare students to be college and medical school ready. Participating students will be mentored by FAU College of Medicine students during activities held on the FAU campus. Activities include field trips to the FAU Simulation Center, Anatomy Lab, dissections, college roadshow workshops and research experiences. Parent or guardian participation is expected. The FAU HCOP program supports underrepresented and underserved minorities in South Florida on their path towards Medicine. In the School District of Palm Beach County all medical courses provide local honors credit. Clinical rotations are conducted at area hospitals and other healthcare and research facilities. Students successfully completing the 4 accelerated high school honors courses in middle school receive 4 high school credits and a program completion certificate in Biomedical Sciences. In addition, students sit for industry certification exams in healthcare and may receive articulated college credits at several post-secondary institutions. **All students applying to this program must meet the following two part eligibility criteria: A minimum of 3 or above on state assessments and eligible score on an internal assessment which includes an essay.**

Cambridge Academy

The Cambridge Academy provides students with the opportunity to pursue a rigorous program of study based on an internationally standardized curriculum. Cambridge academies differ from a traditional setting because of the instructional model, in which the curriculum is delivered to the learner in an integrated cross content and spiraled method. The goal of the Cambridge program is to build a sound academic foundation for all learners that will enable them to succeed in any high school program including AICE, Advanced Placement, International Baccalaureate, Honors, and regular education programs. Students will develop skills to be confident, responsible, reflective, innovative, and engaged learners. Students applying to the Cambridge Academy should possess successful schooling habits, habits of mind, enjoy learning and working with like-minded students, and be able and willing to direct their own learning.

Communication Arts

The Communication Arts curriculum includes: creative writing, journalism, newspaper and yearbook publications, radio and television broadcast, video production, marketing/advertising/public relations, digital media, and speech and debate.

***Qualifying audition score is required for Bak Middle School of the Arts.**

Dance

The Dance program is designed to develop technically proficient dancers who are versatile, thoughtful, and inquisitive. Students will have the opportunity to study and gain competitive skills in the fine art field of dance. Students will develop fundamental skills and technique in ballet, a variety of modern and jazz styles, and cultural dances while exploring movement terminology, musicality, choreographic concepts, and dance theory.

***Qualifying audition score is required for Bak Middle School of the Arts.**

Digital Graphic Design

The Digital Graphic Design program is a unique sequence of courses that enables students to identify, analyze and create various forms of graphic art. The curriculum is highly project-based and designed to prepare students for high school graphic design academies. Students are introduced to the latest versions of graphic design software used in the professional industry, including: Adobe Photoshop CS6, Adobe Illustrator CS6, and InDesign CS6. A wide array of tools are used to produce logos, labels, icons, advertising graphics, brochures, posters, presentation boards, photo enhancements, and SLR/Digital Photography.

Digital Video Design

The Digital Video Design program enables students the opportunity to explore and create various hands-on video and audio animated digital projects. Students work in state of the art iMac Labs using a variety of software tools to create project-based assignments tailored to sequential curriculum. Student design projects include: video slide shows, video trademark logos, animated videos, video commercials with voice-overs, music videos, Garage Band music beats, mobile web site videos, iPad friendly videos, smartphone ready videos, and mobile web sites. The curriculum prepares students for high school programs that feature career related pathways in Audio/Video Technology, Film, and Telecommunications.

Environmental Science and Technology

Students in the Environmental Science and Technology program will use various technologies as educational tools to develop environmental science-based academic projects, presentations, learning activities, and assessments. Students will use technology to explore, evaluate, and communicate environmental issues regarding conservation, restoration, preservation, and sustainability by applying this knowledge through gopher tortoise preservation, ecosystem restoration, recycling, sustainable gardening, aquatic life protection, and energy conservation. Eighth grade students may earn an Industry Certification in Technology. This Environmental Science and Technology program is offered as a continuation of the K-5 Environmental Science and Field Research program or for students interested in Environmental Science at the middle grades level.

MIDDLE SCHOOL PROGRAMS

Environmental Science

Environmental Science includes instruction in biology, chemistry, physics, geosciences, climatology, statistics, and mathematical modeling. There is a focus on the application of biological, chemical, and physical principles to the study of the physical environment and the solution of environmental problems, including subjects such as abating or controlling environmental pollution and degradation. It also focuses on the interaction between human society and the natural environment, and natural resource management.

Fine Arts

The Fine Arts program offers both meaningful and enriching opportunities in the areas of Chorus, Handbells, Band, Music–Keyboard/Piano, Drama, Art, TV Production, Speech & Debate, and Journalism. Students will develop and hone artistic strengths and transfer those skill to all other academic areas. The Fine Arts program will also serve as a retention program in that it will provide local resident students the opportunity to remain at their home middle school as opposed to attending other choice schools with similar programs.

International Baccalaureate Middle Years Programme

The International Baccalaureate Middle Years Programme (IBMYP) provides a framework of academic challenges and life skills appropriate to this stage of adolescence. The IBMYP offers a holistic approach that emphasizes critical thinking skills, global citizenship, and intercultural awareness, as well as traditional school subjects. The curriculum consists of eight subject groups explored through six global contexts: identities and relationships, orientations in space and time, personal and cultural identity, globalization and sustainability, fairness and development, and scientific and technical innovation. The academic subjects required for grades 6–8 of the IBMYP are: Language and Literature (English), Language Acquisition (World Language), Mathematics, Sciences, Individuals and Societies (Social Studies), Arts, Technology (Design), and Physical and Health Education.

**Science, Technology, Engineering, and Math (STEM) learning experiences are infused throughout the curriculum for Carver Community Middle. Technology rich, project based learning will be emphasized. IB units of inquiry will incorporate rigorous STEM curriculum as well as global contexts that are supported by student centered learning opportunities.*

Keyboard/Piano

Students in the Keyboard/Piano program will master note reading, understanding basic theory and its application at the keyboard/piano. Students will learn to develop good practice habits, play with a steady rhythm, good technique and posture. Students in this program will receive instruction in solfege, sight reading and ear training. Students have performed in important venues such as Steinway, and Merkin Hall, NY City, and in State Conferences such as MTNA, CMS and FMEA.

Leadership Academy (African American/Afro Centric Studies)

The Roosevelt Leadership Academy will intensely focus on the development of the full human potential of our young leaders. This STEAM (Science, Technology, Engineering, Arts, and Math) based/focused program offers unique educational opportunities and experiences using an Afro-Centric delivery of curriculum and infusing African American Studies across the core academic areas. Computers and other technologies will be used to enhance and assist the learning process and to create highly motivated students. Parents and guardians are encouraged to be involved with their child's learning experiences throughout the school year. Students will have the opportunity to interact with community leaders and explore the contributions of African and African Americans at the local, state, national, and international levels.

MIDDLE SCHOOL PROGRAMS

Literary and Fine Arts

The students will intensely focus on a chosen art area. The program challenges students to achieve a high standard of artistic professionalism, literary understanding and analysis, and academic excellence in their artistic concentration. Exposure to professional artists, performances, and the opportunity to travel internationally and domestically will provide students with insight into historical works of art while providing inspiration for their own creative endeavors.

Students may apply to one (or two) of the following Literary and Fine Arts programs:

Literary and Fine Arts—Instrumental

Literary and Fine Arts—Theatre

Literary and Fine Arts—Visual

Literary and Fine Arts—Vocal

Literary and Fine Arts—Writing & Literature

Multimedia and Television Production

Students will learn the fundamentals of journalism, story-boarding, scripting, lighting, and equipment set up. Students will demonstrate an understanding of control room operations, such as super-imposing, operating internal key sources, chroma key applications, and altering key colors. Students will also demonstrate an understanding of video editing skills by learning hands-on with professional non-linear editing software. This program will be journalism intensive the first year so that students have a strong writing background, before moving to skills regarding camera systems, operations, sound, graphics, editing, lighting and staging during the second year. The final year will involve hands on, team oriented experiences with production as the goal. This strong writing and production program will support rigor in academic Language Arts courses and link to the content of two IT courses.

Multimedia Journalism

The Multimedia Journalism Choice Program gives students the opportunity to become confident communicators, creative storytellers, and responsible digital citizens through hands-on, real-world media experiences. Students develop skills in journalism, writing, interviewing, photography, graphic design, podcasting, digital media, and publication while learning the importance of accuracy, ethics, and news literacy. As students advance through the program, they apply these skills to authentic projects such as the school newspaper, yearbook, podcasts, and other multimedia productions. The program encourages creativity, collaboration, critical thinking, and leadership while giving students a voice and preparing them to communicate effectively in an ever-changing media world.

