

CFISD PROP C

INVESTING IN TECHNOLOGY

Proposition C would authorize Cypress-Fairbanks ISD to issue \$256.1 million in technology bonds for the acquisition and replacement of technology equipment used throughout the district — in classrooms, campuses, and district operations.

THIS IS A PROPERTY TAX INCREASE. Approval of Proposition C authorizes the issuance of bonds for technology equipment to support students, teachers, and staff across CFISD.

FOUR AREAS OF INVESTMENT

STUDENT DEVICES

Technology devices for students, access to digital learning tools and resources, and updated equipment to support classroom learning.

TECHNOLOGY REFRESH & REPLACEMENT

Refresh outdated devices and equipment, maintain secure and reliable technology systems, and keep district technology current and functional.

TEACHER & STAFF TECHNOLOGY

Updated technology for teachers and staff to support instruction, operations, and reliable tools that help educators serve students effectively.

FUTURE-READY LEARNING

Student preparedness for college and careers, digital resources and instructional support, and secure systems for daily district operations.

\$256.1 MILLION TECHNOLOGY BOND PROPOSAL INVESTING IN STUDENT SUCCESS

Why Proposition C? Technology helps connect students, teachers, and classrooms with the tools needed for learning today and success tomorrow.
