HOT TOPICS

- Fix releasing with the October 23rd deployment:

  ESCs are unable to open the subcategory error lists from this screen, making it more difficult for ESCs to monitor errors and support school systems.

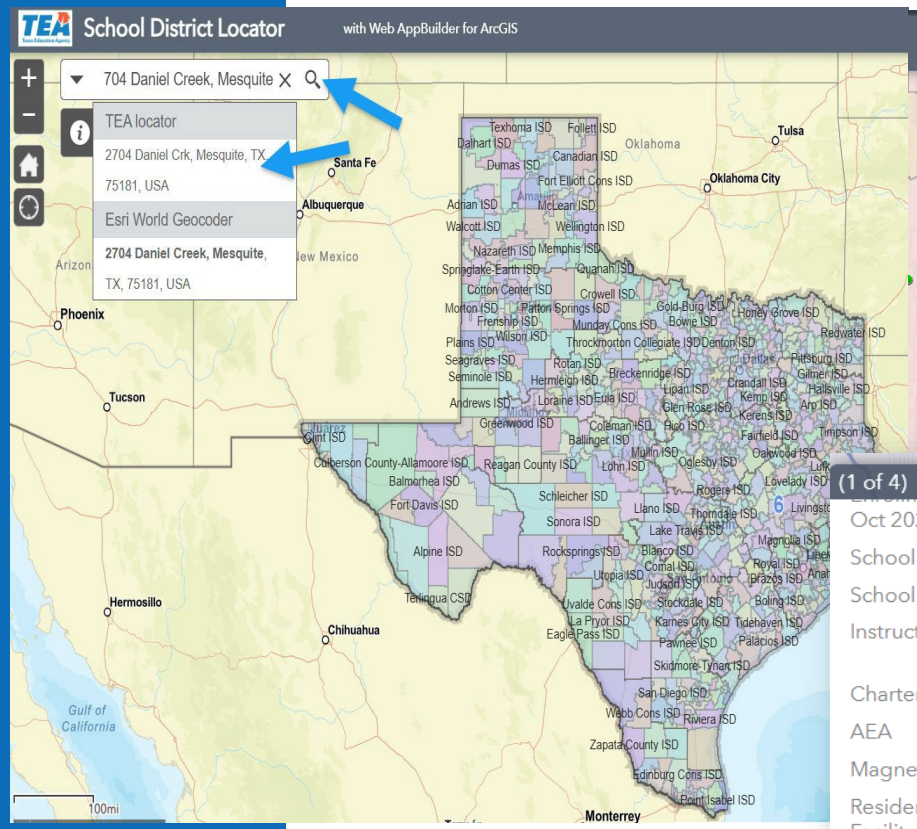

- Reminder → NEW PEIMS Fall rule: 40110-0241 student reported CampusIdOfResidence must match grade level registered in AskTED.
  - Example: Johnny is in 12th grade but his CampusIdOfResidence reflects the nine-digit campus number of Liberty Elementary school.

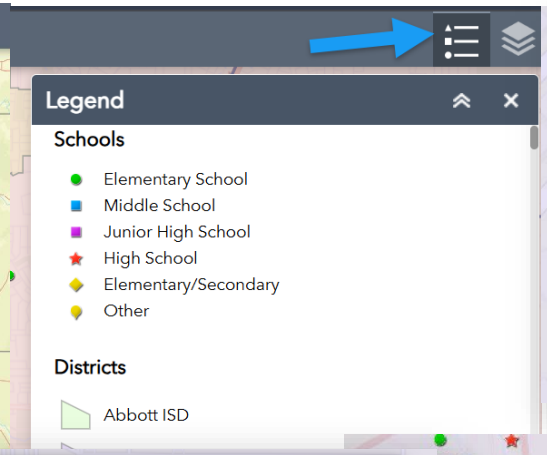

Rule #	Rule Text / Business Meaning	Sev./ Level	Core	PEIMS	Applies To
40110-0241	If a CampusIdOfResidence is reported, then the student's EntryGradeLevel must be in the grade range registered with TEA for the CampusIdOfResidence.	F		PF	District, Campus, Charter
	The CampusIdOfResidence reported for the student must provide instruction to the grade level in which the student is currently enrolled. For example, a high school student should not be reported with a CampusIdOfResidence for an elementary school.	L2, L3			