Orchestral Strings

The Orchestral Strings program is a unique program providing an instrumental music education designed specifically for dedicated young orchestral musicians.

***Qualifying audition score is required for Bak Middle School of the Arts and the Conservatory School @ North Palm Beach.**

Performing Arts

The Performing Arts program provides unique opportunities for the committed and talented student who has a serious interest in the Performing Arts. In-depth study of the Arts develops conceptual and technical skills of artistic expression and brings to fruition the student's individual interpretations of the world. Students can apply to participate in these extensive highly specialized courses in: Dance, Theater (acting and musical), Music—Band, and Music—Chorus. Auditions will be held for placement, post-lottery.

Performing Arts & Marching Band

Discover the power, passion, and precision of marching band! This program offers middle school students an immersive, hands-on foundation in performing arts, with a primary focus on the power and precision of marching band. Students learn instrumental technique, music theory, and field pageantry while building artistic confidence, discipline, and lifelong teamwork skills.

Pre-Agriscience

Step into the world of agricultural science and discover how technology, nature, and innovation intersect! Aligned with Florida's middle school agricultural education standards, this introductory academy provides students with a foundational understanding of modern agricultural systems, environmental stewardship, plant and animal science, and leadership development through FFA integration. Students will maintain the school's vegetable garden and facilitate annual vegetable tastings in our cafeteria. Through hands-on investigations and practical applications, students explore sustainable resource practices, agricultural mechanics, and high-demand career pathways, establishing a strong foundation for future study in high-school agrotechnology programs and Florida's vital agricultural industry.

Pre-Artificial Intelligence (AI)

The Pre-AI program prepares students for success in an AI-based society by building technical skills and higher-order reasoning. Students explore five big ideas in AI: perception, representation and reasoning, machine learning, human-AI interaction, and societal impact. Through hands-on lab activities, students learn how computers use sensors to see and hear, build models, and discover how machines learn from data. They analyze images with computer vision tools and organize data using spreadsheets. Students also study internet safety, the responsible and ethical use of AI, and the history of the field. They finish the program with a personalized career and academic plan for high school and beyond.

MIDDLE SCHOOL PROGRAMS

Pre-Biotechnology

The Pre-Biotechnology Academy is designed to enable middle school students to explore the connections between science content areas and the rapidly growing biotechnology industry. At the same time, students develop the knowledge base to ensure successful articulation to high school science academies. The program provides, through a series of science electives, an understanding of the basic principles which form the foundation of biotechnology. Topics that are explored include genetics, DNA structure and function, utilization of basic biotechnology tools and techniques, forensics, bioethics, and genetic engineering. Students also survey the major career area opportunities related to the field of biotechnology.

Pre-Business/Information Technology

The Pre-Business /Information Technology (IT) Academy provides an educational setting dedicated to the development of academic, social, and creative skills with a goal of creating responsible citizens. Students are introduced to the field of business and related careers through the use of information technology. Students participate in the co-curricular student organization, Future Business Leaders of America (FBLA), where they may earn certificates and awards for their student portfolios as well as earn an Internet Business Associate Certificate in their final year at the Pre-Business IT Academy.

Pre-Criminal Justice

This exploratory course provides a comprehensive overview of how laws are made, enforced, and interpreted. Students explore the core components of the criminal justice system—law enforcement, the judicial process, and corrections—through interactive projects, mock trials, and hands-on laboratory activities. Emphasis is placed on digital literacy, constitutional rights, community relations, and introductory forensic techniques. This program prepares students to enter the Criminal Justice program in high school.

Pre-Culinary

The Pre-Culinary program is a three year preparatory program for the middle school student designed to encourage and prepare students for entry into high school culinary arts career academies or related fields of study. This program also provides middle school students with consumer level skills, begin the exploration of the culinary field, as well as related occupations. Areas of study include nutrition, safety and sanitation, culinary terminology, small and large equipment usage, and food preparation needed in the workforce. Opportunities to learn front and back-of-the-house operations through entrepreneurship activities are also built into the curriculum.

Pre-Engineering

The Pre-Engineering curriculum provides a project-based, hands-on learning approach that is exciting and fun for students in grades 6–8. Classroom experiences relate technology to students' daily lives. It also promotes communication and collaboration by emphasizing a team approach in the instructional units. The approach utilizes the strengths of each team member to accomplish the goals of the project, while offering students learning challenges at all ability levels.

Pre-Engineering—Gateway to Technology

Gateway to Technology is a cutting-edge program that addresses the interest and energy of middle school students, while incorporating national standards in math, science and technology. The Gateway to Technology program is "activity oriented" to show students how technology is used in engineering to solve everyday problems. The instructional units excite and motivate students to use their imagination and teach them to be creative and innovative, while gaining the skills they need to develop, produce and use products and services.

Pre-Finance

The Pre-Finance program is designed to give middle school students an opportunity to learn about and prepare for college or careers in business and finance. Emphasis is placed on a college preparatory curriculum that is directly linked to the financial industry. Students participate in mentorships and career shadowing experiences that link the resources of business, economics, and finance to the students' education. Specialized courses in finance are required.

Pre-Information Technology

The Pre-Information Technology (IT) Program offers an innovative, integrated learning environment focused on computers, technology, and communications. Students who participate in a Pre-Information Technology program acquire foundational knowledge and skills in basic programming techniques, software and web development, and emerging digital technologies. Emphasis is placed on a college preparatory curriculum directly linked to career pathways in the IT career cluster.

**Village Academy is a unique public-school model that is designed to provide a continuous and nurturing educational experience for students in a small school continuum environment. Students who participate in this Pre-Information Technology Academy will learn about digital information technology, basic computer programming techniques, and foundations of software and web development. The program provides students with opportunities to build foundational knowledge and skills suitable for pursuing higher-level IT programs.*

Pre-Law

The Pre-Law Academy provides middle school students with a fundamental understanding of the American legal system from a variety of perspectives, both civil and criminal. Students participating in this program will foster an appreciation of essential historical information concerning the development of the United States legal system and the working structure of the government. Moreover, students will gain an understanding of procedural issues in the courts, specific concepts of law, the distinctive characteristics of criminal law and procedures, the roles of various legal professionals, and the effect of legal ethics on the practice of law. This program also provides a functional appreciation for students with regard to the impact of the legal system on their lives and chosen future career endeavors.

MIDDLE SCHOOL PROGRAMS

Pre-Medical Sciences

The Pre-Medical Sciences program is a three-year preparatory honors program for the middle school student that emphasizes science, math, and language skills while preparing students to be highly competitive in the medical field. The courses offered include Orientation to Health Occupations, Exploration of Health Science Professions & Career Planning, and Medical Skills and Services. In the School District of Palm Beach County all, medical courses provide local honors credit.

Pre-Teacher Education

The Pre-Teacher Academy is a three year preparatory program beginning in 6th grade for the middle school student interested in any career that deals with children. Career possibilities such as child psychologist, social worker, pediatrician, pediatric nurse, teacher, children's author, child nutritionist, and pediatric dentist are discussed. Topics of study include child development, early childhood education, childhood nutrition, health and safety, communication, interpersonal skills, leadership, career development, child abuse and neglect, fetal alcohol syndrome, and pre-natal/infant brain development. Opportunities to receive certifications in infant/child CPR, First Aid, AED, and baby-sitting are offered.

Pre-Veterinary

The Pre-Veterinary program is a three-year preparatory program for the middle school student that emphasizes science and math skills while preparing students to pursue veterinary medicine and/or animal sciences at the high school level. Equine topics are introduced while students complete related field work and participate in labs with guest speakers from the field of veterinary and equine science. Students in this program take career courses combined with the highest level math and science courses, culminating with high school level courses including: Algebra 1 Honors, Geometry Honors, and Earth Space Science Honors.

Robotics and Aviation (STEM)

Students in the Robotics and Aviation program follow an intensive three-year high school preparatory program which emphasizes robotics, aviation, engineering skills, and will prepare them to be highly competitive in the Engineering, Aviation and Aerospace fields. The program is designed to encourage problem solving, decision making, verbal and written communication, and computer literacy. It prepares students for entry into high school robotics, aviation, and engineering programs or related fields of study.

