

WHAT IS IT?

WHAT ARE THE RISKS?

WHAT SHOULD WE DO ABOUT DATA CENTERS?

AI.

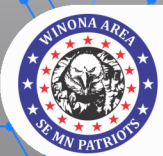

AI creates immense opportunity, but it also poses great risks. From data centers, to students cheating in school, to job loss and existential risk, AI has created many more questions than answers. Mark York will discuss how the technology works, its risks and what our communities should do to get the good without the bad. All are welcome to attend. Q&A to follow. Goodwill donation suggested.

Mark York is a farmer from SW MN, a computer scientist, a former White House Fellow who wrote President Trump's critical minerals strategy, the co-founder and president of FarmYield Africa and a 2026 Republican candidate for US Senate. Mark is a SDSU grad and is about to complete his PhD in Computer Science from Harvard University.