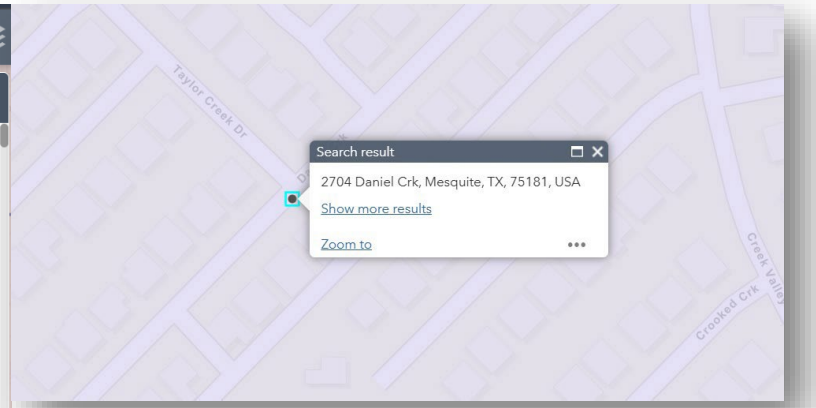

Impacts Limited Open Enrollment districts and all Charter school systems.

  - Using the TEA School District Locator will be helpful to the school systems looking for the correct campus.