Science, Technology, Engineering, & Math (STEM)

Using state-of-the-art technology, and through a partnership with the Amazon Future Engineers Program, the STEM program at LSMS will engage students in personalized and game-like learning experiences to acquire the coding fundamentals needed to master basic literacy in the digital age. Students are engaged in a fully project-based learning model that leverages 21st Century learning that emphasizes learning, literacy, and life skills through the 4Cs - critical thinking and problem solving, communication, collaboration, and creativity and innovation. Topics covered include, but are not limited to, digital citizenship, coding languages, timed coding exercises, computer and civil engineering activities, and robotics. Students also participate in the First Lego League competitions that provide a fun, competitive, and real-world application of the science, technology, engineering, and mathematics skills acquired through STEM education.

Science, Technology, Engineering, Arts, & Math (STEAM)

The Arts are integrated into Science, Technology, Engineering, and Math (STEM) learning experiences in the STEAM program at Congress Middle School. Students engage in a rigorous curriculum designed to stimulate artistic creativity through technology rich, project-based learning while simultaneously promoting academic achievement through the study of STEM disciplines. Students also develop an understanding of the significance of the arts as they acquire knowledge and understanding of the core academic STEM subjects and standards. STEAM students can design and produce objects using 3-D printers in an interdisciplinary STEAM Innovation Lab or design, program, and test robots using advanced robotics software. They can participate in the Piano/Keyboarding Composition Lab, learn to play orchestral instruments, or learn different styles of Dance in a Dance studio and have the opportunity to participate in other arts classes.

SciQuest

The SciQuest Academy is a challenging, project-based curriculum that explores the world of science with hands-on activities and stimulating technologies. Students investigate real world science using inquiry based activities to build a deeper understanding of scientific concepts such as physics, chemistry, biology, Earth science, space, and computer technology. This three year program is intended to develop and prepare science enriched students for the future. Students can expect to research, design, model and complete projects that are applicable to the real world as they take their ideas through the complete inquiry or engineering process.

Spanish Dual Language

The Spanish Dual Language program offers a continuation for students who have been in a Spanish Dual Language program at the elementary level or who have a high level of Spanish language proficiency. Highly motivated students are engaged in a challenging academic environment in which three of their core academic courses are taught in Spanish.

Eligibility: Eligible score on a Spanish assessment.

MIDDLE SCHOOL PROGRAMS

Sports Management

The Academy of Sports Management offers students a three-year exploration of the sports industry, covering key areas like marketing, finance, media, graphic design, sports medicine, and leadership. The program emphasizes life skills such as teamwork, problem-solving, creativity, and responsibility, with technology integrated throughout. It combines required and elective courses tailored to student interests. Students will attend sporting events and complete a project planning a sports activity. High expectations for leadership, academics, and behavior position participants as campus leaders. The program introduces various career pathways including sports agent, marketing specialist, event planner, athletic director, sports journalist, and data analyst.

Technology

Students in the Technology program use technology as an educational tool that integrates various technologies into academic projects, presentations, learning activities, and assessments. Eighth grade students can earn a technology industry certification.

Theatre

The Theatre program is designed to cultivate the next generation of creative storytellers. This program provides students with a comprehensive foundation in professional theatre. Participants explore both performance and technical disciplines, gaining practical experience in acting, theatrical design, playwriting, directing, and stage management.

***Qualifying audition score is required for Bak Middle School of the Arts.**

Visual Arts

Designed to foster creative confidence and technical mastery, the Visual Arts program helps students discover their unique creative voice. Students explore a wide variety of media, learn creative problem-solving, and bring their unique ideas to life in a supportive, inspiring environment.

***Eligibility: Qualifying audition score required for Bak Middle School of the Arts.**

Vocal

This program provides a music education designed for young vocalists. Students will learn about proper vocal technique and performing in a choir through topics such as ear training (sight singing), diction, proper breath support, music history, music theory, expression, and performance musicianship and etiquette. Students will be taught with a classical style approach, and will also have the opportunity to learn about and be exposed to many styles of music.

***Qualifying audition score is required for Bak Middle School of the Arts and the Conservatory School @ North Palm Beach.**

HIGH SCHOOL PROGRAMS

Graduate Both College and Career Ready

There are **170** Choice and In-House programs within **26** high schools that provide many opportunities for students to follow the career pathway of their choice. Students graduate both college and career ready and can earn industry certifications that lead to high skill, high wage, and high demand occupations. See page 82 for industry certification information.

170 Programs / 26 High Schools

3DE by Junior Achievement

The 3DE by Junior Achievement program delivers rigorous interdisciplinary courses through authentic business experiences to accelerate students' knowledge gains as well as building the skills, perspectives and portfolio to differentiate themselves in the highly competitive post-secondary and career environments. The fully immersive experience provides deep exposure to a variety of companies and industries through Case Challenges in addition to interaction with career professionals through classroom advisors, coaches, and career exposure. **There are no eligibility criteria for students applying to this program.**

Agritechnology

The Agritechnology Program offers a sequence of courses that provide challenging academic content standards aligned with immediately applicable knowledge and skills. This series of courses will prepare students for immediate employment or a basis for advance study of Agriculture, Food and Natural Resources career clusters. The courses include technical skill proficiency and competency-based applied learning that are interdependent on academic knowledge, higher-order reasoning/problem-solving skills, work attitudes, general employability skills, specialized equipment skills, occupation-specific skills, and mastery of all aspects of the Agriculture, Food and Natural Resources career cluster. The content includes but is not limited to instruction in animal and plant production, agribusiness, agricultural mechanics, employability skills, basic science, communications, and human-relations skills. **All students applying to this program must meet the following eligibility criteria: 2.5 GPA.**

Available School Options

Choice

- Royal Palm Beach Community High

Air Force JROTC

The Air Force Junior Reserve Officers Training Corps (AFJROTC) program is designed to build better citizens, strengthen character, develop leadership, and acquaint cadets with the aerospace age and careers in military and civilian aviation. The curriculum is centered on the nature of flight, space exploration and related sciences, such as weather and space technology. Upon completion, students are under no obligation to enlist in the Armed Forces. Successful completion of the AFJROTC program allows entry into the Armed Forces up to two pay grades higher than other enlistees without AFJROTC experience. **All cadets are required to adhere to the U.S. Air Force standards including authorized grooming regulations as part of the uniform requirement. There are no eligibility criteria required for students applying to this program.**

Available School Options

Choice

- Spanish River Community High
- In-House:** None available

American History and Law

The American History and Law program promotes the study and appreciation of American history and the legal framework that has helped to define it. It is a program designed to promote knowledge and appreciation of American political, cultural, and economic foundations. This program prepares students in legal theory and practical application of the law to help individuals in our society. Classes foster the importance of economic and geographical relationships and increase awareness of the richness and diversity in American society. Students are exposed to primary and secondary documents through various publications and traveling exhibits, as well as lectures by eminent historians. **All students applying to this program must meet the following eligibility criteria: 2.5 GPA.**

HIGH SCHOOL PROGRAMS

Army JROTC

The Army Junior Reserve Officers Training Corps (AJROTC) program provides developmental courses in leadership theory, drill and ceremonies, hygiene and first aid, map reading, land navigation, techniques of oral communication, marksmanship and safety, staff function and procedures, service JROTC opportunities, and physical readiness. Students who select this option will enroll in the AJROTC classes each year as well as a full academic schedule. Upon completion, students are under no obligation to enlist in the Armed Forces. Successful completion of the AJROTC program allows entry into the Armed Forces up to two pay grades higher than other enlistees without AJROTC experience. **All cadets are required to adhere to the U.S. Army standards including authorized grooming regulations as part of the uniform requirement. There are no eligibility criteria required for students applying to this program.**

Artificial Intelligence (AI) Academy

Unlock the power of AI and learn to build the future. This academy takes you beyond the theory, providing a deep understanding of how AI perceives the world, processes information, and learns through Machine Learning. Through an accelerated curriculum including hands-on programming, you will gain practical skills in designing, building, and evaluating real-world AI applications, grounding your work in the essential principles of responsible and ethical innovation, and you will have the opportunity to earn industry certifications that solidify your expertise and accelerate your professional journey. **All students applying to this program must meet the following eligibility criteria: 2.0 GPA.**

Artificial Intelligence (AI) and Quantum Computing

This hands-on program introduces students to the cutting-edge world of Artificial Intelligence and Machine Learning, preparing them for high-demand, AI-driven careers. Built around the Five Big Ideas in AI—Perception, Representation & Reasoning, Machine Learning, Human-AI Interaction, and Societal Impact—the curriculum blends rigorous academic standards with real-world technical skills. Students gain practical experience curating data sets, coding algorithms, performing advanced statistical calculations, and deploying functional AI models. Beyond core programming, the course emphasizes ethical decision-making and responsible system design, equipping graduates with the problem-solving skills and technical mastery needed to thrive as innovative power-users in a technology-centered society. **All students applying to this program must meet the following eligibility criteria: 2.5 GPA**

