

Room to Discover

STEAM and Robotics

Our new STEAM program connects science, technology, engineering, art, and mathematics. Robotics for grades 1-12 builds collaboration and problem-solving.

Visual and Performing Arts

Art encourages expression and creativity. Our upper school choir and band develop musical skills and shared performance experiences.

Theatre and Stagecraft

Our new theatre program offers acting and behind-the-scenes opportunities, including stagecraft, photography, videography, and lighting.

Media Production

Our production studio provides space for podcast recording, photography, videography, and creative storytelling.