TOP KNOWN ISSUES

PEIMS ATND

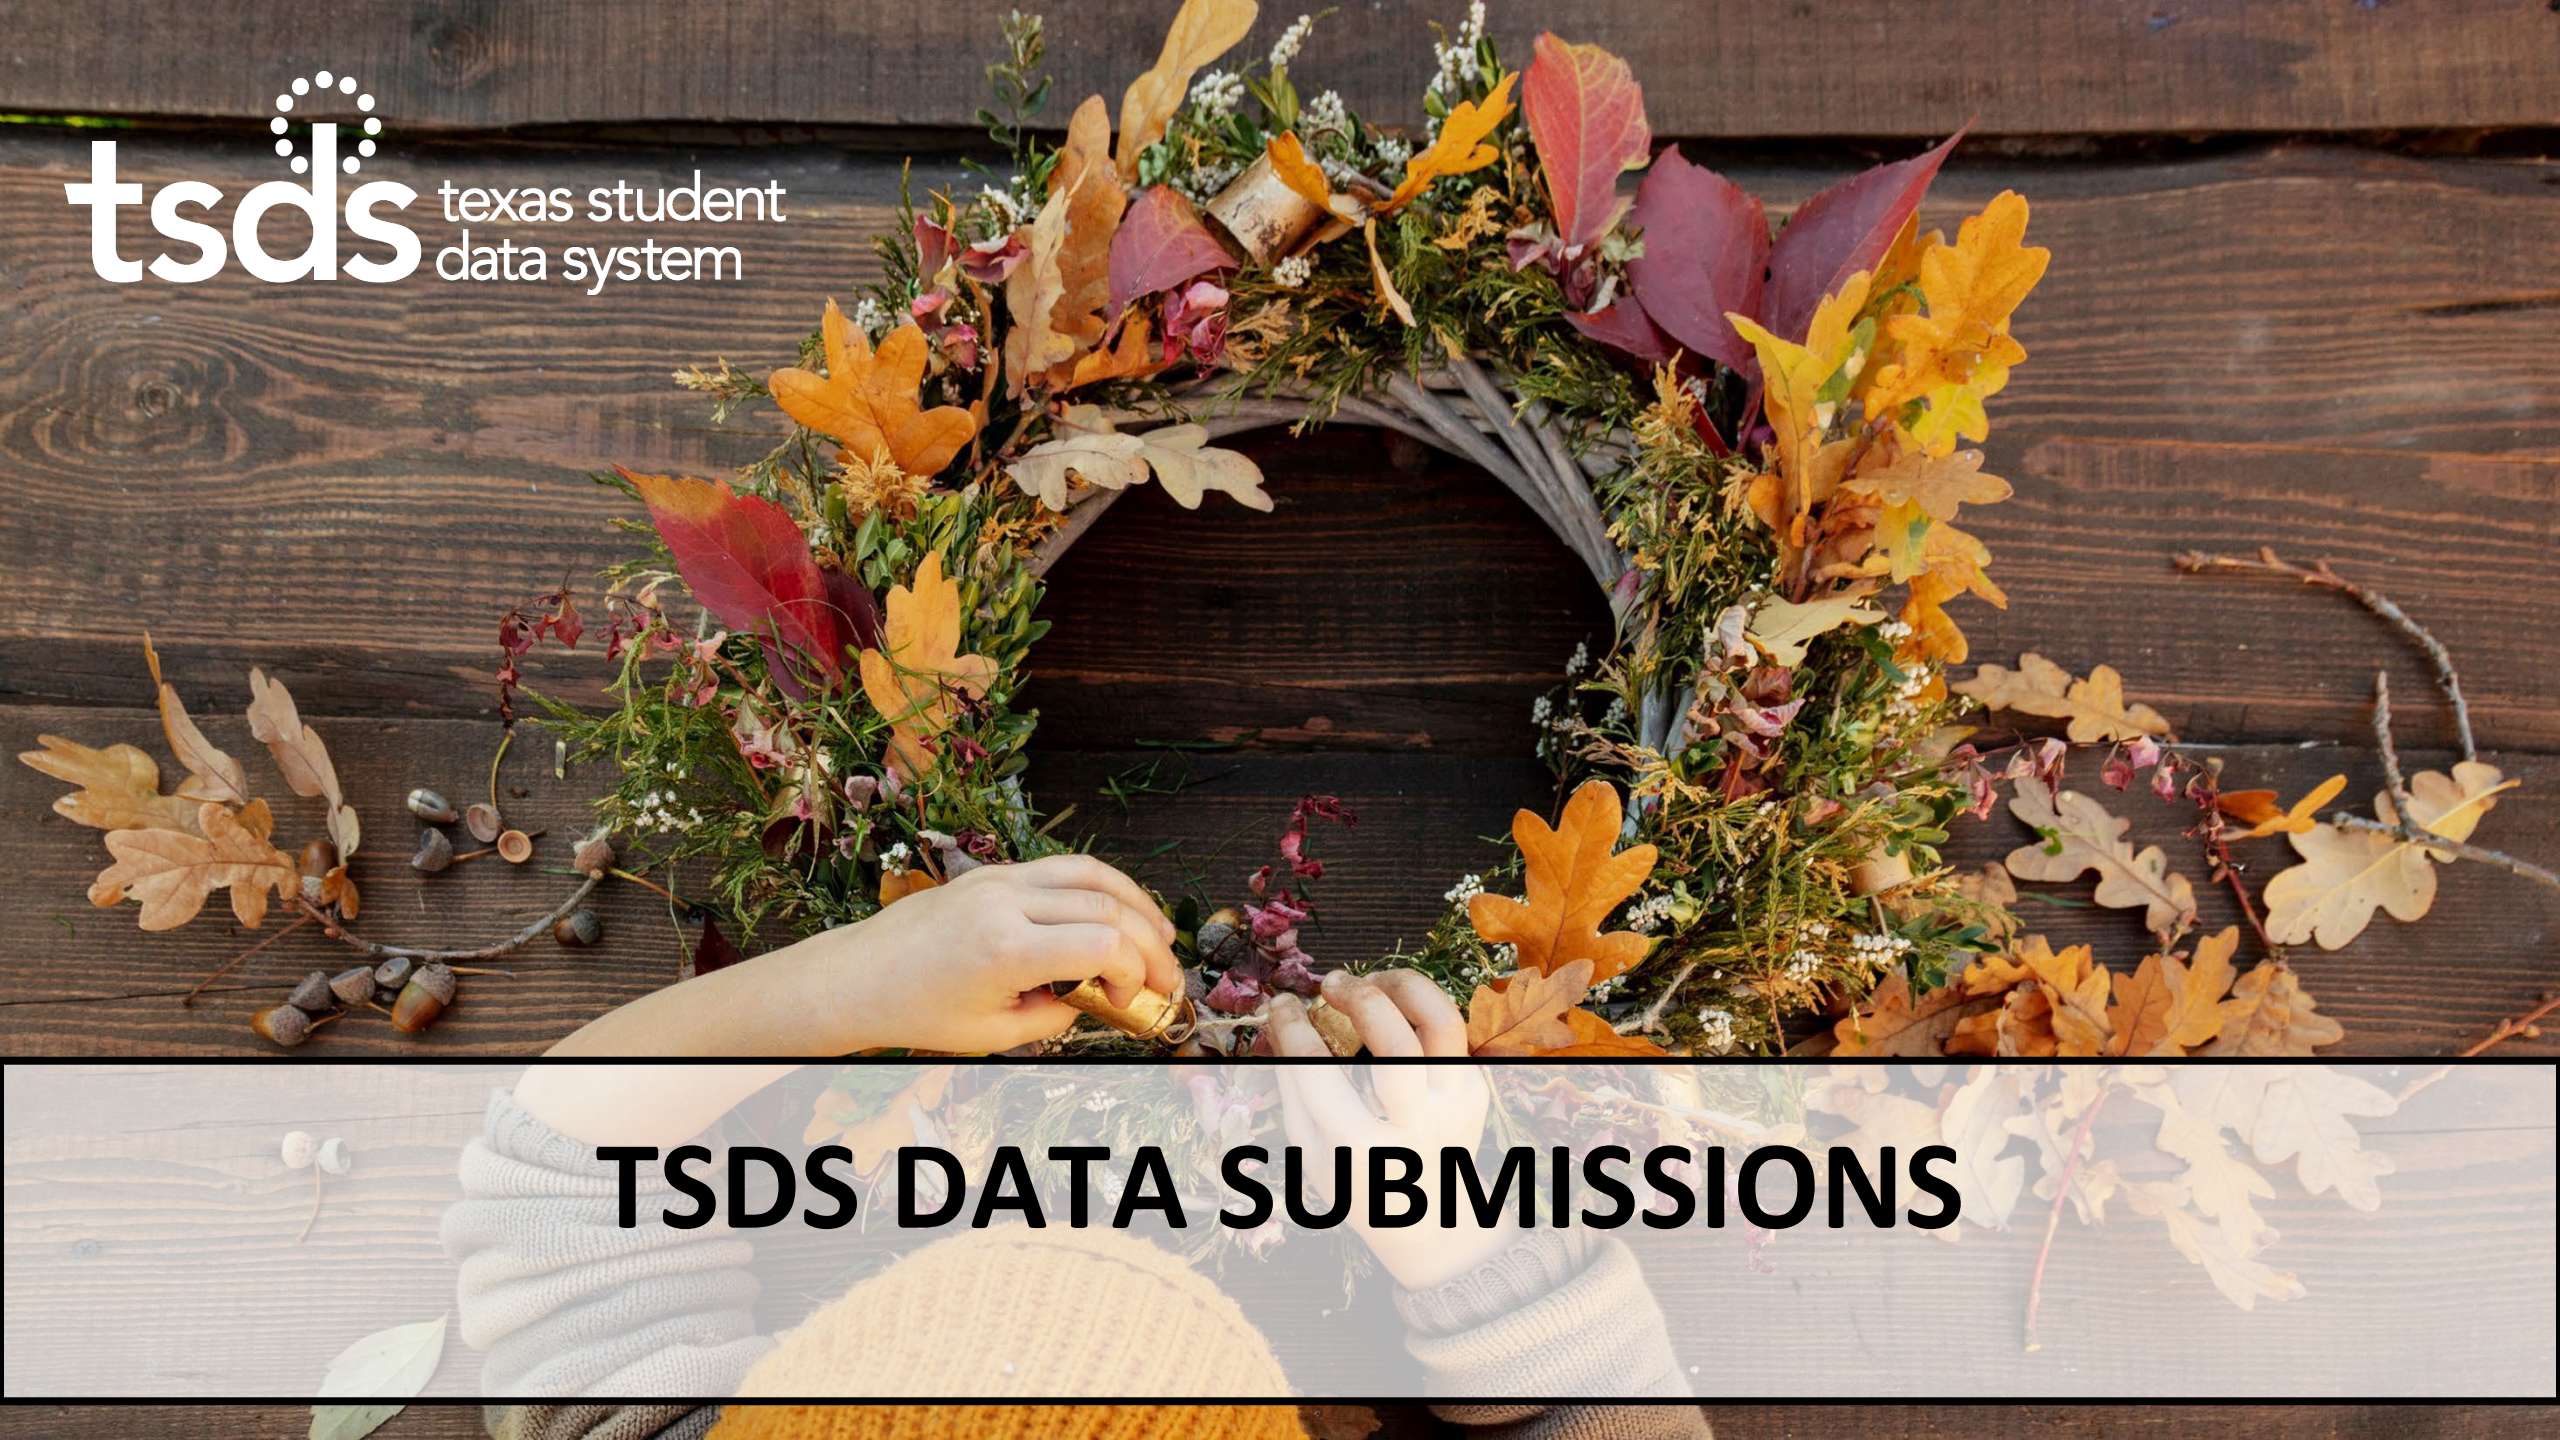

The Student > Enrollment (School Association) subcategory does not promote for a student when they have multiple StudentSchoolAssociation Entities, and the most recent entity ends after the first reporting period. These students will not appear on the PDM5-120-001 or PDM5-120-002 reports; school systems should use the Data Retrieval feature to verify the data on these reports.