Automotive Service Technology

The Automotive Service Technology program provides hands-on training in a fully integrated, computerized, state-of-the-art facility. This academy prepares students for employment and/or specialized training in the automotive industry including automotive lubrication, automotive brake system, automobile suspension and steering, automotive electrical/electronic system, and automotive engine performance. This program focuses on understanding and demonstration of the following elements of the automotive industry: planning, management, finance, technical and product skills, as well as the underlying principles of technology, labor issues, community issues and health, safety and environmental issues. **There are no eligibility criteria required for students applying to this program.**

Biomedical Engineering & Health Sciences

The Biomedical Engineering & Health Sciences Academy is a challenging, career-focused program for students interested in medical and health science careers, offering concentrations in Allied Health, Biomedical Engineering, and Dentistry. The curriculum, taught by industry-certified instructors, balances academic excellence with hands-on technical skills, which are further developed through clinical internships with local healthcare facilities. Successful completion of this four-year course of study prepares students for college-level medical sciences or entry-level healthcare employment and allows them to earn valuable industry certifications such as Certified EKG Technician (CET), Certified Patient Care Technician Assistant (CPCT/A), and the Biotechnology Aptitude and Competency Exam (BACE). **All students applying to this program must meet the following eligibility criteria: 3.0 GPA.**

HIGH SCHOOL PROGRAMS

Biomedical Sciences

The Biomedical Sciences program, in collaboration with local universities and medical schools, is designed to increase interest in Medicine and Biomedical Research and to mentor and prepare students to compete at the highest levels of college and post-graduate studies. Accelerated Biomedical Sciences students may enroll in Dual Enrollment courses with Palm Beach State College, and/or take AICE and AP courses, and sit for several industry certification exams in healthcare. The goal of this accelerated honors program is for students to acquire multiple college credits during high school and apply to the 6–7 year B.S./M.D. or B.A./M.D. programs at several medical schools throughout the United States upon high school graduation. **All students applying to this program must meet the following eligibility criteria: 3.0 GPA and completion of Algebra I Honors.**

***Verification of completion of Algebra I Honors must be submitted by May 21, 2027 to tanya.powell@palmbeachschools.org.**

Biotechnology

The Biotechnology program is a program delivered in a state-of-the-art facility that offers students the opportunity to prepare for the career path and the challenges of college. The students have a wide variety of experiences that may include the opportunity to “gown-up” and work in a clean room. Students experiment with plants while studying the science of hydroponics in the school’s hydroponics greenhouses. Technology is infused throughout the curriculum. These academies have established partnerships with biotech companies in the area. **All students applying to this program must meet the following eligibility criteria: 3.0 GPA.**

Civil Air Patrol

The Civil Air Patrol Program (CAP) is designed to build a student's character by instilling skills as a leader. Cadets will be exposed to concepts in the Aerospace industry and career exploration tied to a STEM curriculum. The program consists of three missions: Aerospace Education, Cadet Program, and Emergency Services. Upon completion of the CAP program, cadets are eligible to earn up to two pay grades higher than others should they choose to further their career in the Armed Forces. **There are no eligibility criteria required for students applying to this program.**

Coast Guard JROTC

Chart your course toward leadership, character development, and academic success with the U.S. Coast Guard Junior Reserve Officers’ Training Corps. Built on the core values of Honor, Respect, and Devotion to Duty, this premier high school program combines maritime science, navigation, physical fitness, and hands-on community service to build confident leaders prepared for college, civilian careers, or military service. Cadets enjoy unique opportunities to participate in drill teams, color guard, and leadership competitions—all with no military obligation. Open to all motivated students looking to gain practical life skills, earn high school credit, and make lifelong friendships. **There are no eligibility criteria required for students applying to this program.**

Commercial Digital Photography

This Commercial Digital Photography Program features in-depth skills in all aspects of digital photography, including the details of equipment and software use. The secondary courses in this pathway allow students to follow the more artistic aspects of photography and application. Industry certification in Adobe Photoshop is offered in this course of study. The Commercial Digital Photography pathway prepares students for career opportunities in the many fields of photography, including advertising, aerial, commercial, crime scene, photojournalism, wedding, wildlife and many more specialized areas of photography. **There are no eligibility criteria required for students applying to this program.**

Communication Arts

The Communication Arts program is the first of its kind to exist anywhere in the United States. It offers a multi-strand curriculum that promotes proficiency in speech and debate, print and broadcast journalism, yearbook, creative writing, graphic design, digital video/film production, and television production. The program prepares students to be leaders in the various fields of Communications through participation in performances, publications and productions. **All students applying to this program must meet the following eligibility criteria: 2.0 GPA and a qualifying audition score. This program is listed as "Communications" on the Choice Application.**

Computer Science

The Computer Science program is designed to meet the needs of highly motivated students who wish to major in one of the various fields within the Computer Science industry. The program strives to provide college bound students with rigorous learning opportunities in an environment rich in quality instruction, hand-on experiences, and course offerings. Students acquire a well-rounded foundation in the basic aspects of computing to include but not limited to programming, database programming, and algorithmic design, as well as mathematics and science. **All students applying to this program must meet the following eligibility criteria: 3.0 GPA.**

***Suncoast High School only: A GPA of 3.0 or higher in each of the required math courses: Algebra I Honors and Geometry Honors. Grades earned during each marking period will be used to calculate the GPA for each math course. Verification of enrollment in the required math courses is required at time of application submission. Proof of completion of the required courses must be submitted via email by June 3, 2027 to deverie.yazar@palmbeachschools.org.**

Computer Technology

The Computer Technology program prepares goal-oriented students interested in any field of study for a future rigorous collegiate atmosphere. It provides highly competitive honors and Advanced Placement courses with a strength in computer education.

All students applying to this program must meet the following eligibility criteria: 3.0 GPA, Algebra 1 Honors*.

***John I. Leonard High School only: Proof of completion of Algebra I Honors must be submitted via email by May 21, 2027 to daisy.lord@palmbeachschools.org.**

HIGH SCHOOL PROGRAMS

Construction

The Construction Academy provides students with the foundational and technical skills required for postsecondary education and employment in the building construction industry. The program focuses on broad, transferable skills and a comprehensive understanding of all aspects of the field. The curriculum stresses essential industry elements, including architecture, engineering, planning, management, finance, and production skills. Students also explore critical topics such as worksite safety, technology integration, labor, and environmental standards. Training is delivered through a combination of classroom instruction, hands-on lab work, and direct experience on actual job sites in partnership with local construction companies. Students will have the opportunity to earn valuable industry certifications through NCCER and participate in professional internships. **There are no eligibility criteria required for students applying to these programs.**

Criminal Justice

The Criminal Justice program offers a sequence of courses that provide coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills. Students are prepared for further education and careers in all five pathways within the Law, Public Safety and Security Career Cluster through project-based, hands-on learning activities. Practical skills and field exercises include: courtroom demeanor and testifying, report writing, identification, collection and preservation of evidence, interviewing techniques, radio communications, patrol techniques, traffic direction, traffic crash investigations, defensive tactics, CPR, First Aid, and fingerprinting. College credit opportunities are an available benefit for eligible Criminal Justice Academy students through articulation agreements with local colleges and universities.

All students applying to this program must meet the following eligibility criteria: 2.5 GPA. Applicants must pass a background check for continuation in the program.

*Students participating in the program at Jupiter High School will receive an educational experience that includes an emphasis on the study of law. In addition to the Criminal Justice curriculum, students may take a sequence of courses to include Law Studies, Legal Systems & Concepts, International Law, Constitutional Law, and Comprehensive Law.

