Question 2:

The [Schwin AC Sport](#) bike does not come standard with a console. Would you like these included in the bids for Thomas? Note: The optional console for the AC Sport is the [Echelon 2](#) and allows for user data including Time, kCal, RPM, and Heart Rate. MSRP for this console is \$439 for the console and \$39 for the additional wiring kit.

Answer:

No, we would not like consoles included in the bids.

Question 3:

Trade-in credit: We'd be glad to take the existing equipment as a trade-in and apply its value toward the labor on the removal portion. Would the District allow this as an alternate or credit line on the bid form?

Answer:

Yes, if you would like to apply a total credit for existing equipment, please add a line below the "total equipment price" cell. Please label it as a trade in credit. Total Price = (Total Equipment Price + Total Delivery/Install/Removal) - Credit

Question 4:

Splitting the bid: Would the District consider awarding the removal/disposal of the existing equipment separately from the new equipment purchase and installation?

Answer:

Not at this time. Since the original bid documents did not specify removal/disposal and install as separate line items of the bid, we will not consider splitting the award based upon this criteria.

Question 5:

Brands: Will equivalent brands be accepted as alternates to the models listed, provided we include literature and warranty details?

Answer:

Per section III. specifications, of the instructions for bidders, alternates will be accepted.

Question 6:

We're reviewing the specifications and looking at alternative equipment options. Would you be open to a brief call/meeting or site visit?

Answer:

Per section III. specifications, of the instructions for bidders, alternates will be accepted. Once the bid is submitted, during the review process, we may reach out to schedule a site visit of a location utilizing the alternates specified.