Target Release Date: TBD

PEIMS ATND

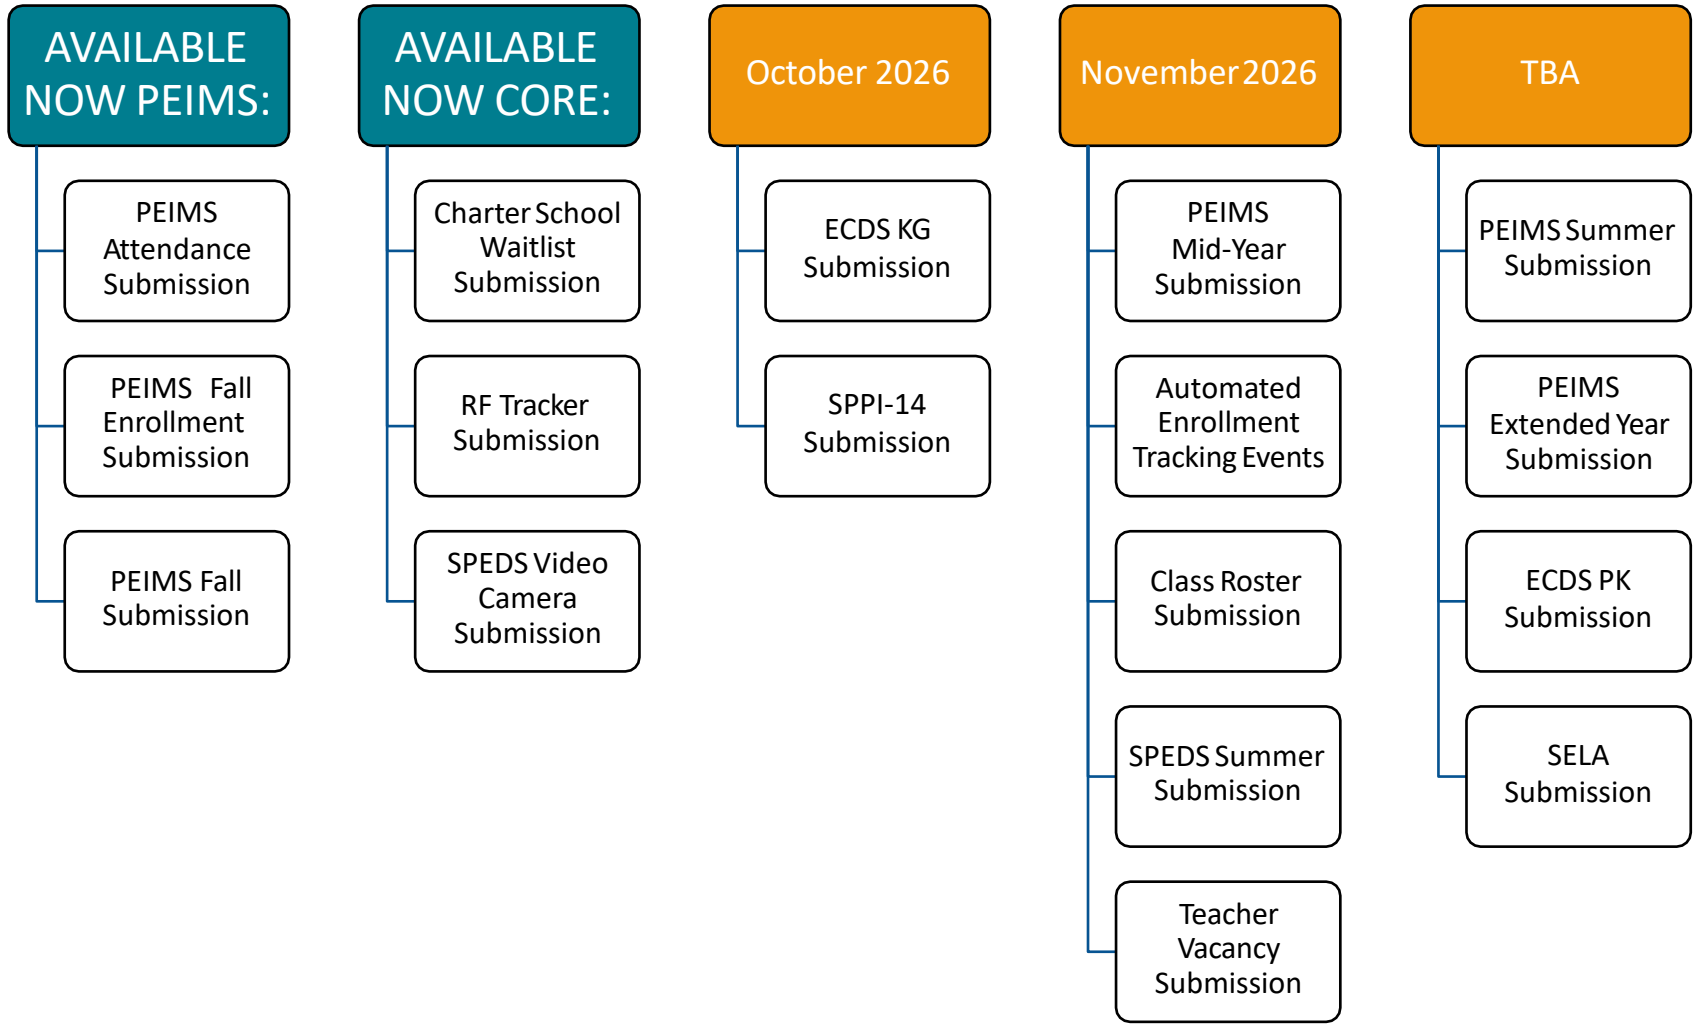

PDM5-121-003 ‘Roster of Students with SPED Service Group’ is displaying the SPED Service Minutes in the SPED Service Group column instead of the expected SPED Service Group values.

Target Release Date: October 23, 2026

General Reporting Requirements

GR1

SPEDS Video Camera Request Submission

All school systems must report a SPEDVideoCameraRequestExt Entity for each special education video camera request that reaches a reportable outcome during the reporting period of July 1 through June 30.

- Requests with a *CameraStatus* (E3169) of Authorized (01) must be reported when the *CameraOperationalDate* (E3172) occurs between July 1 and June 30.
- Requests with a *CameraStatus* (E3169) of Denied (02) or Withdrawn (03) must be reported when the *CameraStatusDeterminationDate* (E3170) occurs between July 1 and June 30.

Note: The *CameraRequestReceivedDate* (E3167) does not determine the reporting period for the request.

- Updates to the Data Element Reporting Requirements:

Data Element Reporting Requirements

DR1

School Reference
The School Reference represents the identifier assigned to a school.

RequestId (E3166) indicates the unique identifier for the individual special education classroom video camera request.

The same *RequestID* is assigned when a member of the board of trustees or governing board makes a request for individual special education video cameras for more than one campus. There needs to be one request per campus submitted with the same *RequestID*.

CameraRequestReceivedDate (E3167) indicates the date the local education agency received the special education classroom video camera request.

Reporting is based on the *CameraOperationalDate* (E3172) for authorized requests or the *CameraStatusDeterminationDate* (E3170) for denied or withdrawn requests. The *CameraRequestReceivedDate* (E3172) does not determine the reporting period in which the request is reported.

The *CameraRequestReceivedDate* must be a school business day. A school business day is a day the campus or school district administrative offices are open (TEC §29.022(u)(2)).

CameraOperationalDate (E3172) indicates the date the camera became operational.

The *CameraOperationalDate* must be a school business day. A school business day is a day the campus or school district administrative offices are open (TEC §29.022(u)(2)). The *CameraOperationalDate* (E3172) should be 45 or less school business days from the *CameraStatusDeterminationDate* (E3170).