Culinary Arts

The Culinary Arts program curriculum provides the opportunity for students to train for a variety of careers in the field of food service and preparation. Academic and technical studies are integrated, emphasizing and building proficiency in food production and cooking, cost control, nutrition and sanitation, and workplace safety. Practical work experience stresses sanitation and safety and includes quantity cooking, baking, menu development, and food preparation. School site restaurants and catering opportunities will further enhance front and back-of-the-house skills, as well as restaurant management. **There are no eligibility criteria required for students applying for this program.**

Cybersecurity

The Cybersecurity Academy is supported by The Frederick A. DeLuca Foundation and the Education Foundation of Palm Beach County. This program offers high school students an opportunity to begin a pathway to prepare for in demand careers stressing personal accountability and the importance of taking proactive steps to enhance cybersecurity at work and at home. A sequence of courses provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and cybersecurity-related careers. The curriculum includes, but is not limited to, foundational knowledge and skills in computer and network security, security vulnerabilities, attack mechanisms and techniques, intrusion detection and prevention, risk identification, incidence response, access control, and recovery. Specialized courses focus on database security, planning and analysis, software, and web security. Students who graduate from this program earn skills as an Information Security Analyst and can earn a variety of different related industry certifications required by potential future employers. **All students applying to this program must meet the following eligibility criteria: 2.5 GPA.**

Digital Design

The Digital Design Academy offers an innovative, integrated learning environment focused on computers, technology, and communications. The program provides the students with training and skills necessary for a career in or related to Digital Design. Students gain a basic knowledge of software, then increase their knowledge of design through multiple levels of courses which lead to Industry Certification. As a profession, digital design offers tremendous opportunities in a range of industries such as gaming animation, web design, television and video production, social media, marketing and art and creative professions. **All students applying to this program must meet the following eligibility criteria: 2.5 GPA and a qualifying audition score.**

HIGH SCHOOL PROGRAMS

Digital Media

The Digital Media program is designed to provide practical experiences in both graphic/digital design and photography. Students become proficient in, and refine, their use of concepts, terminology, techniques, and applications of digital imaging to create original work. Students produce digital still and/or animated images through the single or combined use of computers, digital cameras, digital video cameras, scanners, photo editing software, drawing and painting software, graphic tablets, printers, new media, and emerging technologies. Students' increasingly independent approach to their work promotes risk-taking in the completion of conceptually based, self-directed work. **All students applying to this program must meet the following eligibility criteria: 2.0 GPA. Students applying for West Boca Raton Community High must also receive a qualifying audition score.**

Digital Media Technology - Scholastic Esports

The Digital Media Technology - Scholastic Esports program focuses on Digital Media, Gaming Development, and Entrepreneurship. Students can earn up to five industry certifications through the four-year Career and Technical Education (CTE) pathway. An emphasis is placed on innovative and immersive career-oriented education aligning with industry standards, integrated through the Network of Academic Scholastic Esports Federation (NASEF). The rising interest in Esports among students motivates us to infuse Esports components into daily teaching, aligning with the district's comprehensive Esports ecosystem. The program goal is to nurture students' passion for careers in Esports and enable them to access scholarships for higher education. Esports equips students with essential academic and technical skills crucial for future success in STEM and non-STEM postsecondary learning pathways and careers. **All students applying to this program must meet the following eligibility criteria: 2.5 GPA.**

Drafting and Design

The Drafting and Design program offers two distinct strands designed to challenge students with laboratory and classroom based curriculum which promotes the use of critical thinking and computer technology skills. The content and activities in these programs include entrepreneurship, safety, and leadership skills. In the Drafting courses of study, students employ the use of AutoCAD Computer Aided Design software for architectural, mechanical, and 3D projects. In the Communications Technology Strand, the study of the processes, uses, and technical skills found in visual technologies (both conventional and digital procedures), multimedia productions, computer animation and graphics, web page design, electronic media, and emerging technologies will be incorporated. This program focuses on the understanding and demonstration of the technological tools, machines, instruments, materials, processes and systems in business and industry. **All students applying to this program must meet the following eligibility criteria: 2.0 GPA*.**

Early Childhood Teacher Education

The Early Childhood Teacher Education program is a program in which high school students prepare for careers in child-related occupations, earning high school honors credits and/or Dual Enrollment college credits. Career possibilities may include teaching, child psychology, social work, and day-care ownership. The program prepares students for post-secondary education or immediate entry into the Palm Beach County workforce. Students gain teaching experiences through internships at area preschools and elementary schools. Early Childhood Teacher Education programs provide students with teaching experiences in the laboratory preschools located on high school campuses with the exception of Atlantic High and Boca Raton High. **All students applying to this program must meet the following eligibility criteria: 2.5 GPA. Applicants must pass a background check for continuation in the program.**

Engineering and Technology—Project Lead the Way

The Engineering and Technology programs are affiliated with Project Lead the Way (PLTW), a not-for-profit organization that forms partnerships with public schools, colleges, universities, and the private sector to increase the quantity and quality of engineers and engineering technologists graduating from our educational system. PLTW has developed a four-year sequence of courses including Introduction to Engineering Design, Digital Electronics, Principles of Engineering, Civil Engineering and Architecture, and Engineering Design and Development. **All students applying to this program must meet the following eligibility criteria: 2.5 GPA.**

Entrepreneurship

The Entrepreneurship program encompasses both academic knowledge and practical skills to prepare young people for responsible citizenship and the world of work. Fostering entrepreneurship attitudes and skills in secondary schools raises awareness of career opportunities, as well as ways young people can contribute to the development and prosperity of their communities. **All students applying to this program must meet the following eligibility criteria: 2.5 GPA.**

Environmental Science and Field Research

The Environmental Science and Field Research program meets the needs of students wishing to pursue an academic curriculum with an emphasis on research and environmental studies. Students explore and evaluate the many challenges related to local, regional and global environments. All students are involved in a learning-through-discovery approach, developing research and thinking skills. Field studies, as well as a variety of current technologies, are utilized throughout the programs. Ecosystem restoration, water-related problems, agricultural awareness, field research and sustainability in the 21st century are some of the issues students investigate. **All students applying to this program must meet the following eligibility criteria: 2.5 GPA.**

HIGH SCHOOL PROGRAMS

Equine/Pre-Veterinary

The Equine/Pre-Veterinarian program provides students with an opportunity to pursue a rigorous, accelerated science program to prepare them for veterinary medicine and/or animal sciences at the college level. Due to the rigorous science curriculum, this program is appropriate for students preparing for a college program in pre-medicine or fields requiring a strong foundation in upper level sciences. Topics include horse anatomy and physiology, behavior, parasitology, disease, lameness, etc. Students in this program are required to complete twenty hours of community service in an animal-based area during each year of high school and intern with an animal health care facility, complete research assignments in animal health care/medicine, and prepare veterinary case studies as a senior in high school. **All students applying to this program must meet the following eligibility criteria: 3.0 GPA and Algebra I or Algebra I Honors. Proof of completion of the required courses must be submitted via email by May 21, 2027 to vanessa.douglass@palmbeachschools.org.**

Fashion Design

The Fashion Design program is designed to provide high school students with skills necessary for careers in fashion design, fashion merchandising, costume design, and entrepreneurship. The Fashion Design Academy has a rich, hands-on curriculum focusing on design skills and a broad array of garment construction techniques. Students will experience all aspects of garment construction and design, perfecting skills in advanced garment construction, computerized garment design, and creative embroidery design using advanced technology to simulate industry standards. **There are no eligibility criteria required for students applying to this program.**

Finance

The Finance program is designed to give high school students an opportunity to learn about and prepare for college or careers in business and finance. Emphasis is placed on a college preparatory curriculum that is directly linked to the financial world. Students participate in mentorships, career shadowing, and internship programs that link the resources of business, economics, and finance to education and to the students. Specialized courses in finance are required. Finance is a model program established to promote educational excellence by the National Academy Foundation. **All students applying to this program must meet the following eligibility criteria: 2.5 GPA.**

Fine Arts

The Fine Arts Academy provides dedicated and motivated student artists the opportunity to study their art form(s) by taking a minimum of eight Fine Arts courses over four years, including a minimum of five courses within their selected area of focus. Students will complete a rigorous study of their artistic discipline, including dance, music (vocal and/or instrumental), theater, and the visual arts. **All students applying to this program must meet the following eligibility criteria: 2.5 GPA.**

Fire Science

The Fire Science program is a four-year program that prepares cadets as outstanding applicants for entry into post graduate fire academies, specifically Palm Beach State College. Students learn skills including: fire behavior, first responder model, personal protective equipment, use of ropes, tools and equipment, use of fire streams and fundamentals of extinguishment, and rescue procedures. The Fire Science program is a structured "attention on deck" environment with students earning leadership positions as company officers. Students in the academy are concurrently enrolled in Medical Sciences.

All students applying to this program must meet the following eligibility criteria: 2.5 GPA.

