Spoke with / educated visitors	First warm day, Easter weekend & school vacation meant more visitors. Had 6-8 groups totally unaware of our plovers, enjoyed talking/educating them.	At the "No Dog" line, I approach every walker with a smile and ask, "Hello, Have you heard about our piping plovers?" Most times this early in the season I get a "Sure, we know about them" but surprisingly often this year I get "No, can you tell us?" and a wonderful conversation ensues. That way I know that every walker past the "No Dog" line knows about our plovers and can help us care for them. Easy -- and fun conversations!

Talked to each and they complied -- 1 willingly, 1 gruffly.	Louise Van Winkle joined me on this monitoring session, and this report is for both of us.	Spoke with / educated visitors, A dog owner, on phone, with dog on leash, started to walk right by the "No Dogs" sign before we stopped her! She complied & apologized		Was joined on this shift by Louise Van Winkle, who walked down to the nesting area while I remained at the "No Dog" line. Early in the "Summer Rules", so not everyone has full understanding. I approach everyone and ask if they know about the piping plovers, and dog walkers, and make sure they know the current rules. We are beginning to get people who are unfamiliar with either or both.

I intercepted her, had an educational conversation, and she quickly leashed the bigger dog and appreciated the education.	I made a point to say to all visitors, "We have brand new chicks on the beach!" which started some great conversations about how to behave when chicks are on the beach. New chicks excite people, and draw out the caring vibe, and are a great way to educate in a really positive environment.	Spoke with / educated visitors,	None other than noted above	I love the educational part of this. I intercept everyone who walks by, asking "Have you heard about our piping plovers?" and that starts many great conversations. if they do know, I can support and thank them; if they do not I can educate; if they are responsible dog owners I can thank them for being responsible dog owners, etc.

I had to ask some youth not to throw balls so close to areas where chicks might be, in an area past the blue signs. The tide had been going out for a while, and there was a wide expanse of "beach" beyond the area where people tend to walk or sit. The youth said that some monitors tell them that where they were throwing the ball was fine.

6/29/2025 19:24:51	6/29/2025	5:00:00 PM	Higgins	4	3	8	0	Dogs on the beach, Unleashed dog in the surf -- see details below	Copy of text to Jenn Cross: Dog owner refused to leash black lab on Higgins Beach @ 5:30 PM Sunday 6/29. Claimed ordinance does not cover "dogs in the water" and he was throwing balls into the water and dog was retrieving them. Argued with me about "where does beach end and water begin?" I withdrew and a short while later his father approached and dressed me down for harassing his children, and I should read the ordinance before I harassed people. These are renters on Vesper street. Still later, Dick Laroux (sp?) came down & talked to me, claimed he wrote the ordinance, I was challenging his family, and dogs in the water do not have to be in leash. PLEASE CLARIFY THIS FOR ME AND OTHERS. I FIND NOTHING IN THE RELEVANT ORDINANCES THAT DISTINGUISHES "IN THE WATER" VERSUS "ON THE BEACH"	Spoke with / educated visitors, Texted Jenn Cross, Animal Control Officer	As tide was high at the start of my shift, placed 1 "No Dogs Beyond This Point" sign and then walked to nesting area to educate visitors. Saw no infractions, but was able to help several parties see chicks and learn how to safely be around them. This is the part of the job I love most!	n/a

I used the language "to keep our plovers safe, ball playing needs to be at least 100 feet away from the stake & twine, and even more distance is even better". With football group, this led to a lengthy plover conversation which they appreciated.	I LOVE being in the nesting area in the middle of the day, when the police & wardens are controlling dogs and I can focus on educating visitors. After being asked to do this on July 4th, I signed up with Glennis to do it every Saturday since I enjoy it so much!

After 90 minutes I had educated every group still on the beach, and nothing bad had happened, so I left early (did 90 minutes vs 120 minutes shift).	
8/4/2025 20:58:24	8/4/2025	6:30:00 PM	Higgins	0	0	0	0	Beach games being played too close to nesting areas		Spoke with / educated visitors, Contacted plover coordinator (Jami and/or Glennis), Contacted Scarborough dispatch	I had a very disturbing discussion with 5 high school age boys on the beach near the Spurwink River at the end of the beach. One came all too close for my comfort. They were aggressive; one said "I am dick" to which I replied, yes, but I have dealt with worse than you. This was after the usual discussion of do you know about the birds. They said "the birds are behind the fence." Also they noted that they had not seen any of blue the signs! It was nearly high tide. Eventually, they stopped playing football. I called Glennis and the Scarborough non-emergency police, they were unable to come before I left at 8:00PM. The above took place at 7:00PM	This was a bit unnerving and the first time in almost 5 years that I felt very uncomfortable (I am nearly 86). It will not keep me from volunteering but it was uncomfortable and unexpected, never before anything like this!

