GPISD Shines Bright for Lights On Afterschool

Galena Park ISD (GPISD) administrative staff proudly wore yellow in support of Lights On Afterschool, joining together to shine a light on the important role afterschool programs play in supporting students, families, and the community.

Across GPISD, afterschool programs provide students with continued opportunities to learn, grow, and connect beyond the regular school day. Through Texas ACE/21st Century Community Learning Centers, students can receive academic support while participating in enrichment activities such as art, music, technology, health, recreation, and social-emotional learning.

These programs also strengthen the connection between schools and families through parent involvement and community partnerships. They create opportunities for students to explore college and careers, develop leadership skills, and build relationships that support their success.

By wearing yellow, GPISD staff celebrated the **Big Connections** that happen when schools, families, and community partners come together for students. It is one more way GPISD is helping students shine and showing why **Galena Park ISD is A Great Place to Be!**