Game, Simulation, and Animation Programming

The Game, Simulation, and Animation Programming pathway prepares students with the skills necessary to excel in the video game development industry. Students will study computer programming, game design, and 2D/3D art & animation, which are vital skills for various career paths in the gaming industry. Students in this program will also be able to pursue careers in most fields related to computer science and software engineering as a result of our extensive studies in object-oriented computer programming. **There are no eligibility criteria required for students applying for this program.**

Global Business and Entrepreneurship

The Global Business and Entrepreneurship program has been designed to simulate a college curriculum. Students take cornerstone courses their freshman and sophomore years, which give them essential skills and an overview in the Global Business area. Participation in Future Business Leaders of America (FBLA) and R.O.P.E.S. leadership training helps students enhance their skills in communication, problem solving, teamwork and computer technology with an opportunity to earn the Microsoft Office Specialist industry certification.

All students applying to this program must meet the following eligibility criteria: 2.5 GPA.

Horticulture

The Horticulture program provides course work in a variety of agricultural and horticultural areas. The program operates a working nursery as well as upgrading and maintaining planted areas around campus. Students develop skill and knowledge in areas such as plant identification, forestry practices, and animal husbandry. Each student is required to create and complete a horticultural project as well as community service activities. **There are no eligibility criteria required for students applying to this program.**

Information Technology

The Information Technology program offers an innovative, integrated learning environment focused on computers, technology, and communications. The program provides students with the training and skills necessary for careers such as: computer operation, computer support, electronics technology, graphic design, multimedia & web design, network systems, PC support and word processing, and cybersecurity. Specialization opportunities vary depending upon the location of the academy. **All students applying to this program must meet the following eligibility criteria: 2.5 GPA.**

HIGH SCHOOL PROGRAMS

Information Technology- Esports

The Information Technology–E-Sports Academy combines competitive gaming with the technical skills required to support today’s digital world. Students explore computer hardware, networking, cybersecurity, troubleshooting, game technology, streaming, and e-sports event operations while developing teamwork, communication, strategy, and problem-solving skills. The program prepares students to pursue further education and careers in information technology, cybersecurity, network administration, technical support, digital production, game development, and the expanding e-sports industry. **All students applying to this program must meet the following eligibility criteria: 2.0 GPA**

International Baccalaureate (IB) Diploma Programme

The IB Diploma Programme (DP) is an academically challenging and balanced program of education that prepares students in grades 11–12 for effective participation in a rapidly globalizing world and for postsecondary success in college and career. Students study at least two languages and increase understanding of diverse cultures. Due to its rigorous nature, preparation for the IB Diploma Programme is offered through the IB Middle Years Programme curricula in the 9th and 10th grades or through other accelerated curricula. The IB diploma leads to advanced standing in universities throughout the world. The IB Diploma Programme framework includes required courses within six subject groups: Language and Literature, Language Acquisition, Individuals and Societies, Sciences, Mathematics, and the Arts. Schools tailor course sequences to meet each school’s focus. Spanish or French are highly recommended to prepare students for the rigor of the program. **All students applying to this program must meet the following eligibility criteria: 3.0 GPA. Additional eligibility criteria is listed below for each grade level**

- **9th Grade:** Enrollment in or completion of Algebra I or Algebra 1 Honors. Verification of enrollment in the required math courses is required at time of application submission. Proof of completion of the required courses must be submitted via email by May 21, 2027 to the school's Choice Coordinator
- **10th Grade:** Must have completed and passed Algebra I, Geometry, Biology or higher, and French I or Spanish I or higher.
- **11th Grade:** Must have completed and passed Algebra I, Geometry, Algebra II, Biology, Chemistry, and two years of French or Spanish.
- **12th Grade:** Must be transferring from an IB program and be on track for all IB assessments.

International Spanish Academy

International Spanish Academies (ISA) are Dual Language programs that have signed a collaborative agreement with the Ministry of Education of Spain. This K–12 educational program is carried out within the framework of cooperative activities organized by the Office of Education of Spain in the U.S. and each participating district. The language, history, and culture of Spanish speaking countries are a major focus of the curriculum. Each student finishing their senior year at an ISA will take the DELE (Diploma of Spanish as a Foreign Language). Due to the sequential nature and the rigor of the language of instruction, students accepted to an International Spanish Academy (ISA) at the high school level should have had three (3) consecutive years of formal Spanish instruction at the middle school level. **All students applying to this program must meet the following eligibility criteria: 2.5 GPA and language assessment.**

Keyboard/Piano

Internationally recognized, the Keyboard program offers extensive study in the Music industry. Courses encompass three levels of music theory including Music Theory, Advanced Music Placement and Music Composition. Student ensembles rehearse and perform throughout the year. **All students applying to this program must meet the following eligibility criteria: 2.0 GPA and a qualifying audition score.**

Law-Related and Law Studies

Programs offered in Law & Legal Studies offer an exciting pathway for students interested in law, justice, advocacy, and careers across the legal field. Through engaging coursework and hands-on experiences, students sharpen critical thinking, legal reasoning, communication, and practical problem-solving skills. Participants gain access to real-world opportunities, including Mock Trial, Youth Court, Debate, courtroom field experiences, internships, and networking with legal professionals. At **Palm Beach Lakes Community High School**, students have the opportunity to learn in a courtroom lab setting through The Gerald A. Williams Center for Pre-Law. Beginning with the inaugural class of ninth-grade students, incoming **Jupiter High School** scholars have the unique opportunity to help shape their program, establish its traditions, and build a strong foundation for future Warriors interested in law and legal studies. **All students applying to this program must meet the following eligibility criteria: 2.5 GPA.**

Marine Corps JROTC

There are challenges ahead and decisions to make. Marine Corps JROTC provides students with the life skills to tackle those challenges. The curriculum includes lessons in leadership, citizenship, physical education, marksmanship and career exploration. Participation in the Marine Corps JROTC program can help students make the best decisions based upon learning and practicing core values and the development of character and personal responsibility. Students in this program are taught to recognize diversity as a strength and a leadership imperative and to encourage and embrace innovative change while accomplishing a mission through teamwork. Upon completion students are under no obligation to enlist in the Armed Forces. Successful completion of the JROTC program allows entry into the Armed Forces up to two pay grades higher than other enlistees without JROTC experience. **All cadets are required to adhere to the U.S. Marine Corps standards including authorized grooming regulations as part of the uniform requirement. There are no eligibility criteria required for students applying to this program.**

Marketing

The Marketing program is designed to prepare students for higher education and careers in marketing, management, and entrepreneurship. The program develops marketing concepts as they apply to areas such as business, e-commerce, entertainment, fashion, finance, hospitality, law, management, medicine, sales, and sports. Hands-on projects throughout the program will allow students to work with local businesses and entrepreneurs to develop real world experiences and skills. The student can develop leadership skills while participating in many community activities and field trips. **All students applying to this program must meet the following eligibility criteria: 2.5 GPA.**

Marketing and Entrepreneurship

The Marketing and Entrepreneurship program prepares students for entry-level management trainee positions through its Marketing Program. This multi-faceted, survey program is designed to prepare students for higher education and careers in marketing, management, and entrepreneurship. The program develops marketing concepts as they apply to areas such as business, e-commerce, entertainment, fashion, finance, hospitality, law, management, sales, and sports. Hands-on projects throughout the program will allow students to work with local businesses and entrepreneurs to develop real world experiences and skills. Students can develop leadership skills while participating in many community activities and field trips. **All students applying to this program must meet the following eligibility criteria: 2.5 GPA.**

Math, Science and Engineering (MSE)

The MSE program is designed to meet the needs of highly talented students wishing to pursue an accelerated curriculum with emphasis on mathematics, science, and engineering. MSE graduates typically earn between one and two years of college credit. Advanced Placement (AP) Precalculus, AP Calculus, AP Physics I, AP Physics II, and AP Physics C are some of the required courses for the MSE program. Dual enrollment courses offered at Suncoast High School are also required. The following are some of the required dual enrollment courses: Calculus II, Calculus III, Differential Equations, and Linear Algebra. Students will conduct scientific research and take introductory courses in mechanical, civil, and electrical engineering. MSE students will be given the opportunity to add the International Baccalaureate Diploma Programme to their program beginning their junior year.

All students applying to this program must meet the following eligibility criteria: 3.0 GPA or higher and a 3.0 GPA or higher in each of the following math courses: Algebra I Honors, Algebra II Honors, and Geometry Honors. Grades earned during each marking period will be used to calculate the GPA for each math course. Verification of enrollment in the required math courses is required at time of application submission. Proof of completion of the required courses must be submitted via email by June 3, 2027 to deverie.yazar@palmbeachschools.org.

