English Speaking Session Notes

1. What do you need from Edison to support your children in improving their reading? Is there anything you already do that you could share with all of us?

My son is new here from Indonesia. Some difficulties with English. I appreciate that he has 2 classes in English. Is this part of the requirements in every subject...to read in English? When my son has interest in a particular topic, he will go there and really focus on it—he will research, read, watch videos. When he's interested he will be relentless and read everything, try to know everything. As a parent, when I know what he is interested in, I can support by bringing those kind of texts to him. I also believe that reading is not just written texts but watching.

My child will get sucked in to comics or Sherman Alexi.

2. What supports do you or your child need to further develop their executive functioning skills (ie: organization, time management, memory, perseverance, setting goals, problem solving).

What about peer mentors—what are those?

I find the parent portal helpful to the extent that the teacher is caught up. It would be helpful to encourage students to stay on top of it themselves.

My child was not successful with the planner that I had to sign—not authentic.

3. What can Edison do to support you in improving your child's attendance (or in maintaining their good attendance)?

I have been wondering about Metro buses. How do you qualify for one?

We shared the online reporting function on IC.
