YOUR GUARDIAN LOGIN

GRAVA has already made a guardian account for you. You do not need to create one. Just sign in.

- 1 Go to ilvp.imaginelearning.com (or scan the code on the right). This is the GRAVA Learning Portal.
- 2 Username: **the email address the school has on file for you.**
- 3 Type your **password** and click **Enter**. Bookmark the page — you will use it every time.

First time, or forgot your password?

Under the login box, click **Forgot your login and/or password?** Type your email address and follow the steps to set a new password.

New to the portal? Click ► **Watch the orientation video** on the same page for a quick tour.

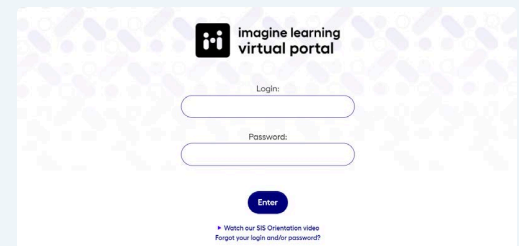

WHAT YOUR GUARDIAN ACCOUNT SHOWS YOU

- **Grades** in each course
- **Activity** — the time your student has put in
- **Messages** — write to their teachers and read what they send back

That is the whole list. A guardian account is a window, not the whole room — it does not open the lessons or show you the day-to-day work. **You will see much more by signing in to your student's account and sitting with them. Page 2 shows you how.**

Scan to go to the login page

Same page for you and your student — you each use your own login.

- The login page. Your email goes in the **Login** box. The video and password links are just below it.

Your student's login is different

Students sign in with the **Clever badge** from their GRAVA handout. On a district iPad, they tap **Clever** and hold the badge up to the camera. On any other device, they go to **clever.com/login**.

Lost the badge? Call the GRAVA office and we will send a new one.

Still can't get in? Need help with the GRAVA Learning Portal?

We may not have your email on file, or two parents may share one email — we can fix that.

Seeing the whole picture

— sit down together

Your guardian account shows you grades, activity and messages. It does **not** show you everything your student sees — it will not open the lessons, and it does not follow the day-to-day work.

The way to see the whole course is to **sit down next to your student and have them sign in**. On their screen you will both see the lessons, the assignments, what is due next, and anything a teacher has sent back for another try. Ten minutes once a week is usually enough.

Looking together beats checking up. Ask your student to walk you through one course — what they finished this week, what is next, and where they got stuck. You will learn more in five minutes of that than from any dashboard, and they stay in charge of their own work.

Your student won't let you look? Call me. I'll help.
Sean Martinson, Alternative Education Principal · 218-259-3129

How to help your student learn at home

- Choose a comfortable, distraction-free space as a work area for your student.
- Create a plan, such as "focus time" and "break time," to help them connect and succeed.
- Make sure your student has Wi-Fi and a charged device, such as a laptop, tablet, or smartphone.
- Show interest in what your student is learning about with questions like, "What did your learning focus on today?" or "What questions do you have about the lesson?"

Stay connected to your student's teacher

Regularly checking in with your student's teacher can help your student succeed. Teachers can be reached by email, by phone, during regular office hours, or by booking an appointment* with them outside of office hours.

Reach out to the teacher if you have any questions about the course or assignments, or if your student is:

- Having a hard time understanding a concept
- Falling behind in assignments
- Finding the work too easy and lacking challenge