Mechatronics

Mechatronics is the combination of mechanical engineering, computing, and electronics as used in the design and development of new manufacturing techniques. Mechatronics is critically important to keeping industrial or production facility operation systems running smoothly. The program at West Tech places a heavy emphasis on hands-on manufacturing skills & robotics production. As you matriculate through this program you will have opportunities to earn up to four industry certifications—Pre-Engineering, Robotics, MSSC Certified Production Technicians (MSSC-CPT), and Mechatronics Fitter. Students that earn the MSSC-CPT industry certification should be eligible for 15 credit hours towards the Florida Engineering Technology A.S./A.A.S. where the program is offered in the state. **All students applying to this program must meet the following eligibility criteria: 2.0 GPA and Algebra I recommended. For more information regarding this program, email shirley.joycefisher@palmbeachschool.org**

HIGH SCHOOL PROGRAMS

Medical Sciences

The Medical Sciences Honors program offers an innovative, integrated learning environment designed to provide the student with the medical skills and training necessary to succeed in postsecondary healthcare career education and/or to successfully transition into the healthcare workforce. This comprehensive program combines a rigorous academic curriculum with intense clinical and laboratory experiences. Student clinical rotations are conducted at area hospitals and other healthcare facilities. Clinical clearance, including a background check and drug screening are required prior to entering the clinical setting. In the School District of Palm Beach County all medical courses provide local honors credit. **All students applying to this program must meet the following eligibility criteria: 3.0 GPA. Students are required to meet the clinical clearances. Failure to meet the continuation requirements will result in an exit from the program.**

HIGH SCHOOL PROGRAMS

Navy JROTC

The Navy Junior Reserve Officers Training Corps (NJROTC) program teaches self-discipline, self-confidence and leadership skills to meet life's challenges. The naval science curriculum includes seamanship, oceanography, meteorology, astronomy, radar, sonar electronics, and leadership. Instruction consists of formal classroom training supplemented by field trips to various naval facilities. Cadets have an opportunity to take college level courses through Embry-Riddle Aeronautical University and obtain numerous drone certifications and the drone pilot certification. Upon completion, students are under no obligation to enlist in the Armed Forces. Successful completion of the NJROTC program allows entry into the Armed Forces up to two pay grades higher than other enlistees without NJROTC experience. **All cadets are required to adhere to the U.S. Navy standards including authorized grooming regulations as part of the uniform requirement. There are no eligibility criteria required for students applying to this program.**

Quantum AI Nexus Academy

Step into the future with the Quantum AI Nexus Academy! Explore groundbreaking technologies like quantum computing and artificial intelligence that are transforming the world. Learn how quantum physics powers computers to solve problems beyond the reach of today's machines, and discover how AI and emerging tech are shaping tomorrow's careers and everyday life. Get hands-on experience with real quantum and AI tools while building the skills you need to succeed in a rapidly changing technological landscape. If you're ready to be a part of the next generation of innovators, this academy is your launchpad! **All students applying to this program must meet the following eligibility criteria: 2.5 GPA and Algebra I. Proof of completion of the required course must be submitted via email by May 21, 2027 to breyonna.weatherington@palmbeachschools.org.**

Science, Technology, Engineering, and Math (STEM)

This four year, pre-university course of study is designed to meet the needs of highly motivated students wishing to engage in a tailored curriculum with opportunities to pursue studies in mathematics, science, engineering, and technology. STEM students take courses through the Advanced International Certificate in Education (AICE) partnership and the College Board Advanced Placement program. Students may have opportunities to participate in SECME and other learning experiences such as First Robotics competitions and computer game design. Boca Raton Community High School students choose between engineering and an architectural drafting course track. **All students applying to this program must meet the following eligibility criteria: 3.0 GPA.**

Spanish Dual Language

The Spanish Dual Language program offers a continuation for students who have been in a Spanish Dual Language program at the middle level or who have a high level of Spanish language proficiency. Highly motivated students are engaged in a challenging academic environment in which three of their core academic courses are taught in Spanish. **All students applying to this program must receive an eligible score on a Spanish assessment test.**

Sports Management and Recreation

The Sports Management and Recreation program provides students the opportunity to pursue a course of study leading to college degrees in sports management, marketing, recreation, health and fitness. Students take courses that stress communication, problem solving, teamwork, business and technology, as well as participate in summer internships. For hands-on experiences, students plan and run at least one sporting event. Through internships and special projects, students apply business knowledge learned in school and in the community. **All students applying to this program must meet the following eligibility criteria: 2.5 GPA**

Sports Nutrition & Hospitality

Complemented by a strategic partnership with BARWIS, the Sports Nutrition & Hospitality Academy connects culinary arts and hospitality education with the science of fueling athletic performance. Students will explore balanced nutrition, meal planning, food preparation, hydration, recovery, food safety, customer service, and hospitality operations. BARWIS emphasizes personalized and sustainable nutrition strategies that support energy, training, muscle recovery, healthy body composition, and long-term wellness. Hands-on learning will help students understand how quality nutrition and exceptional service contribute to successful athletes, teams, and sporting events while preparing them for careers in culinary arts, sports nutrition, food service management, event hospitality, and restaurant or hotel operations. **There are no eligibility criteria required for students applying to this program.**

Available School Options

Choice

- Boynton Beach Community High

Sports Performance

In partnership with BARWIS, the Sports Performance Academy provides students with hands-on learning in athletic development, fitness, strength training, speed, agility, mobility, recovery, and injury prevention. Students will explore the science behind human performance while learning safe exercise techniques, movement patterns, program design, and methods for evaluating athletic progress. The BARWIS approach emphasizes purposeful, sport-specific training and the development of strength, resilience, discipline, and confidence. Students will be introduced to careers in strength and conditioning, exercise science, personal training, coaching, fitness management, and sports performance. **There are no eligibility criteria required for students applying to this program.**

HIGH SCHOOL PROGRAMS

Strings

Internationally recognized, the Strings program offers extensive study for students interested in the Philharmonic, String Orchestra, and Instrumental Ensemble. Courses encompass three levels of music theory including Music Theory, Advanced Music Placement and Music Composition. Student ensembles rehearse and perform throughout the year. **All students applying to this program must meet the following eligibility criteria: 2.0 GPA and a qualifying audition score.**

Television and Film Production Technology

The Television and Film Production Technology program is dedicated to providing quality education in the organization and dissemination of ideas through television and film production. Students are taught in professional broadcast studios with high quality equipment. Students benefit by the use of recording studios, remote cameras, video recorders, video switching and editing equipment, and comprehensive computer graphics to complete academic and extracurricular projects. Students are prepared to function as members of a technical team by participating in activities that simulate the conditions found in television and production studios as well as on-location events. **There are no eligibility criteria required for students applying to this program.**

Theatre - Acting

The Acting track of the Theatre program challenges young artists to develop a passion and understanding of the art form. Students will focus on process-centered work gaining a profound knowledge of who they are in the world both as artists and humans. Through a curriculum involving movement work, script analysis, scene study, Shakespeare, devised theater and directing, students will train to become competitive theater practitioners and storytellers. **All students applying to this program must meet the following eligibility criteria: 2.0 GPA and a qualifying audition score.**

Theatre - Musical

The Musical track of the Theatre program explores the practical skills needed for the artist seeking to study musical theatre on the collegiate level. Students study acting, singing, and dancing in tandem as the primary method of telling stories. Students will explore dance technique, musical theatre history, music theory & musicianship principles, present selections from their repertoire books, workshop material, work collaboratively as an ensemble, study current trends in the profession and, eventually, film college pre-screen auditions. **All students applying to this program must meet the following eligibility criteria: 2.0 GPA and a qualifying audition score.**

Theatre - Technical

The Technical track of the Theatre program provides students with a comprehensive understanding of all production elements of a show and offers hands-on training in all aspects of technical theatre construction and design of scenery, lighting, sound, and costume. Students can study stage management, arts administration, and prepare for leadership positions on crews and production teams. **All students applying to this program must meet the following eligibility criteria: 2.0 GPA and a qualifying audition score.**

Tourism, Hospitality, and Resort Management

The Tourism, Hospitality, and Resort Management program is a college preparatory curriculum that integrates unique high school courses with practical internships and business leadership training. Students participate in project-based learning, field trips and job shadowing within the multiple segments of the hospitality cluster. Students learn about cultures and destinations worldwide while exploring high level career opportunities in the world's largest hotel and resort industry. Students have the opportunity to attend a yearly conference designed exclusively by Palm Beach County's Industry Leaders and take part in competitions and leadership training workshops. The Tourism, Hospitality, and Resort Management program is part of the National Academy Foundation (NAF), established to promote academy excellence. **There are no eligibility criteria required for students applying to this program.**

