Multnomah Education Service District

Instructional Minutes by Grade Level

2025-2026

As part of the Division 22 Public Compliance Report, districts are required to share the number of instructional minutes by grade level provided during the 2025-2026 school year. This requirement is only applicable to this year. In future years, districts will report these minutes through a consolidated collection sent directly to the state, separate from this report.

MESD operates programs for youth with unique needs and across a wide range of settings. This report provides the number of minutes offered at the sites with the fewest minutes. Some sites provided more minutes than others due to a variety of factors, inclusive of district specific weather closures, site requirements, etc.
