

Gower School District 62

Superintendent's Report

Appendix A

Date: October 21, 2026

Title: Beginning of Year (BOY) Student Performance Data (10 minutes)

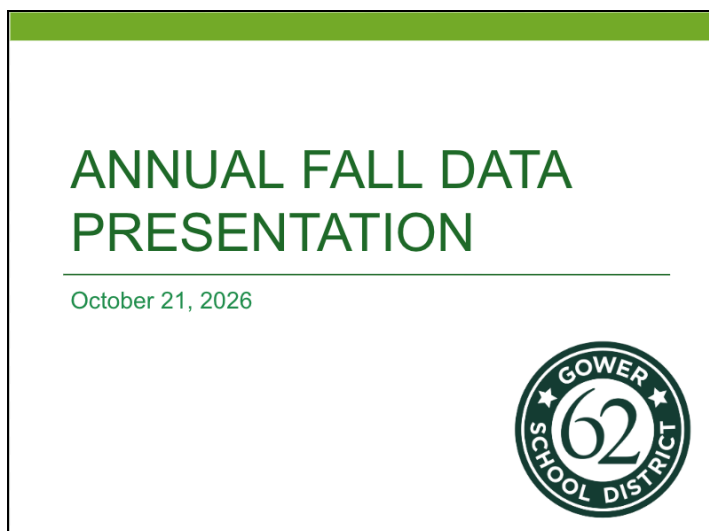

Contact: Victor Simon – vsimon@gower62.com

Background: The Annual Student Performance (Data) Presentation has been conducted to provide a high-level overview of student performance for the Board of Education and the Gower School Community. The presentation is a result of the collaborative effort of school and district administrators and is linked to individual school improvement plans, administrator performance goals, and district-wide continuous improvement efforts.

Current State: The 2025-26 statewide [Illinois Assessment of Readiness](#) (IAR) was administered to our 3rd-8th grade students in April 2026. The annual Illinois School Report Card will include this data in the 2025-26 School Report Card which will be accessible on October 30th at www.illinoisreportcard.com

Future State: Important Notice to the Gower School Community: ISBE is expected to release official School Report Cards beginning on October 30, 2026. Our district website [Academic Performance page](#) includes a tab for the updated School Report Cards for easy access. School districts are expected to present the report card at a regular board meeting, make it available to local newspapers within the first 30 days of receiving it from the state, and notify parents of the new report card in writing which is completed through our school and district updates. Districts with websites are expected to post the report card online and provide copies if they do not have a website.

A more detailed student performance report can be found by using [this link](#) and is designed to show the current level of student performance data in both reading and math on NWEA/MAP, which is administered locally and tied to a variety of performance goals in Gower School District.