Visual Arts

The Visual Arts program encourages its students to explore personal visions through a variety of mediums and materials. Visual Arts students are offered coursework that includes art history, photography, painting, digital photography, three dimensional art and printmaking. Academy students will be required to keep sketchbooks while developing portfolios which will serve to document their artistic growth and showcase skills that take them to the next stages of their education or into their professional careers. The central philosophy of the Visual Arts Academy is that to truly learn a discipline, one must learn by doing and not just study it in a classroom. Our visual arts program combines in-class lectures to familiarize students with the fundamentals of their discipline, instructor-supervised workshops to ensure students are comfortable with their equipment and independent projects that allow students to bring their ideas to life. **All students applying to this program must meet the following eligibility criteria: 2.0 GPA. *A.W. Dreyfoos School of the Arts also requires a qualifying audition score.**

Vocal

Students in the Vocal program develop a proper vocal technique and an understanding of vocal mechanism. Students will also learn musical notation, sight singing and appreciation of many genres of music through the study and performance of vocal literature. Students will also learn musical theory, arrangement, vocal and performance techniques, musical notation, sight-reading, structure & discipline. They will experience feelings of accomplishment and success like no other through creative expression, self-respect, peer collaboration, coordination, and most of all an appreciation for others' talent. **All students applying to this program must meet the following eligibility criteria: 2.0 GPA and a qualifying audition score.**

INTERNATIONAL BACCALAUREATE K-12 EDUCATION

What is International Baccalaureate?

The International Baccalaureate (IB) is a non-profit educational foundation comprised of four challenging programs of international education and assessment that develop academic, personal, emotional, and social skills for students aged 3–19. Each program includes a curriculum framework and pedagogy, student assessment, professional development for teachers, and a process for school authorization and regular evaluation. SDPBC students completing the Diploma program earn Florida Bright Futures Scholarships and are prepared for success in college and the career of their choice. For more information, please visit: ibo.org

An IB K–12 Education Continuum:

- Requires study across a broad range of subjects drawing on globally significant content
- Develops critical and creative thinking, research skills, and time management skills in all academic disciplines and the arts.
- Requires all students K–12 to study an additional world language.

IB in the School District of Palm Beach County

The IB K–12 Education Continuum is offered in each of the geographical areas of the School District of Palm Beach County. The four IB programs in the continuum are:

IB CONTINUUM
CONTINUUM DE L'IB
CONTINUO DEL IB

Primary Years Programme (PYP) for students in Grades K–5:

- Dr. Mary McLeod Bethune Elementary (Grades 3–5)
- Forest Park Elementary
- Grove Park Elementary* (STEM infused)
- Morikami Park Elementary
- Pahokee Elementary
- Palmetto Elementary* (STEM infused)
- Westward Elementary

Middle Years Programme (MYP) for students in Grades 6–10:

- Carver Community Middle—Atlantic Community High
- John F. Kennedy Middle—Suncoast High
- Conniston Community Middle—Forest Hill Community High
- Pahokee Middle-Senior High—Pahokee Middle-Senior High

Diploma Programme (DP) and Career Programme (CP) for students in Grades 11 and 12:

- Atlantic Community High+
- Forest Hill Community High+
- Pahokee Middle-Senior High
- Royal Palm Beach Community High
- Suncoast High+
- William T. Dwyer Community High

Schools with '+' have IB DP and IB CP.

Access to an IB Education in the School District of Palm Beach County:

K-8: There are no eligibility requirements for elementary school (PYP) and middle school (MYP) students.

9th Grade: Enrollment in or completion of Algebra I or Algebra 1 Honors. Verification of enrollment in the required math courses is required at time of application submission. Proof of completion of the required courses must be submitted via email to the school's Choice Coordinator

10th Grade: Must have completed and passed Algebra I, Geometry, Biology or higher, and French I or Spanish I or higher.

11th Grade: Must have completed and passed Algebra I, Geometry, Algebra II, Biology, Chemistry, and two years of French or Spanish.

12th Grade: Must be transferring from an IB program and be on track for all IB assessments.

For information about strand preference see page 7. For more information about the IB in Palm Beach County, including IB Coordinators at each school, please visit: [International Baccalaureate \(IB\) Programs](http://ibo.org)

*STEM: Science, Technology, Engineering, & Math

JUNIOR RESERVES OFFICER TRAINING CORPS (JROTC) PROGRAMS

Shown above- Olympic Heights High School Marine Corps JROTC

The MCJROTC unit at Olympic Heights Community High School has been designated as a Naval Honor School for the 2025–2026 academic year. This prestigious national award, conferred by the U.S. Marine Corps Training and Education Command, is reserved for the top 10% to 20% of MCJROTC units nationwide.

JUNIOR RESERVES OFFICER TRAINING CORPS (JROTC) PROGRAMS

Skills for Life

Welcome to the School District of Palm Beach County's Junior Reserve Officer Training Corps (JROTC) programs! Designed to build character, instill self-discipline, and unlock leadership potential, JROTC is far more than a classroom elective, it is a proven pathway to academic achievement, civic responsibility, and post-secondary success.

Important Note for Parents & Students: Participation in high school JROTC involves zero military obligation. Whether your student plans to attend a four-year university, pursue a technical career, or serve in the military, JROTC equips them with essential life skills, college application advantages, and early exposure to dynamic careers.

Key Student Benefits Across All Branches

- **Character & Leadership Development:** Cadets lead fellow students, plan events, and hold rank positions inside the cadet corps.
- **Academic & Scholarship Pathways:** Access to exclusive national 4-year ROTC college scholarships and service academy nominations.
- **Practical Life Skills:** Real-world instruction in financial literacy, public speaking, physical fitness, ethics, and team building.
- **Enlistment Advantage:** For students who do choose military service post-graduation, completing 2 to 4 years of JROTC allows enlistment at an advanced rank (higher pay grade).
- **High School Honors:** JROTC courses satisfy the Florida graduation requirements for Physical Education (HOPE) and Performing/Fine Arts (upon completion of 2 consecutive years).

JROTC Branch Pathways in Palm Beach County High Schools

Air Force JROTC (AFJROTC)

- **Focus:** Aerospace Science, Aviation Fundamentals, Drone Certification & Technology.
- **Program Highlights:** Cadets explore the history of flight, global weather systems, and space exploration. Select programs partner with aviation universities (e.g., Embry-Riddle) for dual-enrollment credits and commercial FAA drone pilot certification.
- **Ideal For:** Students fascinated by aviation, space technology, engineering, meteorology, and cutting-edge aerospace logistics.

Army JROTC (AJROTC)

- **Focus:** Ground Leadership, Civics, Physical Fitness & Outdoor Adventure.
- **Program Highlights:** Built around the core mission "To Motivate Young People to be Better Citizens," Army JROTC emphasizes land navigation, drill precision, team obstacles, and structured staff leadership.
- **Ideal For:** Students who thrive in structured team environments, excel in physical fitness, and want hands-on management experience.

Coast Guard JROTC (CGJROTC / Maritime Studies)

- **Focus:** Search & Rescue, Maritime Safety, Environmental Protection & Coastal Operations.
- **Program Highlights:** Emphasizes coastal ecology, water safety, emergency management, and community service. Cadets learn real-world problem solving under pressure and maritime governance.
- **Ideal For:** Students passionate about environmental conservation, marine safety, first responder fields, and coastal emergency services.

Marine Corps JROTC (MCJROTC)

- **Focus:** Honor, Courage, Commitment, Discipline & Self-Reliance.
- **Program Highlights:** MCJROTC instills extreme personal accountability, physical conditioning, and traditional military drill. Cadets participate in rigorous leadership labs and community service programs.
- **Ideal For:** Students seeking personal challenge, high standards of personal discipline, and mental resilience.

Navy JROTC (NJROTC)

- **Focus:** Naval Science, Maritime Logistics, Oceanography & Leadership Theory.
- **Program Highlights:** Focuses on nautical heritage, seamanship, meteorology, and global geopolitical strategy. Cadets compete in drill, academic bowl, and other regional competitions.
- **Ideal For:** Students interested in marine science, international logistics, naval architecture, and structured teamwork.

INDUSTRY CERTIFICATIONS

Industry Certification verifies that individuals have the entry-level skills to perform job functions in the area of certification. Research indicates students who attain industry certifications earn more money over the course of their careers than those lacking industry recognized certifications. Students who earn a certification feel a greater sense of accomplishment. Industry certifications are an important component of Career Academies and Career and Technical Education Programs showing students have demonstrated evidence of technical skill attainment and impacting school grade as a part of accelerated coursework component.