They were very courteous, and enjoyed being educated about plovers (but many already knew). When I asked that they keep their football & soccer at least 100 feet away from the nesting area, they readily complied. All in all, a great encounter with people who cared...	I truly enjoy these near-the nests, educational shifts during the day when police & wardens are controlling the dogs. Educating people is easy and rewarding. Next year, I would happily sign up for shifts on Saturday afternoons doing this, in addition to my shift on Sunday evenings protecting the "no dog" line.

BUT I observed some youth playing football, and a family playing catch, that had the possibility that a missed catch would have the ball in the restricted nesting area, and then they would lose the ball because they were not permitted to enter the nesting area to recover it. I suggested they move further away, or change the direction of the throwing to parallel to the stake & twine. The youth did not comply (but never lost the ball) but the family readily complied (and it was an opportunity for a further discussion about our piping plovers). 8/31/2025 19:42:34	8/31/2025	5:00:00 PM	Higgins	0	0	5	0	Dogs on the beach, 2 men (age 25-35) had large dogs off leash in the "dogs allowed after 5 on leash" area. They were throwing balls into the surf (high tide) and the dogs were racing to retrieve. I approached, said the dogs must be on leash, and they argued that dogs were allowed off leash after 5, and I said the law requires dogs ON leash after 5 PM, but allows dogs OFF leash before 9 AM. They argued with me about what the ordnance requires, and I told them the ordinance requires ON leash after 5 PM. One asked if I was the enforcement, and then said, "You seem to care more about the birds than the animals." The other said Pine Point had different rules, and asked how long these rules had been in place. Later he said they would leave. I withdrew, and later observed they had NOT left the beach but the dogs were ON leash.		Spoke with / educated visitors, See above		My last shift for this season. I have really enjoyed this worked -- especially the educating at the nesting area on Saturdays during the day when the police/wardens control the dogs -- and will eagerly signup for both shifts again next year.

Male running around nearby. 2 chicks!! Puffed out feathers on nest - maybe on a couple other eggs or chicks? - Male incubating on fifth wired nest - Plover incubating near end of beach (i assume the new nest)
6/1/2025 20:49:49	6/1/2025	7:30:00 AM	Ferry / Western	16	0	0	0					cold and windy--few people on beach--lots of least terns--evidence of another very high tide--quite recent large dog tracks racing in circles, but outside of roped area--I may go earlier next time.
6/1/2025 22:52:48	6/1/2025	3:15:00 PM	Ferry / Western	18	4	0	0	Kites, drones, kite surfers				- Female and male outside first fenced area near end of it - Plover to the left of first nest in between fences areas - Plover incubating in first wired nest - Plover skittering to the right of first wired fence - Plover skittering near middle of beach - Prover standing closeish to second wired nest - not necessarily part of the pair - Plover incubating in second wired nest - Plover peeping near middle of beach - Plover peeping/skittering nearish to third wired fence. Male nearby in dune - Plover skittering close to water nearby - Male foraging at shore in front of third wired nest. Female incubating on nest - Plover skittering nearby - 4 chicks, male and female near fourth wired. Doing broken wing, very stressed - Plover incubating on fifth wired nest I caught a glimpse of a tern nest in between third and fourth wired plover nests. The tern nest looked pretty close to the twine fencing - maybe double check that it is fully inside the fencing. I couldn't get a good look before the terns started peep diving at me

6/2/2025 10:31:59	6/1/2025	5:00:00 PM	Ferry / Western	10	0	1-4	1-4	Dogs on the beach	I observed 5/18 and 5/25 and there were no issues with dogs in restricted area. 6/1 there was one dog just past the sign as part of photo shoot. I educated and the response was they did not see the sign. I also talked with folks who were walking on the beach, guests at the Inn. I talked about the dog restriction and they said they didn't notice any signs when they entered the beach by the Inn. I spoke with someone in the parking lot who had finished kite boarding and was packing up. He stated the restrictions don't apply to him because he is a boarder not a kite surfer and that there is a difference. He holds his kite vs the surfers who have the long strings..... I told him I though the restriction also applied to kite boarding because of the kite itself.	Spoke with / educated visitors

