

Steel Beam Signing Marks Major Milestone in New High School Construction

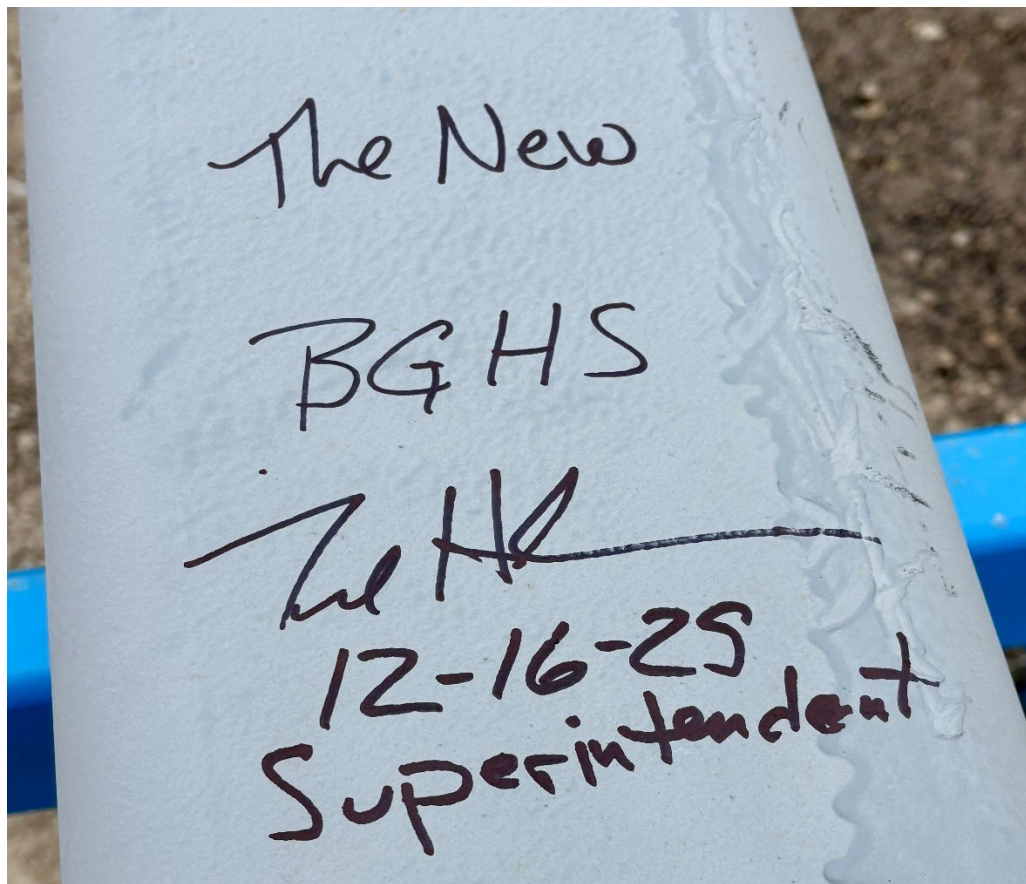

A meaningful milestone in the construction of the new Bowling Green High School was celebrated on December 16 and 17, 2025 as the first structural steel beam was signed by members of the Bowling Green City Schools Board of Education, the superintendent, treasurer, high school principal, Bowling Green High School students and staff and Rudolph Libbe Group representatives in anticipation of its installation on site the following week. Students eagerly lined up for the opportunity, many expressing pride and excitement at knowing their names will live on as part of the new high school for generations to come.

The beam signing follows continued momentum on the construction site. Drone photos from last week showed concrete foundations approximately 70 percent complete, with masonry work officially underway across the site. Together, these milestones mark the transition from groundwork to vertical construction and bring the vision of the new Bowling Green High School closer to reality. At Tuesday's Board of Education meeting (December 16, 2025), Dr. Haselman updated the Board of Education stating, "The project remains on budget and on time."
