CTE IN ACTION

October, 2026 Automotive Technology

Under the Hood Ahead of the Curve!

STUDENT SPOTLIGHT

THE CHALLENGE

Students in our second-year Automotive program are building essential diagnostic skills by inspecting vehicles for potential problems before they become major repairs. From checking fluid leaks and engine trouble codes to inspecting brakes, steering, suspension, and tire safety, they're gaining hands-on experience that prepares them for success in the automotive industry!

Curious about Automotive technology?

Explore our Automotive program at Mountain View High School.