The sign in the parking lot say times allowed for dogs and look for restrictions signs. I think there should be a much more visible sign at the parking lot entrances saying no Dogs allowed to the left of the parking lot and just make it clear. The people I have encountered and educated this year do care but say it's not clear and signage is lacking
6/30/2025 12:26:32	6/30/2025	9:45:00 AM	Ferry / Western	11	8	0	0		Alerted by a beach goer that they had seen a chick on the beach that almost got stepped on. This was on the beach before the turn to west ferry beach and was among sun bathers. The witness stated that someone had seen the chick dropped by a bird. The chick was still alive and the witness moved the chick up to the dune grass. We were unable to spot the chick when I arrived on the scene. The witness captured a picture which I texted to Jami.	Contacted plover coordinator (Jami and/or Glennis)	Also tried to contact ME Audubon, but there was a message that stated they were not able to be reached and to try at a later time	There were several people with cameras as well as several beach goers who expressed interest in the Piping Plover Project. 7/13/2025 15:18:56	7/13/2025	7:30:00 AM	Ferry / Western			5-9		Dogs on the beach		Spoke with / educated visitors		I lost count several times because I kept walking back to talk to different dog owners and didn't remember where I left off and gave up on counting. The signs on the beach don't give dog owners the information they need and at low tide they don't walk up to read them anyway. They all think they are on Ferry and can be there until 9:00.. The tide was out farther than usual, but when I walked out there didn't seem to be any plovers very far out. There were a lot of least tern chicks all over the beach and the adults were particularly aggressive. It looked like more piping plovers were using the area where the terns nested. With plover and tern chicks intermingled and that area of the beach being extra wide, it was harder to count chicks. I don't know why there were so many dogs

Lots of plovers in the low tide area - I counted the older chicks (almost fledglings) in my chicks count. There were about 4 littles and the rest older chicks. Tons of birds to see today - gulls, willets, semi-palmated plovers, terns, plovers, great blue herons, white herons!!

6/2/2025 11:06:23	6/1/2025	8:00:00 AM	Pine Point	3	0	1-4	0	New nest				I believe there is a new nest on pine point close to the jetty. If you count stakes from last pathway to beach, it is the 4 th stake and just maybe 2 feet at a diagonal you'll see a plover sitting on a nest, I hope. I did mention to Kevin, one of the Rangers as well.

6/14/2025 10:14:43	6/12/2025	7:30:00 AM	Pine Point	1	0	10+	1-4	Dogs on the beach	3 dogs off leash were way out on the sand bar. When they returned to the breakwater Beach area they leashed their 3 dogs. We had spoken to one of the 2 people on a prior occasion and saw compliance in the past. We suspect they assume the far out sand bar is ok. When they returned we were not close enough to talk to them again, and they immediately Left the beach near the breakwater. We were also told by a complaint dog walker that another volunteer monitor told them they were not allowed to have their dogs in the restricted area, even on leash, at any time after May 15 on Pine Point. He was aware this was incorrect information but couldn't tell us which day or who told him this . He said it wasn't a ranger when we questioned him. He was on the beach with his dog leashed about 8:45 am he said. We have seen this gentleman before and he has always been compliant when we've seen him.	Spoke with / educated visitors

8/4/2025 16:22:08	7/31/2025	7:30:00 AM	Pine Point	0	0	5-9	0	Dogs on the beach, Abandoned holes	2 very large very deep holes just to the right of Sea Rose st. One was length of 2 bodies about 3-4 ft wide 2-1/2 to 3 ft deep, the second one was similar dimension but only 1 body length. We kicked in a lot of sand but too big a job with out a shovel. Text sent to Jamie	Spoke with / educated visitors, Contacted plover coordinator (Jami and/or Glennis)		
7/26/2025 10:52:34	8/2/2025	7:30:00 AM	Pine Point	1	1	10+	1-4	Dogs on the beach		Spoke with / educated visitors		Plovers seem to keep moving up the beach Scarborough side. Management may need to be extended. Spotted Plovers coming up from the waters edge (tide out pretty far) then Observed the 2 plovers to be mostly in the area on the last stake and sign for the management.
