

October 19, 2026

Hello students, staff, and families of the Rogue River School District.

This communication is designed to make you aware of some safety plans the RRSD will use if we ever need to engage in a process known as an offsite reunification. It provides an overview of what to expect, how you can be prepared, and how you can help facilitate the speedy and safe reunification of you and your child should we have to move students to an alternative location.

Please take a few minutes to read the parent handout so that you have some familiarity with our reunification process. A link to a generalized manual relating to the Standard Reunification Method is included in this communication for those who would like to learn more. There is also a link to a 4-minute video from a school district in Texas that gives you a nice overview of how the process would work. The most important factors to remember are to be calm, be patient, and to bring your ID to the reunification site so that we can verify we are releasing each child to the right person.

Though we hope to never have to use these plans, the RRSD is ready to do a reunification if needed. We will not divulge the locations we will use for reunification until an event requires us to do so. Families can help do their part by making sure that all contact information is updated at your child's school. This includes home and work phone numbers, cell numbers, addresses, and listing who your acceptable emergency contacts are. Please contact your school secretary to update this information as soon as possible.

If you have questions regarding reunification plans, please send them to superintendent@rogueriver.k12.or.us.

Sincerely,

April Harrison, D.Ed.

Superintendent

Rogue River School District 35
